The Great Australian Stupor, 1972 *The Great Australian Stupor* Ronald Conway, 1971 **Psychology in Australia** Mary Nixon, Ronald Taft, 2013-10-22 Psychology in Australia Achievements psychological research in universities and colleges in clinical and counseling psychology and in health education and the training and education of psychologists in Australia Some applications of psychology are also discussed along with private practice in Australian psychology The final chapter focuses on Australian psychologists in the world context This monograph should be of interest to students and general readers as well as to psychologists themselves *The Imaginary Australian* Miriam Dixon, 1999 Examination of the nature of Australian national identity includes reference to Aborigines discussed in terms of violence racism guilt remorse and memory questions the characterisation of race relations through forgetting and silence Stanner and violence Rowley argues that simplified historical narratives about race relations impede reparative energy in race relations psychological understanding of racism theories of the nation crisis of history and time in Australia and its impact on identity **The Great Australian Stupor** Ronald Conway, 1985 **Cultural Complexes in Australia** Thomas Singer, 2023-12-29 Cultural Complexes in Australia Placing Psyche is the first in a series of books that will explore the notion of cultural complexes in a variety of settings around the world The continent of Australia is the focus of this inaugural volume in which the contributors elucidate how the unique geography and peoples of Australia interact and interpenetrate to create the particular mindscapes of the Australian psyche While the cultural complexes of Australia are explored with a keen eye to the specificity of place history context and content at the same time it becomes obvious that these cultural complexes emerge out of an archetypal background that is not just Australian but global This volume shows how cultural complex theory itself mediates between the particularity of place and the universality of archetypal patterns *Shelf Life* Kim Humphery, 1998-07-27 Supermarkets in all their everyday mundanity embody something of the enormous complexity of living and consuming in late twentieth century western societies Shelf Life first published in 1998 explores the supermarket as a retail space and as an arena of everyday consumption in Australia It historically situates and critically discusses the everyday food products we buy the retail environments in which we do so the attitudes of the retailers who construct such environments and the diverse ways in which all of us undertake and think about supermarket shopping Yet this book is more than narrative history It engages with broader issues of the nature of Australian modernity the globalisation of retail forms the connection between consumption and self autonomy and the highly gendered nature of retailing and shopping It interrogates also the work of cultural critics and questions recent attempts to grasp what it means to consume and to be a consumer *Sociological Theory and Educational Reality* Alan Barcan, 1993 An examination of the major classical sociological theories relevant to education and of the rise and decline of the new sociology of education Author also discusses the vexed questions of equality of opportunity the relationship between school and society the growth of educational bureaucracies and the roles of state church and family

in education in Australia since 1949 Includes endnotes tables and index The Mirth of Nations Christie Davies, 2017-07-28

The Mirth of Nations is a social and historical study of jokes told in the principal English speaking countries It is based on use of archives and other primary sources including old and rare joke books Davies makes detailed comparisons between the humor of specific pairs of nations and ethnic and regional groups In this way he achieves an appreciation of the unique characteristics of the humor of each nation or group A tightly argued book The Mirth of Nations uses the comparative method to undermine existing theories of humor which are rooted in notions of hostility conflict and superiority and derive ultimately from Hobbes and Freud Instead Davies argues that humor merely plays with aggression and with rule breaking and that the form this play takes is determined by social structures and intellectual traditions It is not related to actual conflicts between groups In particular Davies convincingly argues that Jewish humor and jokes are neither uniquely nor overwhelmingly self mocking as many writers since Freud have suggested Rather Jewish jokes like Scottish humor and jokes are the product of a strong cultural tradition of analytical thinking and intelligent self awareness The volume shows that the forty year popularity of the Polish joke cycle in America was not a product of any special negative feeling towards Poles Jokes are not serious and are not a form of determined aggression against others or against one's own group The Mirth of Nations is readable as well as revisionist It is written with great clarity and puts forward difficult and complex arguments without jargon in an accessible manner Its rich use of examples of all kinds of humor entertains the reader who will enjoy a great variety of jokes while being enlightened by the author's careful explanations of why particular sets of jokes exist and are immensely popular The book will appeal to general readers as well as those in cultural studies

Understanding Cultures through Their Key Words Anna Wierzbicka, 1997-08-07 This book develops the dual themes that languages can differ widely in their vocabularies and are also sensitive indices to the cultures to which they belong Wierzbicka seeks to demonstrate that every language has key concepts expressed in key words which reflect the core values of a given culture She shows that cultures can be revealingly studied compared and explained to outsiders through their key concepts and that the analytical framework necessary for this purpose is provided by the natural semantic metalanguage based on lexical universals that the author and colleagues have developed on the basis of wide ranging cross linguistic investigations Appealing to anthropologists psychologists and philosophers as well as linguists this book demonstrates that cultural patterns can be studied in a verifiable rigorous and non speculative way on the basis of empirical evidence and in a coherent theoretical framework
