The Improbability of Othello Joel B. Altman, 2024-05-31 Shakespeare's dramatis personae exist in a world of supposition struggling to connect knowledge that cannot be had judgments that must be made and actions that need to be taken For them probability what they and others might be persuaded to believe governs human affairs not certainty Yet negotiating the space of probability is fraught with difficulty Here Joel B Altman explores the problematics of probability and the psychology of persuasion in Renaissance rhetoric and Shakespeare's theater Focusing on the Tragedy of Othello Altman investigates Shakespeare's representation of the self as a specific realization of tensions pervading the rhetorical culture in which he was educated and practiced his craft In Altman's account Shakespeare also restrains and energizes his audiences probabilizing capacities alternately playing the skeptical critic and dramaturgic trickster A monumental work of scholarship by one of America's most respected scholars of Renaissance literature *The Improbability of Othello* contributes fresh ideas to our understanding of Shakespeare's conception of the self his shaping of audience response and the relationship of actors to his texts

Critique of Political Decolonization Bernard Forjwuor, 2023-05-24 What is political independence As a political act what was it sanctioned to accomplish Is formal colonialism over or a condition in the present albeit mutated and evolved

In Critique of Political Decolonization Bernard Forjuor challenges what in normative scholarship has become a persistent conflation of two different concepts political decolonization and political independence This scholarly volume is an antinormative and critical refutation of the decolonial accomplishment of political independence or self determination in Ghana He argues that political independence is insufficiently a decolonial claim because it is framed within the context of a country where a permanent colonial settlement was never deemed necessary for the consolidation of future colonial political obligations So while territorial dissolution was politically engineered by Ghanaians the colonial merely reconstitutes itself in different legal and ideological forms Forjuor offers new methodological theoretical and conceptual approaches to engaging the questions of colonialism political independence political decolonization justice and freedom and constructs multiple conceptual bridges between traditional disciplinary fields of inquiry including politics history law African studies economic history critical theory and philosophy and political theory Using the Ghanaian experience as a rich case study Forjuor rethinks what colonialism and decolonization mean and asserts that decolonization is primarily a question of justice

Treating Chronic Depression Daniel W. Badal,2003-03-01 Depressive illness often becomes chronic or recurrent and patients may recover only partially Despite all the new and effective drugs at least 25 to 35 percent of patients with clear cut mood disorders do not respond in a satisfactory way even though there can be some relief of symptoms These chronically ill patients can be identified by careful examination and are characterized by what Badal calls a predicament The predicament is caused by a combination of two factors an intolerably painful and troublesome relationship with a significant other and a personality deficit that prevents the patient from solving that relationship problem in an acceptable way When patients do not respond to treatment and their cases become chronic the doctor patient relationship must become a long term therapeutic alliance The personality problems may require intensive psychodynamic treatment Combined treatment i e medication psychosocial intervention psychotherapy and rehabilitation is commonly required for these patients The appropriate use of medication often makes it possible to conduct a successful psychotherapy In identifying the problems causing the basic predicament of these chronic patients and successfully bringing

them back into the mainstream psychotherapists should have access to enough details and general principles of pharmacotherapy to evaluate the progress and the effects of the medication and allow them to communicate intelligently with the person prescribing. Badal addresses five areas of treatment with these cases: The doctor-patient relationship, pharmacological treatment, psychosocial interventions, psychotherapeutic programs, and rehabilitation. He formulates an approach to recognition and treatment of all the various types of these hard-to-treat chronic and refractory mood disorders.

Jason Aronson Book *One Child* John Apley, Christopher Ounsted, 1982-04-22 The Cartesian split of human creatures into psyche and soma has had a profoundly bad influence on the medical care of children. In fact, the concept of psychosomatic disease as a separate, entirely false one, there being no illness that does not in some way affect behaviour and no behaviour which is not in some way mediated by physiological factors. However, the subtleties of our understanding of child illness have gone much further than simply unmasking this false dichotomy. This book will now unveil the parts played by other features of the broader environment: the family, stress, socioeconomic factors, and other predicaments, including that of loving and being loved. To understand the child within these wider terms, the professionals involved in helping the child and the parents must in some way be given a new perspective, a broader view. *One Child* provides this perspective, stepping outside conventional presentations into the more exciting possibilities of reassessing the influences and roles of the disease itself and the environment in which it arises. This represents a challenge and will inevitably cause controversy, which should itself push the perspectives further.

Teaching And Its Predicaments Nicholas Burbules, 2019-05-20 Teaching is a complex and challenging endeavour. Teachers are continually faced with difficult choices in which competing values are set in tension with one another. The interests of all students and of other groups and constituencies can rarely be served at the same time. Different educational goals, each desirable in and of itself, often place

The Handbook of Intergroup Communication Howard Giles, 2012-06-14 The Handbook of Intergroup Communication brings together research, theory, and application on traditional as well as innovative intergroup situations, exploring the communication aspect of these groups. The volume is organized into four domains: cross-disciplinary approaches to intergroup study; types, processes of communication between groups; communication between specific group types and arenas in which intergroup communication takes place. Editor Howard Giles worked with an internationally based advisory board to develop and review content, and the contributors included here represent those scholars doing innovative and well-regarded work around the globe. The intergroup umbrella integrates and transcends many traditional conceptual boundaries in communication, including media, health, intercultural, organizational; hence, the Handbook will appeal to scholars and graduate students not only in the core area of intergroup communication itself but across varying terrains of study in communication and beyond, including intergroup relations and social psychology.

Weak Barbarism Radu Vasile Chialda, 2015-08-14 Barbarism Contemporaneous Axiological Mutations is not meant as a thesis that provides a holistic approach on the concept of barbarism a concept whose area of investigation may be deemed as vast as that of the concept of culture By taking advantage of a hindsight outlook as to what concerns this topic one could learn a great deal of details about the radical alteration of the current depiction of the notion of barbarism Therefore as an incipient undertaking into the overall argumentative process which defines the character of the thesis I shall try to illustrate the idea of an induced misunderstanding at a global level on the concept of barbarism which has led to significant and acute hermeneutical malformations concerning its various aspects of manifestation both socially and culturally and consequently in terms of barbarisms own axiological structure in the range of human behavior
