The Politics Of Self Sufficiency:

The Politics of Self-sufficiency Michael Allaby, Peter Bunyard, 1980 *The political economy of food self sufficiency policies and food security in African countries* Bouët, Antoine, Traoré, Fousseini, Mamboundou, Pierre, Diop, Insa, Sy, Abdourahmane, 2025-02-21 Food security deteriorated in Africa during the past decade and the number of undernourished people has been increasing since 2010 The prevalence of undernourishment is now above pre pandemic levels at 9.7% compared with 7.2% in 2019 and Africa reports the highest level in the world External factors such as the Russia Ukraine conflict have contributed to this increase Projections show that almost 600 million people in Africa will be chronically undernourished in 2030 Moreover Africa is not on track for SDG2 eradicate hunger by 2030 To achieve food security and reduce the number of undernourished people many policymakers are advocating for food self sufficiency Relying on local production and promoting it through various policy measures including restrictive trade policies appears to many to be a natural solution Yet there has been a long standing debate among analysts as to whether trade restrictions are a good strategy especially in Africa to achieve food security The proponents of food self sufficiency argue that trade liberalization increases food dependency and import bills and makes consumers vulnerable to external shocks in food availability as well as exposing them to unhealthy foods They advocate for stimulating local production with subsidies and trade restrictions For the opponents opening borders to international trade is a guarantee of cheap and easy access to diversified food products Furthermore by partially decoupling local markets from domestic shocks trade can also help stabilize domestic food markets This report contributes to that debate Using both qualitative and quantitative analysis we reach the conclusion that food self sufficiency is neither a necessary nor a sufficient condition for food security Food security is a multidimensional concept and only two dimensions availability and utilization seem to be affected by food self sufficiency in Africa Also while public support to agriculture can help achieve food self sufficiency its impact is not linear and beyond a certain threshold diminishing returns are observed Overall different approaches can achieve food security and there is no one size fits all strategy International or regional trade can contribute to food security and stabilize domestic food markets as regional production is usually less volatile than domestic supply **The Politics of Philosophy** Michael Davis, 2000-01-01 In the most original interpretation of Aristotle's Politics in years Michael Davis delivers many memorable and provocative formulations of Aristotle's messages concerning the constitutive tensions of political life He traces the uncanny parallel between politics and philosophy in Aristotle arguing that their connection is much deeper than it is ordinarily understood to be and that for Aristotle understanding either requires understanding the other Davis presents his interpretation with a striking clarity and accessibility that makes the book a pleasure to read Oresme's Livre de Politiques and the France of Charles V Susan M. Babbitt, 1985 Charles V was a scholarly king who commissioned French versions of ancient Oresme's Nat Sovereignty The Public State The Politics the Livre de Politiques Aristotle Oresme Conclusion Bibliography **Economics and the Public**

Good John Antonio Pascarella, 2022-03-07 What is the nature of economics How does economics relate to politics Readers searching for the Ancient Greeks answers to these questions often turn to Aristotle focusing on small portions of the Politics and Nicomachean Ethics that relate to money making exchange and household management While this approach yields some understanding of economics and politics it fails to account for how Aristotle's theoretical inquiry into these practical matters reflects the character of his political philosophy According to Aristotle the Ethics and Politics together form the philosophy concerning the human things All human things begin with choice an intellectual desire and need for the good Aristotle's care for this desire is the heart of his political philosophy Through a close literal and careful reading of Aristotle's political philosophy readers discover the natural boundaries to economic and political life Simultaneously theoretical and practical Aristotle's political philosophy offers readers a perspective of economics and politics that provides them the experience of the knowledge they need to desire and live within the limit of the good Barriers to Self-sufficiency for Single Female Heads of Families United States. The Politics of Blood Anne-Maree Farrell, 2012-05-24 How best to manage risk involving multi valued human biological materials is the overarching theme of this book which draws on the sourcing and supply of blood as a case study Blood has ethical social scientific and commercial value This multi valuing process presents challenges in terms of managing risk therefore making it ultimately a matter for political responsibility This is highlighted through an examination of the circumstances that led to HIV blood contamination episodes in the US England and France as well as their consequences The roles of scientific expertise and innovation in managing risks to the blood system are also analysed as is the increased use of precautionary and legal strategies in the post HIV blood contamination era Finally consideration is given to a range of policy and legal strategies that should underpin effective risk governance involving multi valued human biological materials Early Greek Ethics David Wolfsdorf, 2020 Early Greek Ethics is the first volume devoted to philosophical ethics in its formative period It explores contributions from the Presocratics figures of the early Pythagorean tradition sophists and anonymous texts as well as topics influential to ethical philosophical thought such as Greek medicine music friendship and justice

The Political Economy of Managed Migration Georg Menz, 2008-12-18 European governments have re discovered labour migration but are eager to be perceived as controlling unsolicited forms of migration especially through asylum and family reunion The emerging paradigm of managed migration combines the construction of more permissive channels for desirable and actively recruited labour migrants with ever more restrictive approaches towards asylum seekers Non state actors especially employer organizations trade unions and humanitarian non governmental organisations attempt to shape regulatory measures but their success varies depending on organizational characteristics Labour market interest associations lobbying strategies regarding quantities and skill profile of labour migrants will be influenced by the respective system of political economy they are embedded in Trade unions are generally supportive of well

managed labour recruitment strategies But migration policy making also proceeds at the European Union EU level While national actors seek to upload their national model as a blueprint for future EU policy to avoid costly adaptation top down Europeanization is re casting national regulation in important ways notwithstanding highly divergent national regulatory philosophies Based on field work in and analysis of primary documents from six European countries France Italy United Kingdom Ireland Germany and Poland this book makes an important contribution to the study of a rapidly Europeanized policy domain Combining insights from the literature on comparative political economy Europeanization and migration studies the book makes important contributions to all three while demonstrating how migration policy can be fruitfully studied by employing tools from mainstream political science rather than treating it as a distinct subfield **The Political Economy of U.S. Militarism** I. Hossein-zadeh,2006-08-05 This wide ranging interdisciplinary analysis blends history economics and politics to challenge the prevailing accounts of the rise of U S militarism While acknowledging the contributory role of some of the most widely cited culprits this study explores the bigger but largely submerged picture the political economy of war and militarism The Blackwell Guide to Aristotle's Nicomachean Ethics Richard Kraut,2008-04-15 The Blackwell Guide to Aristotle s Nicomachean Ethicsilluminates Aristotle s ethics for both academics andstudents new to the work with sixteen newly commissioned essays bydistinguished international scholars The structure of the book mirrors the organization of theNichomachean Ethics itself Discusses the human good the general nature of virtue thedistinctive characteristics of particular virtues voluntariness self control and pleasure **The Politics of Democratic Inclusion** Christina Wolbrecht,Rodney E. Hero,2005 How institutions foster and hinder political participation of the underrepresented **'Turquerie' and the Politics of Representation, 1728-1876** Nebahat Avcioglu,2011 Devoted explicitly to the examination of Ottoman Turkish inspired architecture in Western Europe during the eighteenth and nineteenth centuries in this study Nebahat Avcioglu rethinks the question of cultural frontiers not as separations but as a rapport of heterogeneities Reclaiming turquerie as cross cultural art from the confines of the inconsequential exoticism it is often reduced to Avcioglu analyses hitherto neglected constructions and links them to notions of self representation and politics *The Political Economy of Northern Regional Development: Introduction to the Project and The First Volume of The Political Economy of Northern Regional Development (POENOR)* Gorm Winther,2010 Nordic co operation is one of the world s most extensive forms of regional collaboration involv ing Denmark Finland Iceland Norway Sweden and three autonomous areas the Faroe Islands Greenland and land The Oxford Handbook of Aristotle Christopher Shields,2012-06-27 The Oxford Handbook of Aristotle reflects the lively international character of Aristotelian studies drawing contributors from the United Kingdom the United States Germany France Switzerland Italy Canada and Japan it also appropriately includes a preponderance of authors from the University of Oxford which has been a center of Aristotelian studies for many centuries The volume equally reflects the broad range of activity Aristotelian studies comprise today such activity ranges from the primarily textual and

philological to the application of broadly Aristotelian themes to contemporary problems irrespective of their narrow textual fidelity In between these extremes one finds the core of Aristotelian scholarship as it is practiced today and as it is primarily represented in this Handbook textual exegesis and criticism Even within this more limited core activity one witnesses a rich range of pursuits with some scholars seeking primarily to understand Aristotle in his own philosophical milieu and others seeking rather to place him into direct conversation with contemporary philosophers and their present day concerns No one of these enterprises exhausts the field On the contrary one of the most welcome and enlivening features of the contemporary Aristotelian scene is precisely the cross fertilization these mutually beneficial and complementary activities offer one another The volume prefaced with an introduction to Aristotle s life and works by the editor covers the main areas of Aristotelian philosophy and intellectual enquiry ethics metaphysics politics logic language psychology rhetoric poetics theology physical and biological investigation and philosophical method It also and distinctively looks both backwards and forwards two chapters recount Aristotle s treatment of earlier philosophers who proved formative to his own orientations and methods and another three chapters chart the long afterlife of Aristotle s philosophy in Late Antiquity in the Islamic World and in the Latin West
