The Popularization Of Images Visual Culture Under The July Monarchy:

The Popularization of Images Petra ten-Doesschate Chu, Gabriel P. Weisberg, 1994 The portentous eighteen year period 1830 1848 in the history of French revolutions known as the July Monarchy was circumscribed by the rule of Louis Philippe d Orleans and was characterized by the political and social ascendancy of the bourgeoisie Accompanying this brief and transitional stage was a phenomenal increase in printed media especially in all forms of culture with a visual component These nine essays gathered from social historians and art historians address the formation and consequences of the emergence of a popular culture They significantly reframe the mental picture of the July Monarchy calling into account traditional ideas of social order during this formative period of demographic change While the expanded availability of images and words together with an elevated literacy rate enhanced political awareness among lower classes the rule of Louis Philippe inaugurated hegemonic social agendas This was the period that saw the rise of class consciousness the concept of dangerous classes police surveillance and the identification of criminal types The pandemic medium of caricature was at once a vehicle for critiquing government and social mores and an effective tool for determining and controlling class distinctions In addition to the editors the contributors are Albert Boime James Cuno Michael Paul Driskel Michael Marrinan Elizabeth K Menon Kim Munholland and David Van Zanten

The Satiric Decade Amy Wiese Forbes, 2010-01-01 The Satiric Decade analyzes the impact on republicanism of French political satire in newspapers theaters street behavior and even the academy in the 1830s Author Amy Wiese Forbes argues that satire gave rise to the critical spirit and republicanism that erupted in the 1848 Revolution and that propelled the process by which France evolved from an absolutist monarchy to a liberal and democratic polity in the 1870s

Balzac, Grandville, and the Rise of Book Illustration Keri Yousif, 2016-04-15 Examining how the rise of book illustration affected the historic hegemony of the word Keri Yousif explores the complex literary and artistic relationship between the novelist Honor de Balzac and the illustrator J J Grandville during the French July Monarchy 1830 1848 Both collaborators and rivals these towering figures struggled for dominance in the Parisian book trade at the height of the Romantic revolution and its immediate aftermath Both men were social portraitists who collaborated on the influential encyclopedic portrayal of nineteenth century society *Les Français peints par eux-mêmes* However their collaboration soon turned competitive with Grandville's publication of *Scènes de la vie privée et publique des animaux* a visual parody of Balzac's *Scènes de la vie privée* Yousif investigates Balzac's and Grandville's individual and joint artistic productions in terms of the larger economic and aesthetic struggles within the nineteenth century arena of cultural production showing how writers were forced to position themselves both in terms of the established literary hierarchy and in relation to the rapidly advancing image As Yousif shows the industrialization of the illustrated book spawned a triadic relationship between publisher writer and illustrator that transformed the book from a product of individual genius to a cooperative and commercial affair Her study represents a significant contribution to our understanding of literature art and their interactions

in a new marketplace for publication during the fraught transition from Romanticism to Realism **Press, Revolution, and Social Identities in France, 1830-1835** Jeremy D. Popkin, 2010-11-01 In this innovative study of the press during the French Revolutionary crisis of the early 1830s Jeremy Popkin shows that newspapers played a crucial role in defining a new repertoire of identities for workers women and members of the middle classes that redefined Europe's public sphere Nowhere was this process more visible than in Lyon the great manufacturing center where the aftershocks of the July Revolution of 1830 were strongest In July 1830 Lyon's population had rallied around its liberal newspaper and opposed the conservative Restoration government In less than two years however Lyon's press and its public opinion like those of the country as a whole had become irrevocably fragmented Popkin shows how the structure of the journalistic field in liberal society multiplied political conflicts and produced new tensions between the domains of politics and culture New periodicals appeared claiming to speak for workers for women and for the local interests of Lyon The public was becoming inherently plural with the emergence of new imagined communities that would dominate French public life well into the twentieth century Jeremy Popkin is well known for his earlier studies of journalism during the eighteenth century and the French Revolution In *Press Revolution and Social Identities in France* he not only moves forward in time but also offers a new model for a cultural history of journalism and its relationship to literature **"Visions of the Industrial Age, 1830?914 "** Amy Woodson-Boulton, 2017-07-05 Providing a comprehensive interdisciplinary assessment and with a particular focus on expressions of tension and anxiety about modernity this collection examines visual culture in nineteenth century Europe as it attempted to redefine itself in the face of social change and new technologies Contributing scholars from the fields of history art literature and the history of science investigate the role of visual representation and the dominance of the image by looking at changing ideas expressed in representations of science technology politics and culture in advertising art periodicals and novels They investigate how during the period new emphasis was placed on the visual with emerging forms of mass communication photography lithography newspapers advertising and cinema while older forms as varied as poetry the novel painting interior decoration and architecture became transformed The volume includes investigations into new innovations and scientific development such as the steam engine transportation and engineering the microscope spirit photography and the orrery as well as how this new technology is reproduced in illustrated periodicals The essays also look at more traditional forms of creative expression to show that the same concerns and anxieties about science technology and the changing perceptions of the natural world can be seen in the art of Armand Guillaumin Auguste Rodin Gustave Caillebotte and Camille Pissarro in colonial nineteenth century novels in design manuals in museums and in the decorations of domestic interior spaces *Visions of the Industrial Age 1830 1914* offers a thorough exploration of both the nature of modernity and the nature of the visual *Art History and Its Institutions* Elizabeth Mansfield, 2002 What is art history The answer depends on who asks the question Museum staff academics art critics collectors dealers and artists themselves all

stake competing claims to the aims methods and history of art history Dependent on and sustained by different and often competing institutions art history remains a multi faceted field of study Art History and Its Institutions focuses on the professional and institutional formation of art history showing how the discourses that shaped its creation continue to define the field today Grouped into three sections articles examine the sites where art history is taught and studied the role of institutions in conferring legitimacy the relationship between modernism and art history and the systems that define and control it From museums and universities to law courts and photography studios the contributors explore a range of different institutions revealing the complexity of their interaction and their impact on the discipline of art history BOOK JACKET

Lindsay,2012 This book sheds new light on the interplay of the funerary arts tomb cult and the mentalities that shaped them in France over a period famous for profound and often violent change Using previously untouched archival sources and period published material this study proposes new and vital contexts for nineteenth century France s celebrated funerary projects often profoundly reinterpreting them and brings to light significant enterprises that are little known today *Funerary Arts and Tomb Cult* SuzanneGlover Lindsay,2017-07-05

Even before the upheaval of the Revolution France sought a new formal language for a regenerated nation Nowhere is this clearer than in its tombs some among its most famous modern sculpture rarely discussed as funerary projects Unlike other art historical studies of tombs this one frames sculptural examples within the full spectrum of the material funerary arts of the period along with architecture and landscape This book further widens the standard scope to shed new and needed light on the interplay of the funerary arts tomb cult and the mentalities that shaped them in France over a period famous for profound and often violent change Suzanne Glover Lindsay also brings the abundant recent work on the body to the funerary arts and tomb cult for the first time confronting cultural and aesthetic issues through her examination of a celebrated sculptural type the recumbent effigy of the deceased in death Using many unfamiliar period sources this study reinterprets several famous tombs and funerals and introduces significant enterprises that are little known today to suggest the prominent place held by tomb cult in nineteenth century France Images of the tombs complement the text to underline sculpture s unique formal power in funerary mode *The Rise of Heritage* Astrid Swenson,2013-12-19

Where does our fascination for heritage originate This groundbreaking comparative study of preservation in France Germany and England looks beyond national borders to reveal how the idea of heritage emerged from intense competition and collaboration in a

global context Astrid Swenson follows the heritage makers from the French Revolution to the First World War revealing the importance of global networks driving developments in each country Drawing on documentary literary and visual sources the book connects high politics and daily life and uncovers how through travel correspondence world fairs and international congresses the preservationists exchanged ideas helped each other campaign and dreamed of establishing international institutions for the protection of heritage Yet these heritage makers were also animated by fierce rivalry as international tension grew This mixture of international collaboration and competition created the European culture of heritage which defined preservation as integral to modernity and still shapes current institutions and debates **Reinterpreting**

Revolution in Twentieth-Century Europe Moira Donald, Tim Rees, 2017-03-14 Until the dramatic fall of Communist regimes in the East placed the possibility of revolution on the agenda once again sudden and decisive political change had appeared a largely anachronistic phenomenon in Europe Looking back over the twentieth century it is plausible to argue that the twentieth rather than the nineteenth has been the most revolutionary of centuries In this volume leading specialists from a variety of disciplines examine the changing and conflicting meanings of revolution in modern and contemporary Europe Contributions include both broad essays on the global and historical context of European revolution and specific case studies reinterpreting a variety of revolutionary experiences **Bodies of Sound** Susan C. Cook, 2016-04-08 From the ragtime one

step of the early twentieth century to the contemporary practices of youth club cultures popular dance and music are inextricably linked This collection reveals the intimate connections between the corporeal and the sonic in the creation transmission and reception of popular dance and music which is imagined here as bodies of sound The volume provokes a wide ranging interdisciplinary conversation that includes scholarship from Asia Europe and the United States which explores topics from the nineteenth century through to the present day and engages with practices at local national and transnational levels In Part I Constructing the Popular the authors explore how categories of popular music and dance are constructed and de stabilized and their proclivity to appropriate and re imagine cultural forms and meanings In Part II Authenticity Revival and Reinvention the authors examine how popular forms produce and manipulate identities and meanings through their attraction to and departure from cultural traditions In Part III Re Framing Value the authors interrogate how values are inscribed silenced rearticulated and capitalized through popular music and dance And in Part IV Politics of the Popular the authors read the popular as a site of political negotiation and transformation **Loss in French Romantic Art,**

Literature, and Politics Jonathan P. Ribner, 2021-09-30 An interdisciplinary examination of nineteenth century French art pertaining to religion exile and the nation s demise as a world power this study concerns the consequences for visual culture of a series of national crises from the assault on Catholicism and the flight of migrants during the Revolution of 1789 to the collapse of the Empire and the dashing of hope raised by the Revolution of 1830 The central claim is that imaginative response to these politically charged experiences of loss constitutes a major shaping force in French Romantic art and that

pursuit of this theme in light of parallel developments in literature and political debate reveals a pattern of disenchantment transmuted into cultural capital Focusing on imagery that spoke to loss through visual and verbal idioms particular to France in the aftermath of the Revolution and Empire the book illuminates canonical works by major figures such as Eugène Delacroix Théodore Chassériau and Camille Corot as well as long forgotten images freighted with significance for nineteenth century viewers A study in national bereavement an urgent theme in the present moment the book provides a new lens through which to view the coincidence of imagination and strife at the heart of French Romanticism The book will be of interest to scholars working in art history French literature French history French politics and religious studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Nina L. Breen, 2017-07-05 Before Modernism narrative painting was one of the most acclaimed and challenging modes of picture making in Western art yet by the early twentieth century storytelling had all but disappeared from ambitious art France was a key player in both the dramatic rise and the controversial demise of narrative art This is the first book to analyse French painting in relation to narrative from Poussin in the early seventeenth to Gauguin in the late nineteenth century Thirteen original essays shed light on key moments and aspects of narrative and French painting through the study of artists such as Nicolas Poussin Charles Le Brun Jacques Louis David Paul Delaroche Gustave Moreau and Paul Gauguin Using a range of theoretical perspectives the authors study key issues such as temporality theatricality word and image relations the narrative function of inanimate objects the role played by viewers and the ways in which visual narrative has been bound up with history painting The book offers a fresh look at familiar material as well as studying some little known works of art and reveals the centrality and complexity of narrative in French painting over the course of three centuries

Algeria Martin Evans, John Phillips, 2008-01-14 After liberating itself from French colonial rule in one of the twentieth

century's most brutal wars of independence Algeria became a standard bearer for the non-aligned movement. By the 1990s however its revolutionary political model had collapsed degenerating into a savage conflict between the military and Islamist guerillas that killed some 200 000 citizens. In this lucid and gripping account Martin Evans and John Phillips explore Algeria's recent and very bloody history demonstrating how the high hopes of independence turned into anger as young Algerians grew increasingly alienated. Unemployed frustrated by the corrupt military regime and excluded by the West the post independence generation needed new heroes and some found them in Osama bin Laden and the rising Islamist movement. Evans and Phillips trace the complex roots of this alienation arguing that Algeria's predicament political instability pressing economic and social problems bad governance a disenfranchised youth is emblematic of an arc of insecurity stretching from Morocco to Indonesia. Looking back at the pre colonial and colonial periods they place Algeria's complex present into historical context demonstrating how successive governments have manipulated the past for their own ends. The result is a fractured society with a complicated and bitter relationship with the Western powers and an increasing tendency to export terrorism to France America and beyond.
