## **The Great Abdication Societas Series:**

*The Great Abdication* Alexander Deane, 2016-12-01 The middle class provides British society with its stability and strength According to Deane's contentious thesis our middle class has abstained from its responsibility to uphold societal values and the enormously damaging collapse of our society's norms and standards is largely a result of that abdication The institutions of political and social governance provide a husk of functionality and mask these problems for those that do not wish to see or do not care To restore Britain to something resembling a substantively functioning country the middle classes must reinstate themselves as arbiters of morality be unafraid to judge their fellow men and follow through with the

condemnation that necessarily follows when individuals sin against common values      **The Great Immigration Scandal**

Steve Moxon, 2004 This book outlines the events that led to the decision that the author could no longer participate in a policy that appeared to be at odds with the intentions of Parliament This book includes an analysis of the relevant scholarly literature in demography economics and psychology      Our Last Great Illusion Rob Weatherill, 2004 Therapy may be mad declares Rob Weatherill in this outspoken volume This book aims to refute the fashion for a return to a pre Cartesian ideal of harmony and integration      *Progressive Secular Society* Tom Rubens, 2008 A progressive secular society is one committed

to the widening of scientific knowledge and humane feeling This work reaffirms secular values in the face of aggressive supernatural religious doctrines and practices      Transactions of the Asiatic Society of Japan, 1924      The Politics of

Antisocial Behaviour Stuart Waiton, 2010-11-24 By providing a new criminological framework for understanding the fear of crime *The Politics of Antisocial Behaviour* re-poses the increasingly important debate around antisocial behaviour and the internationally understood idea of moral panics      **The Paradoxical Primate** Colin Talbot, 2005 Human beings have an

evolved but highly adaptable nature This book sets out to establish a new framework for understanding human nature from an evolutionary perspective but drawing on existing social sciences It seeks to explain how human beings can appear to be so malleable in their nature yet have an inherited set of behavioural instincts When the founder of sociobiology E O Wilson made a plea for greater integration of the physical and human sciences in his book *Consilience* there was an underlying assumption that the traffic would be mainly one way from physical to human science This book reverses this assumption and draws on a new branch of human sciences paradoxical systems theory to reconceptualise some of the most innovative developments from physical sciences the related fields of evolutionary psychology ethology and behavioural genetics The new approach is also applied to politics economic and public policy approaches      *The Enemies of Progress* Austin Williams, 2008

This book examines the concept of sustainability and presents a critical exploration of its influence on society Williams argues for an end to the mantra of sustainability removing its status as orthodoxy and for the reinstatement of the notions of development progress and ambition in its place      History of the Society of Dilettanti Lionel Cust, 1898      *Rethinking the*

*Future of Europe* Stefan Schepers, 2014-10-08 Rethinking the Future of Europe has brought together three contrasting

collections of contributions the incrementalist perspective concerning the step by step development of Europe the more radical reform restructuring approach to the future of Europe and a view of Europe from the outside
