The Politics of Elite Transformation Neovi Karakatsanis, 2001-04-30 Kkarakatsanis analyzes the processes through which a stable consolidated and fully democratic regime was brought into existence in the 1970s and early 1980s in Greece Focusing primarily on the roles played by political elites during and in the decade after the transition to democracy she analyzes how Greece moved from a long history of political instability and elite disunity to a consolidated democratic regime to which all major political actors were loyal and committed Four distinct transformations which forged the consensual unity required to establish a stable and consolidated democratic regime in Greece are rigorously and systematically examined First the modernization of the right from a questionable commitment to democracy before the 1967 dictatorship to a fully democratic stance in the post 1974 period second the moderation of the communist left which went from engaging in anti democratic oppositional tactics for much of its history to loyalty towards the new democratic regime third the moderation of the Panhellenic Socialist Movement which went from a seemingly semi loyal stance in the formative years of the transition to one of full loyalty once in the government and fourth the transformation of the military s attitudes and behavior which led it to retreat from political involvement and to submit itself to civilian control Recognizing that elites do not act within a political vacuum however she also analyzes elite interaction while paying careful attention to the relevant social cultural and international contexts and to the linkages between elites and their respective social and political groups Of particular interest to scholars and other researchers involved with contemporary politics in Southern Europe as well as democratic consolidation elites and political parties

**Between Military Rule and Democracy** Yaprak Gursoy, 2017-07-06 Why do the armed forces sometimes intervene in politics via short lived coups d tat at other times establish or support authoritarian regimes or in some cases come under the democratic control of civilians To find answers Yaprak G rsoy examines four episodes of authoritarianism six periods of democracy and ten short lived coups in Greece and Turkey and then applies her resultant theory to four more recent military interventions in Thailand and Egypt Based on more than 150 interviews with Greek and Turkish elites G rsoy offers a detailed analysis of both countries from the interwar period to recent regime crises She argues that officers politicians and businesspeople prefer democracy authoritarianism or short lived coups depending on the degree of threat they perceive to their interests from each other and the lower classes The power of elites relative to the opposition determined in part by the coalitions they establish with each other affects the success of military interventions and the consolidation of regimes With historical and theoretical depth Between Military Rule and Democracy will interest students of regime change and civil military relations in Greece Turkey Thailand and Egypt as well as in countries facing similar challenges to democratization

Democracy, Intermediation, and Voting on Four Continents Richard Gunther, Hans-Jürgen Puhle, José R. Montero, 2007 This book presents the results of systematic comparative analyses of electoral behavior and support for democracy in 13 countries on four continents It is based on national election surveys held in old and new democracies in Europe Germany Britain Spain Greece Italy Portugal Bulgaria North and South America the United States Chile and Uruguay and Asia Hong Kong between 1990 and 2004 It is methodologically innovative notwithstanding the fact that its core concern with political intermediation i e the flow of political information from parties and candidates to voters through the mass communications media membership in secondary associations and direct face to face contacts within interpersonal networks was first introduced to the study of

electoral behavior by Paul Lazarsfeld and his collaborators in the 1940s In addition to reviving that long neglected analytical framework this book breaks new ground by systematically exploring the impact of socio political values on electoral behavior It also analyzes the role of political intermediation in forming basic attitudes towards democracy which are crucial for the consolidation of new democracies and in turn channeling those orientations into various forms of political behavior Some of the findings presented in this volume are dramatic and clearly reveal that these channels of information are among the most powerful factors influencing the development of political attitudes and partisan electoral behavior So too are socio political values in some countries particularly the United States This volume is the first book length product of the now 18 country Comparative National Elections Project

**Dealing with the Legacy of Authoritarianism** Antonio Costa Pinto,Leonardo Morlino,2013-09-13 In recent years the agenda of how to deal with the past has become a central dimension of the quality of contemporary democracies Many years after the process of authoritarian breakdown consolidated democracies revisit the past either symbolically or to punish the elites associated with the previous authoritarian regimes New factors like international environment conditionality party cleavages memory cycles and commemorations or politics of apologies do sometimes bring the past back into the political arena This book addresses such themes by dealing with two dimensions of authoritarian legacies in Southern European democracies repressive institutions and human rights abuses The thrust of this book is that we should view transitional justice as part of a broader politics of the past an ongoing process in which elites and society under democratic rule revise the meaning of the past in terms of what they hope to achieve in the present This book was published as a special issue of South European Society and Politics

**Greek Democracy and the Junta** Ioannis Tzortzis,2020-01-23 During the dictatorship of the Colonels in Greece there was an attempt at self transformation into some form of civilian rule in 1973 the so called Markezinis experiment named after the politician who assumed the task of heading the transition government and lead to elections It lasted a mere eight weeks faced heavy opposition from both the opposition elites and the civil society and eventually collapsed by a military hard liners coup This book argues that the failure of the Markezinis experiment paved the way for the actual transition of 1974 as it happened Using British and American archival resources as well as unique private archives and personal interviews the book concludes by briefly seeking to trace some potential alternative paths for the failed self transformation attempt and by accounting for the long term consequences of the failure of the Markezinis experiment

**Greece and the Cold War** Alexander Kazamias,2022-08-25 After the proclamation of the Truman Doctrine in 1947 the

United States became deeply involved in Greek affairs By 1952 however the pro Western government of Marshal Papagos began to support the nationalist Enosis movement in Cyprus and called for an end to British colonial rule in the island The opposition of the US Britain and Turkey to these demands brought Greece face to face with its closest allies at the United Nations in 1954 and led to the outbreak of the first major crisis within NATO since its creation Greece and the Cold War examines these developments from the novel perspective of critical international theory and exposes the unexplored connections between dependence and nationalism in Greek foreign policy Drawing on a wide range of American British and Greek archival sources it argues that nationalism and compliance with the collective interests of NATO were two irreconcilable objectives in Greek foreign policy after 1952 At the same time the book tells the story of how the post Civil War governments of Greece for a variety of political cultural and ideological reasons treated these two objectives as essentially compatible resulting in the adoption of a dualist policy This self contradictory diplomatic doctrine which the author refers to as dependent nationalism lies at the heart of Greece s post War failures both to emancipate its politics from US intervention and to peacefully end its regional dispute with Turkey over Cyprus The book deploys an interdisciplinary approach which brings together the diverse perspectives of diplomatic history foreign policy analysis and political sociology

**The dialectics of agency and structure in transitional democracy** Samson Ajagbe, 2015-07-27 Doctoral Thesis Dissertation from the year 2015 in the subject Sociology Politics Majorities Minorities grade 1 8 University of Freiburg Institute of Sociology course Sociology language English abstract This thesis argues that we can no longer ignore elite s enrolment of institutions in rendering what they do intelligible as political outcomes in our understanding of African politics The complex interdependency between elites and institution inheres into politics in ways political practices and actions are fabricated as permissible in the state of affair This interaction is best understood through Actor Network Theory ANT which essentializes hybridization in its conceptualization of the world In this network thinking transitional elites align and advance their interests through translating and enrolling institutions in the process of democratization The analysis draws from Nigeria s democratization experience to bring together the institutional components of the state and leadership i e elites which have been mostly analyzed as separate entities in the study of democratization The actor network theory is used both as a conceptual frame and as a method for analyzing democratization as an outcome of the content of the two main societal forces elite and institution The actor network theory s developed by Michel Callon and Bruno Latour and their collaborators flat ontology provides a way to bypass agency structure dichotomy to inscribe network thinking in relations of democratization in Africa The actor network was originally theorized by Foucault but not nurtured and therefore muted in his governmentality study In this view this thesis builds on the explanatory potentials of network analysis that enable a socio technical account of political transition with all those particularities contradictions and surprising turn of events The old guard autocrats in politics in Nigeria is used as the human element of the network The non human element is operationalized through the institutionalized power sharing norm and political patronage relationships The analysis thus recognizes the interaction between the human elites and the non human institution as actors that define adaptive and emergent characters of democratization
