The Power To Fly:

The DelFly G.C.H.E. de Croon, M. Perçin, B.D.W. Remes, R. Ruijsink, C. De Wagter, 2015-11-26 This book introduces the topics most relevant to autonomously flying flapping wing robots flapping wing design aerodynamics and artificial intelligence Readers can explore these topics in the context of the DelFly a flapping wing robot designed at Delft University in The Netherlands How are tiny fruit flies able to lift their weight avoid obstacles and predators and find food or shelter The first step in emulating this is the creation of a micro flapping wing robot that flies by itself The challenges are considerable the design and aerodynamics of flapping wings are still active areas of scientific research whilst artificial intelligence is subject to extreme limitations deriving from the few sensors and minimal processing onboard This book conveys the essential insights that lie behind success such as the DelFly Micro and the DelFly Explorer The DelFly Micro with its 3.07 grams and 10 cm wing span is still the smallest flapping wing MAV in the world carrying a camera whilst the DelFly Explorer is the world's first flapping wing MAV that is able to fly completely autonomously in unknown environments The DelFly project started in 2005 and ever since has served as inspiration not only to many scientific flapping wing studies but also the design of flapping wing toys The combination of introductions to relevant fields practical insights and scientific experiments from the DelFly project make this book a must read for all flapping wing enthusiasts be they students researchers or engineers

International Arbitration and the Permanent Court of Arbitration Manuel Indlekofer, 2013-08-01 The modern tendency to restrict international arbitration to matters of commerce and investment is succumbing to a renewed recognition of the original impetus for dispute resolution by arbitration i.e. matters of public international law most importantly the settlement of disputes that pose a threat of international conflict Recent developments suggest a renaissance of public international arbitration most clearly manifested in the present flourishing of the Permanent Court of Arbitration PCA the oldest existing dispute settlement institution in international law As the calls for the development of new and more appropriate methods for dispute settlement in international law increased during the 1990s the PCA undertook a structural reform and is today a vital forum for dispute settlement with scores of arbitrations currently pending under its auspices This book the most comprehensive study of the institution to date covering its history its present status and its future prospects proves the PCA's contemporary relevance within the international dispute settlement framework Among aspects of the PCA's work covered are the following how public international arbitration functions in comparison to other means available for dispute settlement in international law the PCA's historical contributions to the current dispute settlement framework arbitrations between a state and a non state actor that are in whole or in part governed by public international law the fields in which public international arbitration plays a revived role the PCA's present day institutional framework and its current activities the prospects for public international arbitration and the PCA in the dispute settlement framework of the twenty first century and proposals to increase the PCA's activities in future and to sustain and enhance the institution's ongoing revitalization A very useful Practitioner's Guide provides an overview of the PCA's various services and the best means of accessing them along with a summary of the key provisions of the new PCA Arbitration Rules 2012 For lawyers who are involved in dispute resolution proceedings there can be little doubt about the PCA's relevance This book is at once an academic work indispensable for scholars of the institution and a practical guide that will be a required addition to the libraries of counsel arbitrators and others involved in dispute resolution
