The Greening Of Africa Breaking Through In The Battle For Land And Food Paladins:

The Greening of Aid Czech Conroy, Miles Litvinoff, 2013-11-05 The development of poor countries has so often meant the export of Northern technology for ambitious schemes designed to make money the latest giant dam oil refinery logging process or pesticide factory But such aid has frequently been ecologically destructive and its crippling cost has ended up making life immeasurably worse for those it was supposed to help Using examples from Asia Africa the Caribbean Central and South America this book shows there are forms of development that allow people to control their own resources while improving their condition and enhancing their environment The 33 case studies from agriculture fishing and industry were commissioned by the International Institute for Environment and Development from people closely involved in the projects with overviews by Robert Chambers John Michael Kramer Marilyn Carr David Butcher and Yves Cabannes Originally published in 1988

The Literature of Forestry and Agroforestry Peter McDonald, J. P. Lassoie, 1996 Discusses the evolution of forestry and agroforestry and presents the core literature in these fields covering both traditional and emerging areas Topics include changes in forest science in the 20th century the development of agroforestry literature the role of professional societies and the US

Social Science Knowledge and Economic Development Vernon W. Ruttan, 2003 The central premise of this book is that the demand for social science knowledge is derived from the demand for institutional change pref

Making New People James Genova, 2022-11-01 On August 4 1983 Captain Thomas Sankara led a coalition of radical military officers communist activists labor leaders and militant students to overtake the government of the Republic of Upper Volta Almost immediately following the coup s success the small West African country renamed Burkina Faso or Land of the Dignified People gained international attention as it charted a new path toward social economic cultural and political development based on its people s needs rather than external pressures and Cold War politics James E Genova s *Making New People Politics Cinema and Liberation in Burkina Faso 1983 1987* recounts in detail the revolutionary government s rise and fall demonstrating how it embodied the critical transition period in modern African history between the era of decolonization and the dawning of neoliberal capitalism It also uncovers one of the revolution s most enduring and significant aspects its promotion of film as a vehicle for raising the people s consciousness inspiring their efforts at social transformation and articulating a new self generated image of Africa and Africans Foregrounding film and drawing evocative connections between Sankara s political philosophy and Frantz Fanon *Making New People* provides a deeply nuanced explanation for the revolution s lasting influence throughout Africa and the world

Developing The Environment C J Barrow, 2014-09-19 This book presents a comprehensive overview of global environmental problems past present and future examining their roots and implications and suggesting where possible ways in which they might be mitigated or avoided by careful management

Drink the Bitter Root

Gary Geddes, 2012-01-01 *Drink the Bitter Root* is an international story about the ethical and environmental footprint world nations are leaving in Africa in their determined efforts to destabilize and loot the continent. In the spirit of Robert Kaplan and Samantha Power, Gary Geddes sets out in search of justice, healing, and reconciliation. He begins his journey at the International Criminal Court in The Hague, then travels to Rwanda, Uganda, the Democratic Republic of Congo, Ethiopia, and Somaliland, crossing Lake Victoria and the Great Rift Valley where human life began. Geddes's quest takes the form of an intimate personal travelogue. Although he confronts the dark realities of abduction, rape, mutilation, and murder, drawing on painful encounters, interviews, and adventures that occur along the way, Geddes also brings back amazing stories of survival and unexpected moments of grace. His poet's eye and self-deprecating humor draw us ever more deeply into the lives of some amazing Africans while never forgetting the complicity we all feel in the face of tragic events unfolding there. In the words of author and Africanist Ian Smillie, *Drink the Bitter Root* is not only poignant, literate, and funny, but also a deeply textured journey without maps into the unexplored rifts of sub-Saharan Africa, the human experience, and the psyche. It's also the masterful handling of a full palette.

Modern Science and the Capriciousness of Nature K. Rogers, 2006-10-10 This book questions the way that modern science and technology are considered able to liberate society from the erratic forces of nature. Modern science is implicated in a gamble on a technological society that will replace the natural world with a better one. The author questions the rationality of this gamble and its implications for our lives.

Questioning Technology Andrew Feenberg, 2012-08-21 In this extraordinary introduction to the study of the philosophy of technology, Andrew Feenberg argues that technological design is central to the social and political structure of modern societies. Environmentalism, information technology, and medical advances testify to technology's crucial importance. In his lucid and engaging style, Feenberg shows that technology is the medium of daily life. Every major technical change reverberates at countless levels: economic, political, and cultural. If we continue to see the social and technical domains as being separate, then we are essentially denying an integral part of our existence and our place in a democratic society. *Questioning Technology* convinces us that it is vital that we learn more about technology, the better to live with it and to manage it.

Tropical Freshwater Wetlands H. Roggeri, 2013-03-09 Wetlands could be described as land and water at the same time, and as such are very specific on the brink of ecosystems. Their often rich variety of resources makes them highly valuable to the peoples who live with them. With a few exceptions like the Everglades, most people do not regularly stay in them. However, access to them in the United States, the last remaining large wetlands, is to be found in developing countries. Perhaps this can be difficult and those unaware of their services be explained by insufficient financial resources frequently associate wetlands with such nuisances and calamities as mosquitoes, disease, floods, and lower population density, or a different concept of wetlands, wastelands, etc. As a result, these areas are in development and well-being. Whatever the reasons, often perceived as obstacles to human development, many tropical wetlands still exist and support the well-being and subsistence of many communities. But
