it is organised in seven sections Environmental thought past and present Valuing the environment Knowledges and knowing Political economy of environmental change Environmental technologies Redesigning natures Institutions and policies for influencing the environment Key themes include locations where the environment society relation is most acute where for example there are few natural resources or where industrialization is unregulated the discussion of these issues at different scales local regional national and global the cost of damage to resources and the relation between principal actors in the environment society nexus Aimed at an international audience of academics research students researchers practitioners and policy makers The SAGE Handbook of Environment and Society presents readers in social science and natural science with a manual of the past present and future of environment society links Monthly Catalog of United States Government Publications ,1991 **Selected U.S. Government Publications** ,1972 **International Capital Flows and the Lucas Paradox** Muhammad Akhtaruzzaman,2019-06-21 This book offers a comprehensive analysis of the debates on international capital flows and presents a new evidence based answer to the long standing question of why capital doesn't tend to flow from rich to poor countries as predicted by standard neoclassical theory a puzzle known as the Lucas paradox Further the book reviews alternative approaches to conventional estimates of the marginal product of capital MPK and considers whether these estimates actually help us understand observed international capital flows A rigorous quantitative approach is subsequently used to provide clear empirical evidence on the determinants of capital flows across borders The findings of this empirical analysis suggest that generous economic policies on capital account convertibility are more influential than differences in institutional quality in terms of determining international capital flows In closing the relative importance of various types of political risk e.g expropriation and corruption is examined After determining that expropriation risk has one of the greatest effects on foreign direct investment FDI the book proposes an appealingly intuitive explanation for the lack of FDI flows to many capital scarce developing countries *Cumulated Index Medicus* ,1980 **Conflict and Cooperation in the South Caucasus Region** Houman A.
