The Primal Screen A History Of Science Fiction Film:

The Primal Screen John Brosnan, 1995-05-04 *Primal Screen* John Brosnan, 1995-05-04 This text provides a history of the cinema of science fiction It covers silent classics such as Metropolis space adventures of the fifties and the massive successes such as 2001 A Space Odyssey and the popular Star Wars movies of the seventies and eighties Science Fiction Film Directors, 1895-1998 Dennis Fischer, 2011-07-01 This enormous and exhaustive reference book has entries on every major and minor director of science fiction films from the inception of cinema circa 1895 through 1998 For each director there is a complete filmography including television work a career summary a critical assessment and behind the scenes production information Seventy nine directors are covered in especially lengthy entries and a short history of the science fiction film genre is also included Science Fiction Film, Television, and Adaptation Jay Telotte, Gerald Duchovnay, 2011-08-05 While film and television seem to be closely allied screen media our feature films and television series have seldom been successfully adapted across those screens In fact rather than functioning as portals those allied media often seem quite literally screens that filter out something that made the source work so popular in its original form Differences in budget running times cast viewing habits screen size and shape all come into play and this volume's aim is to track a number of popular texts in the course of their adaptive journeys across the screens in order to sketch the workings of that cross media adaptation For its specific examples the volume draws on a single genre science fiction not only because it is one of the most popular today in either film or television but also because it is arguably the most self conscious of contemporary genres and thus one that most obviously frames the terms of these technological adaptations The essays included here mine that reflexive character in both highly successful and in failed efforts at cross media adaption to help us understand what film and television achieve in screening science fiction and to reveal some of the key issues involved in all of our efforts to navigate the various screens that have become part of contemporary culture **It Came From the 1950s!** Darryl Jones, Elizabeth McCarthy, Bernice M. Murphy, 2011-10-04 An eclectic and insightful collection of essays predicated on the hypothesis that popular cultural documents provide unique insights into the concerns anxieties and desires of their times 1950s popular culture is analysed by leading scholars and critics such as Christopher Frayling Mark Jancovich Kim Newman and David J Skal McLuhan's Galaxies: Science Fiction Film Aesthetics in Light of Marshall McLuhan's Thought Artur Skweres, 2019-01-17 This groundbreaking book uses observations made by Marshall McLuhan to analyze the aesthetics of science fiction films treating them as visual metaphors or probes into the new reality dominated by electronic media it considers the relations between the senses and sensuality in Blade Runner the visually tactile character of the film and the status of replicants as humanity's new clothes it analyzes the mixture of Eastern and Western aesthetics in Star Wars analyzing Darth Vader as a combination of the literate and the tribal mindset it discusses the failure of visual society presented in the Terminator and Alien franchises the rekindling of horror vacui tribalism and the desire to obliterate the past

as a result of the simultaneity of the acoustic space finally the book discusses the Matrix trilogy and Avatar as being deeply related in terms of the growing importance of tactility easternization tribalization as well as connectivity and the implosion of human civilization

Cinema Studies: The Key Concepts Susan Hayward, 2006-04-18 Ranging from Bollywood superstar Amitabh Bachchan to Quentin Tarantino and from auteur theory to the Hollywood Blockbuster Cinema Studies The Key Concepts has firmly established itself as the essential guide for anyone interested in film Covering an impressive range of key genres movements theories and production terms this third edition includes a fully updated bibliography and has been revised and expanded to include new topical entries such as female masquerade silent cinema exploitation cinema art direction national cinema political cinema Authoritative yet accessible Cinema Studies The Key Concepts is undoubtedly a must have guide to what is both a fascinating area of study and arguably the greatest art form of modern times

The Gospel According to Star Wars John C. McDowell, 2007-01-01 McDowell explores the many spiritual themes that weave throughout the six films and shows the moral and spiritual complexity of the movies The author contends that George Lucas creator of the series did not intend for his films to be mere entertainment

Writing and Cinema Jonathan Bignell, 2014-07-22 This collection of essays examines the ways in which writing and cinema can be studied in relation to each other A wide range of material is presented from essays which look at particular films including The Piano and The English Patient to discussions of the latest developments in film studies including psychoanalytic film theory and the cultural study of film audiences Specific topics that the essays address also include the kinds of writing produced for the cinema industry advertising film adaptations of written texts and theatre plays from nineteenth century classic novels to recent cyberpunk science fiction such as Blade Runner and Starship Troopers The essays deal with existing areas of debate like questions of authorship and audience and also break new ground for example in proposing approaches to the study of writing on the cinema screen The book includes a select bibliography and a documents section gives details of a range of films for further study

The Oxford Handbook of Science Fiction Rob Latham, 2014 The Oxford Handbook of Science Fiction attempts to descry the historical and cultural contours of SF in the wake of technoculture studies Rather than treating the genre as an isolated aesthetic formation it examines SF's many lines of cross pollination with technocultural realities since its inception in the nineteenth century showing how SF's unique history and subcultural identity has been constructed in ongoing dialogue with popular discourses of science and technology The volume consists of four broadly themed sections each divided into eleven chapters Section I Science Fiction as Genre considers the internal history of SF literature examining its characteristic aesthetic and ideological modalities its animating social and commercial institutions and its relationship to other fantastic genres Section II Science Fiction as Medium presents a more diverse and ramified understanding of what constitutes the field as a mode of artistic and pop cultural expression canvassing extra literary manifestations of SF ranging from film and television to videogames and hypertext to music and theme parks Section III Science Fiction as Culture

examines the genre in relation to cultural issues and contexts that have influenced it and been influenced by it in turn the goal being to see how SF has helped to constitute and define important sub cultural groupings social movements and historical developments during the nineteenth twentieth and twenty first centuries Finally Section IV Science Fiction as Worldview explores SF as a mode of thought and its intersection with other philosophies and large scale perspectives on the world from the Enlightenment to the present day

Constellation Caliban, 2023-12-11 We are now in the Age of Caliban rather than in the Time of Ariel or the Era of Prospero Harold Bloom claimed in 1992 Bloom was specifically referring to Caliban's rising popularity as the prototype of the colonised or repressed subject especially since the 1980s However already earlier the figure of Caliban had inspired artists from the most divergent backgrounds Robert Browning Ernest Renan Aim C saire and Peter Greenaway to name only some of the better known Much has already been published on Caliban and there exist a number of excellent surveys of this character's appearance in literature and the other arts The present collection does not aim to trace Caliban over the ages Rather *Constellation Caliban* intends to look at a number of specific refigurations of Caliban What is the Caliban figure's role and function within a specific work of art What is its relation to the other signifiers in that work of art What interests are invested in the Caliban figure what values does it represent or advocate Whose interests and values are these These and similar questions guided the contributors to the present volume In other words what one finds here is not a study of origins not a genealogy not a reception study but rather a fascinating series of case studies informed by current theoretical debate in areas such as women's studies sociology of literature and of the intellectuals nation formation new historicism etc Its interdisciplinary approach and its attention to matters of multi culturalism make *Constellation Caliban* into an unusually wide ranging and highly original contribution to Shakespeare studies The book should appeal to students of English Literature Modern European Literature Comparative Literature Drama or Theatre Studies and Cultural Studies as well as to anyone interested in looking at literature within a broad social and historical context while still appreciating detailed textual analyses

Religion and Doctor Who Andrew Crome, James F. McGrath, 2013-11-14 Doctor Who has always contained a rich current of religious themes and ideas In its very first episode it asked how humans rationalize the seemingly supernatural as two snooping schoolteachers refused to accept that the TARDIS was real More recently it has toyed with the mystery of Doctor's real name perhaps an echo of ancient religions and rituals in which knowledge of the secret name of a god angel or demon was thought to grant a mortal power over the entity But why does Doctor Who intersect with religion so often and what do such instances tell us about the society that produces the show and the viewers who engage with it The writers of *Religion and Doctor Who* Time and Relative Dimensions in Faith attempt to answer these questions through an in depth analysis of the various treatments of religion throughout every era of the show's history While the majority of chapters focus on the television show Doctor Who the authors also look at audios novels and the response of fandom Their analyses all written in an accessible but academically thorough style reveal that examining

religion in a long running series such as Doctor Who can contribute to a number of key debates within faith communities and religious history Most importantly it provides another way of looking at why Doctor Who continues to inspire to engage and to excite generations of passionate fans whatever their position on faith The contributors are drawn from the UK the USA and Australia and their approaches are similarly diverse Chapters have been written by film scholars and sociologists theologians and historians rhetoricians philosophers and anthropologists Some write from the perspective of a particular faith or belief others write from the perspective of no religious belief All however demonstrate a solid knowledge of and affection for the brilliance of Doctor Who

Neuroscience in Science Fiction Films Sharon Packer, M.D.,2014-11-20 As the gap between science fiction and science fact has narrowed films that were intended as pure fantasy at the time of their premier have taken on deeper meaning This volume explores neuroscience in science fiction films focusing on neuroscience and psychiatry as running themes in SF and finding correlations between turning points in neuroscience fiction and advances in the scientific field The films covered include The Strange Case of Dr Jekyll and Mr Hyde The Island of Dr Moreau Robocop The Stepford Wives The Mind Snatchers and iconic franchises like Terminator Ironman and Planet of the Apes Examining the parallel histories of psychiatry neuroscience and cinema this book shows how science fiction films offer insightful commentary on the scientific and philosophical developments of their times
