Bartlett, 2015-08-26 Primatologists have long viewed small fruiting trees like figs as the reason for gibbons territorial and monogamous behavior However at Khao Yai National Park in Thailand where gibbons are prevalent figs are one of the largest trees in the forest In this long term field study Bartlett takes up this apparent contradiction and follows gibbons as their major food sources wax and wane over time This is an important reference on gibbons and the study of small apes which provides a thorough expansive coverage of the relationship between fruit abundance and diet range use and intergroup interactions in Gibbon apes The Gibbons of Khao Yai Seasonal Variation in Behavior and Ecology provides an essential resource for students conducting research in this field
