Technology and the Contested Meanings of Sustainability Aidan Davison, 2001-05-16 Argues that sustainability requires more than economic and technological efficiency

**Socioeconomic Inclusion During an Era of Online Education** Garcia, Manuel B., 2022-06-24 The unwelcomed arrival of the COVID 19 pandemic has exacerbated inequities and inequalities in accessing educational opportunities among different social groups Abruptly the idea of inclusivity in education has become more of an abstract phenomenon that widens the digital divide and creates social injustice The resulting intensification of digital disparities demands an immediate coordinated response from all education and government stakeholders to guarantee that no one is left behind as we navigate the so called new normal Without an appropriate intervention and sound policy guidance negative repercussions may be so widespread that they will remain a problem in the education sector far into the future Socioeconomic Inclusion During an Era of Online Education aims to answer emerging questions on inclusive online education by exploring and collating the experiences and lessons learned during the implementation of emergency remote education With the earlier than expected arrival of the online education era best practices and innovative approaches from various educational institutions are concrete paradigms for safeguarding the promise of an undivided future of learning through equal access to quality education from a distance Covering topics from learning space to education governance this reference work is ideal for policymakers administrators practitioners researchers scholars instructors and students seeking to adjust and adapt to technology enabled education during and after the COVID 19 era

**Solar Technology and Global Environmental Justice** Andreas Roos, 2023-02-02 Building on insights from ecological economics and philosophy of technology this book offers a novel interdisciplinary approach to understand the contradictory nature of Solar photovoltaic PV technology Solar photovoltaic PV technology is rapidly emerging as a cost effective option in the world economy However reports about miserable working conditions environmentally deleterious mineral extraction and toxic waste dumps corrode the image of a problem free future based on solar power Against this backdrop Andreas Roos explores whether ecologically unequal exchange an asymmetric transfer of labour time and natural resources is a necessary condition for solar PV development He demonstrates how the massive increase in solar PV installation over recent years would not have been possible without significant wage price differences in the world economy notably between Europe North America and Asia and concludes that solar PV development is currently contingent on environmental injustices in the world economy As a solution Roos argues that solar technology is best coupled with strategies

for degrowth which allow for a transition away from fossil fuels and towards a socially just and ecologically sustainable future This book will be of great interest to students and scholars of solar power philosophy of technology and environmental justice

**Sustainability Beyond Technology** Pasi Heikkurinen,Toni Ruuska,2021 Current debates on sustainability are building on a problematic assumption that technological advancement is a desired phenomenon creating positive change in human organizations This transdisciplinary book develops a new way to conceptualize and examine technology and outlines feasible alternatives for sustainability beyond technology

**Techno-Fixers** Sean F. Johnston,2020-03-26 This is the story of a seductive idea Over the past century the potential of new technology to solve social dilemmas has captivated modern culture From apps that encourage physical activity to airport scanners meant to prevent terrorism the concept that clever innovation can improve society is irresistible but faith in such technological fixes is seldom questioned Where did this idea come from what makes it so appealing and how does it endanger our future Techno Fixers traces the source of modern confidence in technology to engineering hubris radical utopian movements science fiction fanzines policy makers soundbites corporate marketing and optimistic consumer culture from the turn of the twentieth century until today Sean Johnston demonstrates that through the promotion of prominent government scientists technocrats entrepreneurs and popular media modern invention became the favourite tool for addressing human problems and society's ills Nonetheless when it comes to assessing the success of cigarette filters as the solution to safe smoking or DDT as the answer for agricultural productivity the evidence is sobering Cautioning that the rhetoric of technological fixes seldom matches reality Johnston examines how employing innovation to bypass traditional methods can foster as many problems as it solves A critical examination of modern faith in technology Techno Fixers evaluates past mistakes present implications and future opportunities for innovating societies

**Reclaiming Space** James S. J. Schwartz,Linda Billings,Erika Nesvold,2023 Reclaiming Space is an innovative study of space travel's history legitimacy and future The NewSpace movement that presently dominates spaceflight culture is characterized by distinctly Western free market capitalist values and associated with the space ambitions of the super wealthy This book exists to incubate illuminate and illustrate a more diverse and inclusive conversation about space exploration Reclaiming Space asks What would space exploration be like if we prioritized or even simply acknowledged the perspectives and value systems of individuals who are disabled aren't white aren't male or aren't characteristically Western in their values What can these perspectives teach us all about space exploration and its value or even its potential for harm that cannot be easily recognized or appreciated under the NewSpace status quo And what should we be doing differently when it comes to space exploration The twenty seven original essays in this volume provide much needed perspective on space exploration by offering counterpoints to mainstream thinking about space Essays address subjects such as the history and development of spaceflight culture both within and outside the United States the impact of science fiction and space art on how we conceptualize space diverse cultural narratives and responses to space and the ways space exploration might be

leveraged in support of repairing injustices Reclaiming Space also considers what our responsibilities might be as a spacefaring species in the distant future Contributors include academics who research space exploration spaceflight culture space ethics and space policy as well as space artists and authors of award winning science and speculative fiction Written for space enthusiasts of all backgrounds Reclaiming Space is an engaging provocative volume of essays showcasing the perspectives of women persons of color and others who are typically left out of discussions of space exploration

*Ideas, Machines, and Values* Stephen H. Cutcliffe, 2000 Ideas Machines and Values is an introductory overview of the emergence of STS as a field of study as well as a portrait of its current interests and concerns The book examines the growth of STS from its birth in the mid 1960 s through its development as an interdisciplinary field to its present state Also addressed are the questions Why should we study STS and In what direction should STS be headed This work is highly recommended for anyone interested in building a solid foundation for Science Technology and Society Studies

**Ecopoetics and the Global Landscape** Isabel Sobral Campos, 2018-12-27 Ecopoetics and the Global Landscape Critical Essays surveys ecopoetry from a global perspective across different historical epochs Its comparative approach foregrounds the importance of ecopoetics within the context of distinct national literatures and cultures to reveal the ubiquitous intersection of poetry with ecocriticism The collection analyzes environmental problems resulting from the legacies of colonialism and focuses on issues of environmental justice and indigenous issues as well as on the intersection of genocide studies and environmentalism It also examines ecologically informed modes of relating to the world In particular it engages with interactions between the human and nonhuman as well as mind and matter Finally it broadens the scope of place to include both the absent land of exiled peoples and the urban built environment

**Techno-Fix** Michael Huesemann, Joyce Huesemann, 2011-10-04 Nanotechnology Genetic engineering Miracle Drugs We are promised that new technological developments will magically save us from the dire consequences of the 300 year fossil fueled binge known as modern industrial civilization without demanding any fundamental changes in our

behavior There is a pervasive belief that technological innovation will enable us to continue our current lifestyle indefinitely and will prevent social economic and environmental collapse Techno Fix shows that negative unintended consequences of technology are inherently predictable and unavoidable techno optimism is completely unjustified and modern technology in the presence of continued economic growth does not promote sustainability but hastens collapse The authors demonstrate that most technological solutions to social and technology created problems are ineffective They explore the reasons for the uncritical acceptance of new technologies show who really controls the direction of technological change and then advocate extensive reform This comprehensive expos is a powerful argument for why we can and should put the genie back in the bottle An insightful and powerful critique it is required reading for anyone who is concerned about blind techno optimism and believes that the time has come to make science and technology more socially and environmentally responsible For more information please visit [technofix.org](http://technofix.org)

**New Korean Wave** Dal Jin, 2016-03-15 The 2012 smash Gangnam Style by the Seoul based rapper Psy capped the triumph of Hallyu the Korean Wave of music film and other cultural forms that have become a worldwide sensation Dal Yong Jin analyzes the social and technological trends that transformed South Korean entertainment from a mostly regional interest aimed at families into a global powerhouse geared toward tech crazy youth Blending analysis with insights from fans and industry insiders Jin shows how Hallyu exploited a media landscape and dramatically changed with the 2008 emergence of smartphones and social media designating this new Korean Wave as Hallyu 2.0 Hands on government support meanwhile focused on creative industries as a significant part of the economy and turned intellectual property rights into a significant revenue source Jin also delves into less studied forms like animation and online games the significance of social meaning in the development of local Korean popular culture and the political economy of Korean popular culture and digital technologies in a global context
