Gelber,2020-06-23 A comprehensive history of evaluation in American higher education In *Grading the College* Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability *Grading the College* seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education **A Bibliographic Guide to Educational Research** Dorothea M. Congress. House. Committee on Public Works and Transportation. Subcommittee on Investigations and Oversight,1994 [Quality in Higher Education](#) Brent D. Ruben,2018-04-24 The concept

of quality in higher education is by no means a new one. By one set of definitions or another, colleges and universities throughout the world have always held the pursuit of excellence as their primary goal. Why, then, has the quality approach developed and popularized in industry and how increasingly applied in health care and government, receiving so much attention in higher education at this moment? What does this perspective add to the approaches to excellence with which they have long embraced? These are the two primary questions that this book seeks to address. Chapters and contributors include: The New Productivity by Peter F. Drucker; World War II and the Quality Movement by J. M. Juran; The Quality Approach to Higher Education: Context of Concepts for Change by Brent Ruben; The Big Questions in Higher Education Today by L. Edwin Coate; An American Approach to Quality by Marilyn R. Zuckerman and Lewis J. Hatala; Quality in Higher Education: Critical Issues in Definition and Assessment by Brent Ruben; and Ten Areas for Future Research in Total Quality Management by A. Blanton Godfrey. The volume is graced with an opening essay by Francis L. Lawrence, president of Rutgers University. Higher education is in the public spotlight today due to the many challenges it now faces: rising tuition costs, frustration about a tight job market for graduates, calls for increased faculty productivity, concerns about political correctness, and criticisms regarding the use of grant and research funds, among others. *Quality in Higher Education* is a particularly timely book that will greatly benefit educators, university administrators, students, and sociologists, and all those who are interested in higher education today.
