Soul Psychology Joshua David Stone, Ph.D., 2010-11-24 The words of Sai Baba God equals man minus ego are echoed by Dr Joshua David Stone in his seminal work Soul Psychology A veteran transpersonal psychologist and family counselor Dr Stone teaches us how our entire understanding of ourselves and others is completely changed when we integrate our soul into the way we live our lives Based on eighteen years of Dr Stone s practice this book is not a psychological approach to spirituality It is rather a spiritual approach to the psychology of everyday living At the heart of Soul Psychology is emotional healing through the dismantling of the negative ego a psychological cancer that prevents us from acting in accordance with our soul s true nature and purpose This negative energy drives us to find our security outside of ourselves whereas the only true security is one that is grounded in having a right relationship with self and a right relationship with the Divine To guide us onto this path of spiritual ascension Soul Psychology offers a stimulating new viewpoint that expands the boundaries of traditional spiritual practice providing a wealth of accessible and powerful meditations and exercises including The six step process for healing and spiritualizing emotions The spiritual science of the seven rays and the twenty two chakras Methods for clearing negative psychic energies that inhibit soul growth The one hundred most common pitfalls and traps on the spiritual path

D. Faber,2010-06-03 In this insightful new study M D Faber whose previous work on the psychology of religion has won widespread critical acclaim offers a comprehensive naturalistic explanation of religious experience from the intertwining perspectives of neuroscience and developmental psychology Faber here argues that belief in God the powerful sensation of his presence and the heartfelt assent to the reality of the supernatural are all produced by the mind brain s inherent tendency to discover in religious narrative a striking memorial echo of its own biological development Although Faber maintains that we are not wired specifically for God as many contend our brain is so constructed as to make us profoundly susceptible to religious myths These myths encourage us to map our early internalized experience onto a variety of supernatural narratives with the figure of the Parent God and his angelic assistants at the center A key point of Faber s analysis is the connection between the onset of infantile amnesia during childhood s later years and the evocative power of

religious mythology Although we cannot explicitly recall our earliest interactions with our parents or other caregivers religious narratives can and do jog these implicit emotional memories in an uncanny way which prompts us to accede to religion's central tenet namely that we are in the care of an omnipotent parental provider who watches over us and ministers to our needs In the final analysis religious experience attempts to recapture and to reinstate in an idealized form the symbiotic union of the early parent child relation This pioneering highly original work takes the reader to the neurological psychological bedrock of religious experience **The Book of Satyr Magick** Lotuswulf Satyrhorn, 2014-04-24 The Book of Satyr Magick presents a path of shamanic sorcery for the Otherkin practitioner Complete with meditations spells and rituals specifically designed for the Otherkin experience it includes daemon correspondences for over thirty different daemons as well as obscure workings such as Ordeal Rites of Predator Prey Kitsune Bi crystal talismans and using shrunken heads as artificial entities This is a book the Otherkin community has needed for a long time and is written for all practitioners witches shamans and Otherkin alike *Empowering Practices for the Highly Sensitive* Bertold Keinar, 2022-05-17 Details 30 progressive exercises to help clear balance and protect your energy field release fears and support you in daily life Explores how to energetically cleanse and master your emotions and thoughts balance your subtle energy bodies and gain inner peace and calm Explains for each exercise what it is useful for how to tell the technique is working and what you are developing through the practice such as activating your pineal gland charging up with prana energy or protecting your system from energy vampires Sensitivity is a gift once you discover how to embrace your unique nature fully Understanding and experiencing your core essence is key to learning how not to be overwhelmed by the world This experiential guide offers a gradually progressive series of 30 structured practices to help clear balance and protect your energy field release fears and allow you to gain lasting stability and equanimity in daily life Focusing on energetic and emotional balance the techniques help you work with your sensitivity and build protection for your subtle energy bodies and your subconscious mind allowing you to balance your inner world For each exercise you will know what the practice is useful for how to tell that the technique is working and what you are developing through the exercises such as activating your pineal gland charging up with prana energy or protecting your system from energy vampires Allowing sensitives to stop sacrificing important parts of their unique nature in order to fit in this guide supports empaths to become more comfortable with their heightened awareness protect their energetic systems and embrace full participation in society where their gifts are sorely needed Archangel Raphael Mary LaSota,
