The Politics Of Environmental Concern:

The Politics of Environmental Concern Walter A. Rosenbaum, 1977 **The Politics of Environmental Concern** Walter A. Rosenbaum, 1977 **The Politics of Environmental Discourse** Maarten A. Hajer, 1995-12-14 Dr Hajer's path breaking study opens the way for a better understanding of the environmental conflict showing how language can be seen to shape our view of what environmental politics is really about and how those perceptions can differ between countries The author identifies the emergence and increasing political importance of ecological modernization as a new concept in the language of environmental politics This concept which has come to replace the antagonistic debates of the 1970s stresses the opportunities of environmental policy for modernizing the economy and stimulating the technological innovation Combining abstract social theory with detailed empirical analysis Martin Hajer illustrates the social and political dynamics of ecological modernization in a detailed analysis of the acid rain controversies in Great Britain and the Netherlands He concludes by reflecting on the institutional challenge of the environmental politics in the years to come **The Politics of Environment, a Profile** Vandana Asthana, 1992 **The Politics of Environmental Policy in Russia** David Lewis Feldman, Ivan Blokov, 2012-01-01 A fresh and up to date discussion of Russia's manifold environmental crises using the results of an elite survey and a framework based on the civil society literature I believe this is the best treatment of its subject that is presently available and given Russia's enormous territorial extent it is a study that has important implications for everyone who has any concern for the future of Planet Earth Stephen White University of Glasgow UK In recent years international inter governmental entities have acknowledged the importance of civil society for engaging stakeholders in environmental change especially at the local community level and in promoting democracy In Russia efforts by NGOs to promote reform since the fall of the Soviet Union have been aimed at achieving both objectives This fascinating and highly illuminating book explores the political legal and attitudinal barriers to environmental reform in Russia since 1991 The authors renowned experts in the field explore efforts to develop a mature civil society in Russia and analyse the policy views of environmental groups the media and the scientific community Three important case studies underpin the study suspended plans to build an oil pipeline near Lake Baikal management of Cold War generated radioactive waste at Chelyabinsk and public reaction to the introduction of genetically modified foods The conclusion is that although civil society groups face obstacles in the form of apathy state imposed constraints on their activities and agency reluctance to confer on decisions there are some successes in reversing decisions due in part to NGO pressures yielding reform This path breaking book will be of enormous interest to scholars researchers and students focusing on comparative environmental policy and politics contemporary public policy in Russia and international politics **Environmental Politics and Policy** Walter A. concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda

The Green Agenda in American Politics Robert J. Duffy, 2003 Organizations such as the Sierra Club and Friends of the Earth are familiar to anyone with an interest in environmental protection As activist groups they played by the same rules for years But in 1994 the rules changed With the Republican takeover of Congress environmental groups faced sweeping changes in federal policies that threatened the enforcement of environmental laws As these organizations intensified their efforts to meet these challenges they also altered their electoral strategies and political spending patterns This book traces those actions and shows what they mean for the future of environmentalism in the political arena While environmental advocacy groups have become bigger and better funded in recent years so have the corporate interests that compete with them for the attention of public and politicians *The Green Agenda in American Politics* offers a new look at environmental advocacy that focuses on contemporary lobbying electioneering and agenda setting in this new context Drawing on interviews with activists from a wide range of organizations Robert Duffy describes what environmental groups actually do when lobbying officials or the public He examines activity at both national and state levels to emphasize their growing use of websites email and action alert networks to conduct more sophisticated grassroots campaigns and he shows how they are devoting more funds to unregulated forms of spending such as independent expenditure issue advocacy advertising and public education campaigns Duffy also tracks emerging trends in interest group politics and provides an overview of activism through the early 1990s He then documents the emergence of more aggressive action after 1994 such as providing campaign services to candidates and mounting voter registration drives He also shows how state and local groups have begun to play more important roles in the wake of the rollback of federal environmental regulations Brimming with new insights into interest group lobbies in general and contemporary environmental groups in particular Duffy s book opens a new window on the influence of Big Money in the supposedly democratic electoral process
