opponents and the public *The Politics of Economic Reform in Germany* Kenneth Dyson, Stephen Padgett, 2014-07-16 This new volume situates current debates about economic reform in Germany in illuminating historical and structural contexts Showing how economic reform has become the central issue on the German political agenda raising contentious issues of policy management and posing deeper questions about political beliefs and identities It also examines the politics of the reform process outlining competing views about the root causes of Germany's economic problems the appropriate policy responses and the distribution of costs It situates the reform process in the wider context of the decline of the German economic model Modell Deutschland and Germany's transition from European pace setter to economic laggard Particular attention is paid to the following key questions What continuities and discontinuities can be seen in Germany's political economy Are globalization and Europeanization associated with a progressive neo liberal ascendancy in economic reform How does economic reform in Germany compare with that in other states notably Britain and France Are there distinctive patterns in the way domestic policymakers negotiate economic reform How do the characteristics of the German labour market and welfare state condition economic reform How much variation exists at the Laender levels This book was previously published as a special issue of German Politics *The Politics of Justice in European Private Law* Hans-W Micklitz, 2018-11-15 The Politics of Justice in European Private Law intends to highlight the differences between the Member States concepts of social justice which have developed historically and the distinct European concept of access justice Contrary to the emerging critique of Europe's justice deficit in the aftermath of the Euro crisis this book argues that beneath the larger picture of the Monetary Union a more positive and more promising European concept of justice is developing European access justice is thinner than national social justice but access justice represents a distinct conception of justice nevertheless Member States or nation states remain free to complement European access justice and bring to bear their own pattern of social justice **Environmental Politics in Japan, Germany, and the United States** Miranda A. Schreurs, 2003-03-13 A decade of climate change negotiations almost ended in failure because of the different policy approaches of the industrialized states Japan Germany and the United States exemplify the deep divisions that exist among states in their approaches to environmental protection Germany is following what could be called the green social welfare state approach to environmental protection which is increasingly guided by what is known as the precautionary principle In contrast the US is increasingly leaning away from the use of environmental regulations towards the use of market based mechanisms to control pollution and cost benefit analysis to determine when environmental protection should take precedence over economic activities Internal political divisions mean that Japan sits uneasily between these two approaches Miranda A Schreurs uses a variety of case studies to explore why these different policy approaches emerged and what their implications are examining the differing ideas actors and institutions in each state *The Red-green Coalition in Germany* Charles Lees, 2000 This text provides a perspective on the politics and personalities of post war Germany's most unstable and

apparently unpredictable national government to date The author uses previously unpublished research into Red Green coalitions in the German Lander in order to understand more clearly the nature of the pressures acting upon Germany's first national coalition between the Social Democrats and the Greens Charles Lees argues that the Red Green coalition is best understood as part of an ongoing process of political co-operation between two distinct and often antagonistic parties Grounded and introduced in the context of recent work on coalition theory and public policy analysis the book examines the trail of political trial and error that has led the two parties from the mutual suspicion of the early 1980s to being partners in national government today Drawing on the political history of Red Green coalitions in Germany the author explains why Chancellor Schroeder's 1998 election triumph provoked such excitement and why his government's subsequent political travails could have been predicted **The Saturday Review of Politics, Literature, Science and Art**, 1861 *European Defence Cooperation in EU Law and IR Theory* T. Dyson, 2013-05-07 This book offers a novel contribution to the study of post Cold War European defence Interdisciplinary in approach it uses European law to assess the utility of existing theoretical accounts By exploring the balance of threat theory it provides new insights into the forces driving and hindering European defence cooperation *The Politics of Green Transformations* Ian Scoones, Melissa Leach, Peter Newell, 2015-01-09 Multiple green transformations are required if humanity is to live sustainably on planet Earth Recalling past transformations this book examines what makes the current challenge different and especially urgent It examines how green transformations must take place in the context of the particular moments of capitalist development and in relation to particular alliances The role of the state is emphasised both in terms of the type of incentives required to make green transformations politically feasible and the way states must take a developmental role in financing innovation and technology for green transformations The book also highlights the role of citizens as innovators entrepreneurs green consumers and members of social movements Green transformations must be both top down involving elite alliances between states and business but also bottom up pushed by grassroots innovators and entrepreneurs and part of wider mobilisations among civil society The chapters in the book draw on international examples to emphasise how contexts matter in shaping pathways to sustainability Written by experts in the field this book will be of great interest to researchers and students in environmental studies international relations political science development studies geography and anthropology as well as policymakers and practitioners concerned with sustainability **How Political Parties Respond** Kay Lawson, Thomas Poguntke, 2004-08-02 How Political Parties Respond focuses specifically on the question of interest aggregation Do parties today perform that function If so how If not in what different ways do they seek to show themselves responsive to the electorate This fascinating book studies these questions with reference to Great Britain France Germany Italy Spain Denmark Norway Sweden and Canada A chapter on Russia demonstrates how newly powerful private interest groups and modern techniques of persuasion can work together to prevent effective party response to popular interests in systems where the authoritarian tradition remains strong **IBSS: Political**

Science: 2004 Vol.52 The British Library of Political and Economic Science, 2004-12 First published in 1952 the International Bibliography of the Social Sciences anthropology economics political science and sociology is well established as a major bibliographic reference for students researchers and librarians in the social sciences worldwide Key features Authority Rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced Articles and books are selected on merit by some of the world's most expert librarians and academics Breadth Today the IBSS covers over 2000 journals more than any other comparable resource The latest monograph publications are also included International Coverage The IBSS reviews scholarship published in over thirty languages including publications from Eastern Europe and the developing world User friendly organization all non English titles are word sections Extensive author subject and place name indexes are provided in both English and French The UK and Multi-level Financial Regulation Scott James, Lucia Quaglia, 2020-02-06 The UK and Multi level Financial Regulation examines the role of the United Kingdom UK in shaping post crisis financial regulatory reform and assesses the implications of the UK's withdrawal from the European Union EU It develops a domestic political economy approach to examine how the interaction of three domestic groups elected officials financial regulators and the financial industry shaped UK preferences strategy and influence in international and EU level regulatory negotiations The framework is applied to five case studies bank capital and liquidity requirements bank recovery and resolution rules bank structural reforms hedge fund regulation and the regulation of over the counter derivatives It concludes by reflecting on the future of UK financial regulation after Brexit The book argues that UK regulators pursued more stringent regulation when they had strong political support to resist financial industry lobbying UK regulators promoted international harmonisation of rules when this protected the competitiveness of industry or enabled cross border externalities to be managed more effectively but were often more resistant to new EU rules when these threatened UK interests Consequently the UK was more successful at shaping international standards by leveraging its market power regulatory capacity and alliance building with the US But it often met with greater political resistance at the EU level forcing it to use legal challenges to block reform or secure exemptions The book concludes that political and regulatory pressure was pivotal in defining the UK's hard Brexit position and so the future UK EU relationship in finance will most likely be based on a framework of regulatory equivalence *Law and Justice on the Small Screen* Peter Robson, Jessica Silbey, 2012-08-01 Law and Justice on the Small Screen is a wide ranging collection of essays about law in and on television In light of the book's innovative taxonomy of the field and its international reach it will make a novel contribution to the scholarly literature about law and popular culture Television shows from France Canada the United Kingdom Germany Spain and the United States are discussed The essays are organised into three sections 1 methodological questions regarding the analysis of law and popular culture on television 2 a focus on genre studies within television programming including a subsection on reality television and 3 content analysis of individual television shows with attention to big picture jurisprudential questions of law's efficacy
