**The Poverty of Communism** Nicholas Eberstadt, Nick Eberstadt, 1988-01 One third of the world's population today lives under governments that consider themselves to be Marxist Leninist. In many of these places severe poverty was endemic in the years before Communist authorities came to power. Communist governments claim to have a special understanding into and effectiveness in dealing with problems of poverty. Marxist Leninist rulers have been in power for nearly thirty years in Cuba, nearly forty years in China, and over sixty five years in the Soviet Union. How do the poor fare in such places today? Western intellectuals often assume there is an inevitable tradeoff between bread and freedom under communism. What populations lose in the way of civil and political rights they gain in social guarantees that protect them against material hardship. In *The Poverty of Communism* Nick Eberstadt challenges this assumption and shatters it. He shows that Communist governments in a wide variety of settings have been no more successful in attending to the material needs of the most vulnerable segments of the populations they govern than non Communist governments against which they might most readily be compared. Indeed, measured by the health literacy and nutrition of their people, Communist governments may today be less effective in dealing with poverty than are non Communist governments. *The Poverty of Communism* is a pathbreaking investigation. In a series of separate studies Eberstadt analyzes the performance of Communist governments in the Soviet Union, Eastern Europe, China, and Cuba. This is the first scholarly effort to assess the record of Communist governments with respect to poverty in a detailed and comprehensive fashion. Well written, carefully argued, and reflecting a sweeping range of knowledge, *The Poverty of Communism* will be of interest to specialists in the countries investigated as well as those concerned with comparative economic and political development. Above all, it gives testimony to the plight of voiceless populations about which all too little has been written from an objective standpoint. *The Poverty of Communism* Nicholas Eberstadt, Nick Eberstadt, 1988-01-01 One third of the world's population today lives under governments that consider themselves to be Marxist Leninist. *The SAGE Encyclopedia of World Poverty* Mehmet Odekon, 2015-06-15 The SAGE Encyclopedia of World Poverty Second Edition addresses the persistence of poverty across the globe while updating and expanding the landmark work Encyclopedia of World Poverty originally published in 2006 prior to the economic calamities of 2008 For instance while continued high rates of income inequality might be unsurprising in developing countries such as Mexico the Organization of Economic Co operation and Development OECD reported in May 2013 even countries with historically low levels of income inequality have experienced significant increases over the past decade including Denmark Sweden and Germany The U N and the World Bank also emphasize the persistent nature of the problem It is not all bad news In March 2013 the Guardian newspaper reported Some of the poorest people in the world are becoming significantly less poor according to a groundbreaking academic study which has taken a new approach to measuring deprivation The report by Oxford University s poverty and human development initiative predicts that countries among the most impoverished in the world could see acute poverty eradicated within 20 years if they continue at present rates On the other hand the U N says environmental threats from climate change could push billions more into extreme poverty in coming decades All of these points lead to the need for a revised updated and expanded edition of the Encyclopedia of World Poverty Key Features 775 evaluated and updated and 175 entirely new entries New Reader s Guide categories Signed articles with cross references Further Readings will be accompanied by pedagogical elements Updated Chronology Resource Guide Glossary and thorough new Index The SAGE Encyclopedia of World Poverty Second Edition is a dependable source for students and researchers who are researching world poverty making it a must have reference for all

academic libraries      **The Left's War Against the Poor** John Pepple, 2015-02-09 Leftists have been waging a war against the poor since the 1960s During that decade the left began turning its attention to other causes and in doing so began a war against the poor This war is not an intentional war but it is a war nevertheless It manifests itself in a number of ways by environmentalists who never think about the impact that their policies have on the poor by well meaning people who destroyed the public schools and by people who support criminals over their victims who are almost always poor people Why did this war happen It happened because the left despite its focus on the poor has almost always been controlled by the rich When the left adopted new issues several decades ago these rich people refused to listen to those among the poor who protested But while the left's war against the poor goes back only a few decades the fact that the left has been controlled by the rich ever since the left began means that the left has never really been wholly committed to helping the poor Instead the analyses and policies formulated by rich leftists have helped rich leftists who get to keep their wealth and to control the government more than the poor This book argues that a leftism by and for the poor will be strikingly different from leftism as it now exists While Rich Peoples Leftism blames capitalism for exploiting the workers and wants a redistribution of wealth Poor Peoples Leftism wants job creation The more jobs there are for the poor the less they are exploited It is job creation more than anything else that will help the poor escape from poverty      *Poverty: By Chance or By Choice* Antarjeeta Nayak, Ramakrishna Biswal, 2020-06-08 Why poor are poor Who can cure poverty God or the Government NO POVERTY tops the list of Sustainable Development Goals 2030 Several government and non government organizations are working towards ending poverty for a long time But much of their work and several anti poverty policies have failed over the years because of a skewed understanding of poverty Several theories and approaches social scientists and laureates often miss capturing the intrinsic cause of poverty Ending poverty in all its forms requires an understanding of poverty in all its forms including the nucleus of it Careful attention has to be shown towards the pieces of evidence for making thoughtful assessments on what really impacts the poor and their poverty The authors delve deep into the human psyche to understand why the poor are poor through intriguing case studies *Poverty By Chance or By Choice* is a book that can widen the horizons for a better understanding of the poor and the poverty      *Rethinking Marxism* Jolyon Agar, 2020-08-11 This book presents a final symposium of the program for Rethinking Marxism 2006 comprising a set of commentaries on the categories and critical modes of analysis elaborated in *Transition and Development in India* by Anjan Chakrabarti and Stephen Cullenberg      *The Rich Nations and the Poor Nations* Barbara Ward, 1962 Explains the whys behind the economic situation of various countries      *From Poverty to Plenty; Or, The Labour Question Solved* William Lee Rees, 1888      **Marxism, Revolution and Utopia** Herbert Marcuse, 2014-03-26 This collection assembles some of Herbert Marcuse's most important work and presents for the first time his responses to and development of classic Marxist approaches to revolution and utopia as well as his own theoretical and political perspectives This sixth and final volume of Marcuse's collected papers shows Marcuse's rejection of

the prevailing twentieth century Marxist theory and socialist practice which he saw as inadequate for a thorough critique of Western and Soviet bureaucracy and the development of his revolutionary thought towards a critique of the consumer society Marcuse's later philosophical perspectives on technology ecology and human emancipation sat at odds with many of the classic tenets of Marx's materialist dialectic which placed the working class as the central agent of change in capitalist societies As the material from this volume shows Marcuse was not only a theorist of Marxist thought and practice in the twentieth century but also proves to be an essential thinker for understanding the neoliberal phase of capitalism and resistance in the twenty first century A comprehensive introduction by Douglas Kellner and Clayton Pierce places Marcuse's philosophy in the context of his engagement with the main currents of twentieth century philosophy while also providing important analyses of his anticipatory theorization of capitalist development through a neoliberal restructuring of society The volume concludes with an afterword by Peter Marcuse

**Evolution, Faith and the Future of Catholicism** Robert J. Carr,2005 Described by some as The Priest in the Hood Father Carr serves in inner city parishes and ministers in three languages Here Father Carr describes how the future of Catholicism is rooted in embracing evolution He goes on to describe the failure of the concept of an American Catholic Church Father Carr demonstrates how understanding evolution leads us to profoundly comprehend the teachings of the bible from Genesis to the Epistles This leads us to a Catholicism into the new millenium that brings us back to the teachings from the first Christian century

**Heidegger and Development in the Global South** Siby K. George,2015-03-05 Taking the Heideggerian critical ontology of technology as its base this volume looks at postcolonial modernization and development in the global south as the worldwide expansion of the western metaphysical understanding of reality We live today in an increasingly globalizing

technological society that Martin Heidegger described in the middle of the last century as the planetary imperialism of technologically organized man. Consequent upon this cultural intellectual globalization, the ahistorical, violent, individualistic, calculative, and capitalistic logic of the metaphysics of technology is permeating the life world even of the world's poorest peoples in ways they could neither choose nor control. This volume questions the political ethics and justice of post-war development discourse in the light of the egalitarian aims of modern societies, cultural freedom of communities and nations, and the ecological limits of the planet. The final chapters discuss the alternative proposal of development as various conceptions of good life and equitable human flourishing amidst equally flourishing non-human life and non-living beings. This unique volume is the first book-length treatment of the ontology of modernization and development in the global south from a Heideggerian stance.
