Sangster, 2017-12-04 No detailed description available for Roman Jakobson and Beyond Language as a System of Signs History of the Literary Cultures of East-Central Europe Marcel Cornis-Pope, John Neubauer, 2004-01-01 Continuing the work undertaken in Vol 1 of the History of the Literary Cultures of East Central Europe Vol 2 considers various topographic sites multicultural cities border areas cross cultural corridors multiethnic regions that cut across national boundaries rendering them permeable to the flow of hybrid cultural messages By focusing on the literary cultures of specific geographical locations this volume intends to put into practice a new type of comparative study Traditional comparative literary studies establish transnational comparisons and contrasts but thereby reconfirm howev **The Prague School** Peter Steiner, 2014-09-10 The Prague Linguistic Circle came into being on the afternoon of October 6 1926 when five Czech and Russian linguists gathered to hear a lecture by a German colleague From this international beginning the interests of the group grew to first encompass language in all its functional heterogeneity and then finally all of culture which the Circle conceived of as a structure of sign systems Semiotics was thus the overarching discipline for the Prague School serving to organize all phenomena shared and exchanged by a cultural community In recent years increasing attention has been paid to the importance of the Prague School but writing about it has frequently been marred by misconceptions The central aim of this volume is to correct those misconceptions and to present the diversity of interests within the Prague School literary criticism linguistics theory of theater folklore and philosophy These essays by Bogatyr v Jakobson Karcevskij Muka ovsk Rieger Vodi ka and Honzl are here translated into English for the first time Some have a special historical value in illuminating critical stages of structuralist thinking others reveal the timeliness of the School s contributions for the theoretical conflicts of our day Each essay is accompanied by an informative introductory note and the whole is followed by the editor s Postscript tracing the roots of structuralist aesthetics

Intertexts William F. Hanks, 2000 This book brings together papers written by William F Hanks over the last decade organized around the three central themes that have been emerged in his work indexicality and referential practices discourse genres and textuality and the historical embeddedness of language Together they present the main elements of a coherent synthetic approach to language in context **Central and Eastern European Literary Theory and the West** Michał Mrugalski, Schamma Schahadat, Irina Wutsdorff, 2022-12-05 Literary theory flourished in Central and Eastern Europe throughout the twentieth century but its relation to Western literary scholarship is complex This book sheds light on the entangled histories of exchange and influence both within the region known as Central and Eastern Europe and between the region and the West The exchange of ideas between scholars in the East and West was facilitated by both personal and institutional relations both official and informal encounters For the longest time however intellectual exchange was thwarted by political tensions that led to large parts of Central and Eastern Europe being isolated from the West A few literary theories

nevertheless made it into Western scholarly discourses via exiled scholars. Some of these scholars such as Mikhail Bakhtin became widely known in the West and their thought was transposed onto new Western cultural contexts; others such as Olga Freidenberg were barely noticed outside of Russian and Poland. This volume draws attention to the schools, circles, and concepts that shaped the development of theory in Central and Eastern Europe as well as the history of translations, transformations, and migrations that conditioned its relationship with the West.

The Oxford History of Phonology B. Elan Dresher, Harry van der Hulst, 2022-03-10 This volume is the first to provide an up to date and comprehensive history of phonology from the earliest known examples of phonological thinking through the rise of phonology as a field in the twentieth century and up to the most recent advances. The volume is divided into five parts. Part I offers an account of writing systems along with chapters exploring the great ancient and medieval intellectual traditions of phonological thought that form the foundation of later thinking and continue to enrich phonological theory. Chapters in Part II describe the important schools and individuals of the late nineteenth and early twentieth centuries who shaped phonology as an organized scientific field. Part III examines mid twentieth century developments in phonology in the Soviet Union, Northern and Western Europe, and North America; it continues with precursors to generative grammar and culminates in a chapter on Chomsky and Halle's *The Sound Pattern of English* (SPE). Part IV then shows how phonological theorists responded to SPE with respect to derivations, representations, and phonology-morphology interaction. Theories discussed include Dependency Phonology, Government Phonology, Constraint and Repair theories, and Optimality Theory. The part ends with a chapter on the study of variation. Finally, chapters in Part V look at new methods and approaches covering phonetic explanation, corpora, and phonological analysis, probabilistic phonology, computational modelling, models of phonological learning, and the evolution of phonology. This in-depth exploration of the history of phonology provides new perspectives on where phonology has been and sheds light on where it could go next.

Later Middle English Literature, Materiality, and Culture Brian Gastle, Erick Kelemen, 2018-04-12 The essays in this volume consider the ways in which material and intellectual culture both shaped and were shaped by the literature of late medieval England. The first section, Textual Materiality, reflects on cultural and social issues generally referred to as the History of Ideas and how those ideas manifest in later medieval English texts. Essays address, for example, affect in *The Book of Margery Kempe*, rhetoric in *Sir Gawain and the Green Knight*, anarchy in late medieval political texts, and temporality in Gower's *Confessio Amantis*. The essays in the second section, Material Texts,

examine physical objects from pilgrim badges to manuscripts to money to early printed editions and the cultural behaviors associated with them interpreting these objects and exploring their connections to the important literary and political texts of the age such as Piers Plowman Lydgate's Troy Book and Chaucer's Canterbury Tales All of the essays in this collection emerge from the relationships and connections between the issues that characterize Jim Dean's work the cultural material and aesthetic aspects of later medieval English literature So too do they reflect a movement in medieval literary studies presaged by Dean's career of scholarship and teaching that critical approaches to literary texts are best undertaken with an understanding of the complex cultural and historical milieu that defines both the production of those texts and the production of our own work on those texts
