David,C.S. Weinstein,2013-11-11 As a developmental psychologist with a strong interest in children s re sponse to the physical environment I take particular pleasure in writing a foreword to the present volume It provides impressive evidence of the con cern that workers in environmental psychology and environmental design are displaying for the child as a user of the designed environment and indi cates a recognition of the need to apply theory and findings from develop mental and environmental psychology to the design of environments for children This seems to me to mark a shift in focus and concern from the earlier days of the interaction between environmental designers and psy chologists that occurred some two decades ago and provided the impetus for the establishment of environmental psychology as a subdiscipline Whether because children though they are consumers of designed environments are not the architect s clients or because it seemed easier to work with adults who could be asked to make ratings of environmental spaces and comment on them at length a focus on the child in interaction with en vironments was comparatively slow in developing in the field of environ ment and behavior As the chapters of the present volume indicate that situation is no longer true today and this is a change that all concerned with the well being and optimal functioning of children will welcome *Pivotal Research in Early Literacy* Christina M.
