Tepoztlán and the Transformation of the Mexican State JoAnn Martin, 2022-09-13 During the 1980s and 90s Mexico weathered an economic crisis witnessed electoral upheaval and saw the dismantling of state subsidies to farmers and the privatization of nationally owned industries This book considers how popular movements found fresh footing in this new political economic landscape as villagers in Tepoztl n fought to keep communal lands out of the hands of outsiders the state and increasingly global capitalists Examining social movement politics from the margins rather than the center JoAnn Martin revisits the famous Redfield Lewis debate on Tepoztl n to argue that the gossip seen by Oscar Lewis as undermining community coherence is really a form of political practice During more than fifteen years of research she observed the metamorphosis of a movement founded as a revolutionary popular struggle into what she terms a politics of loose connections in which temporary alliances flexible identities and shifting rhetoric are adapted to the demands of the moment Martin examines contemporary land struggles with an emphasis on the Comit para la Defensa de Tierra and its attempts to weave together strands of an invented tradition contemporary agrarian reform law and revolutionary ideology She shows how Tepoztecan politics borrows discourses from the Mexican state she then tells how this process shaped local politics in the midst of the contested 1988 national presidential election when local actors elaborated a discourse of democracy as a technique for disciplining gossip and in 1991 when Tepozteicans began to draw on the support of international environmental NGOs Throughout her analysis Martin explores how Tepoztecan politics unfolds in the climate of mistrust first nurtured by the role of the state in local politics and later by the demands of working with U S and Western European environmentalists Martin shows that the politics of loose connections is above all else a style of political participation that has proved adaptive in the contemporary political landscape and that understandings of politics have been dogged by a conception of connections that may well be obsolete in the contemporary world Her study is a balanced re evaluation of Tepoztl n that reveals how politics succeeds through loose connections a strategy that may be instructive for

others seeking to survive in either local or global coalitions

Taking a Stand in a Postfeminist World Frances E. Mascia-Lees, Patricia Sharpe, 2012-02-01 *Taking a Stand in a Postfeminist World* offers an engaged cultural criticism in a postfeminist context At the end of the twentieth century an increasingly globalized world has given rise to a cultural complexity characterized by a rapid increase in competing discourses fragmented subjectivities and irreconcilable claims over cultural representation and who has the right to speak for or about others While feminism has traditionally been a potent site for debates over questions that have arisen out of this context recently it has become so splintered and suspect that its insights are often dismissed as predictable seriously reducing its capacity to offer powerful cultural criticism In this postfeminist context the authors argue for a cultural criticism that is strategic not programmatic and that preserves the multiple commitments ideas and positions required of interactions and identifications across lines of cultural racial and gender difference Selecting sites where such interactions are highlighted and under current scrutiny film consumer culture tourism anthropology and the academy the authors theorize and demonstrate the struggles and maneuvers required to take a stand on a wide range of issues of significance to the contemporary cultural moment

Indian and Nation in Revolutionary Mexico Alexander S. Dawson, 2020-08-04 During the 1920s and 1930s in Mexico both intellectuals and government officials promoted ethnic diversity while attempting to overcome the stigma of race in Mexican society Programs such as the Indigenista movement represented their efforts to redeem the Revolution's promise of a more democratic future for all citizens This book explores

three decades of efforts on the part of government officials social scientists and indigenous leaders to renegotiate the place of native peoples in Mexican society It traces the movement's origins as a humanitarian cause among intellectuals the involvement of government in bringing education land reform cultural revival and social research to Indian communities and the active participation of Indian peoples Traditionally scholars have seen Indigenismo as an elitist formulation of the Indian problem Dawson instead explores the ways that the movement was mediated by both elite and popular pressures over time By showing how Indigenismo was used by a variety of actors to negotiate the shape of the revolutionary state from anthropologist Manuel Gamio to President Lázaro Cárdenas he demonstrates how it contributed to a new pact of domination between indigenous peoples and the government Although the power of the Indigenistas was limited by the fact that Indian remained a racial slur in Mexico the indigenas capacitados empowered through Indigenismo played a central role in ensuring seventy years of PRI hegemony In studying the confluence of state formation social science and native activism Dawson's book offers a new perspective for understanding the processes through which revolutionary hegemony emerged
