to wonder why I am writing a philosophical book when basically I write books on parenting healing natural cures and psychological books That is because I have been writing The Science of Living Books for many years and have written about the power of faith to heal and the miracle of life itself and so having come across a number of little miracles during one s day to day life one wonders why we do not count our blessings and give thanks in prayer more often Many people in the 21st century who have been brought up with the attitude that faith prayer belief in religion are old fashioned you may not know it but this attitude is getting more and more prevalent with the younger generation today with the coming of materialism which is taking over the power of spirituality to influence a youngster for good or evil may say not another book on pray it is good for you a preachy book This book is definitely not like that It has nothing to do with religion It has nothing to do with your personal beliefs and the way in which you communicate with the higher power whoever you follow and believe in That is none of my concern I could not care less about your religion I am talking about the joy of learning how to get in touch spiritually with some good power out there in the universe bringing harmony to body mind heart spirit and soul People have been trying to do that for millenniums Those who could not understand the concept decided that they had better think of something in the form of visible rituals and worship of visible manifestations of the higher spirit And that was more than 15 000 years ago when natural phenomena which were not understood by humans who had just begun to use their brain for thinking started to think that appeasement of a more powerful spirit would be better all around for their well being physical mental spiritual and later on emotional and psychological And so the concept of prayer started We 15 millenniums later are doing the same thing naturally instinctively and for thousands of years we have held some beliefs tenets commands commandments rules traditions of proper behavior to restrict or more uncivilized natures and keep them under control That is how society has been kept under control for millenniums all over the world *The Make It Happen Journey* Gary J.
