that will allow for healing and growth      *Creation and Emotion in the Old Testament* David A. Bosworth,2023-10-10

Creation conjures emotion and thereby shapes how we think and act People fear snakes and enclosed spaces and delight in well watered landscapes Language about nature evokes these emotional meanings and their consequences We may construe nature as a mother to enhance love of creation and motivate care for our common home Mother nature becomes a caregiving source of life rather than an inert resource Alternatively we may focus on the dangers or uselessness of a swamp so that we may drain it and plant crops Creation and the ways we speak about it reflect and shape emotion and influence behavior Every reference to the natural world in biblical literature involves some emotional resonance Any animal might have intruded into the paradise of Eden but the biblical narrative gives this role to a snake The serpent elicits ominous foreboding because snakes evoke fear and fascination Isaiah amplifies the joy of Israel's restoration by depicting deserts transforming into fertile fields and creation itself rejoicing Biblical authors draw on human emotional responsiveness to creation to express and elicit emotions David A Bosworth analyzes how biblical texts use creation to conjure emotion He draws on the science of emotion including research on human emotional responsiveness to nature Ancient texts correlate with contemporary research on how human environments shape emotion and behavior The chapters unfold how specific emotions emerge from biblical references to aspects of creation      Trauma, Culture, and Metaphor John P. Wilson,Jacob D. Lindy,2013-08-15

Pawelski,D. J. Moores,2013 In much of the critical discourse of the seventies eighties and nineties scholars employed suspicion in order to reveal a given text s complicity with various undesirable ideologies and or psychopathologies Construed as such interpretive practice was often intended to demystify texts and authors by demonstrating in them the presence of false consciousness bourgeois values patriarchy orientalism heterosexism imperialist attitudes and or various neuroses complexes and lacks While it proved to be of vital importance in literary studies suspicious hermeneutics often compelled scholars to interpret eudaimonia or well being variously conceived in pathologized terms At the end of the twentieth century however literary scholars began to see the limitations of suspicion conceived primarily as the discernment of latent realities beneath manifest illusions In the last decade often termed the post theory era there was a radical shift in focus as scholars began to recognize the inapplicability of suspicion as a critical framework for discussions of eudaimonic experiences seeking out several alternative forms of critique most of which can be called despite their differences a hermeneutics of affirmation In such alternative reading strategies scholars were able to explore configurations of eudaimonia not by dismissing them as bad politics or psychopathology but in complex ways that have resulted in a new eudaimonic turn a trans disciplinary phenomenon that has also enriched several other disciplines The Eudaimonic Turn builds on such work offering a collection

of essays intended to bolster the burgeoning critical framework in the fields of English Comparative Literature and Cultural Studies by stimulating discussions of well being in the post theory moment The volume consists of several examinations of literary and theoretical configurations of the following determinants of human subjectivity and the role these play in facilitating well being values race ethics morality aesthetics class ideology culture economics language gender spirituality sexuality nature and the body Many of the authors compellingly refute negativity bias and pathologized interpretations of eudaimonic experiences or conceptual models as they appear in literary texts or critical theories Some authors examine the eudaimonic outcomes of suffering marginalization hybridity oppression and or tragedy while others analyze the positive effects of positive affect Still others analyze the aesthetic response and or the reading process in inquiries into the role of language use and its impact on well being or they explore the complexities of strength resilience and other positive character traits in the face of struggle suffering and othering
