

The Triumph and Tragedy of Robert Foyage Round the World

The Prize of All the Oceans

'A quite remarkably erudite and deeply informed book'
PATRICK O'BRIAN, *Daily Telegraph*

GLYN WILLIAMS

The Prize Of All The Oceans

VM Jensen

The Prize Of All The Oceans:

The Prize of All the Oceans, 1988 *Crusoe's Island* Andrew Lambert, 2016-09-13 From an acclaimed naval historian Crusoe's Island charts the curious relationship between the British and an island on the other side of the world Robinson Crusoe in the South Pacific The tiny island assumed a remarkable position in British culture most famously in Daniel Defoe's novel Andrew Lambert reveals the truth behind the legend of this place bringing to life the voices of the visiting sailors scientists and artists as well as the wonders tragedy and violence that they encountered **The Wager** David Grann, 2023-05-11 THE SUNDAY TIMES NUMBER ONE BESTSELLER LONGLISTED FOR THE 2023 BAILLIE GIFFORD PRIZE FOR NON FICTION The beauty of *The Wager* unfurls like a great sail one of the finest nonfiction books I've ever read Guardian The greatest sea story ever told Spectator I cannot think of anyone who would not love this book It is an extraordinary true story beautifully written Richard Osman A cracking yarn Grann's taste for desperate predicaments finds its fullest expression here Observer From the international bestselling author of *KILLERS OF THE FLOWER MOON* and *THE LOST CITY OF Z* a mesmerising story of shipwreck mutiny and murder culminating in a court martial that reveals a shocking truth On 28th January 1742 a ramshackle vessel of patched together wood and cloth washed up on the coast of Brazil Inside were thirty emaciated men barely alive and they had an extraordinary tale to tell They were survivors of His Majesty's ship the *Wager* a British vessel that had left England in 1740 on a secret mission during an imperial war with Spain While chasing a Spanish treasure filled galleon the *Wager* was wrecked on a desolate island off the coast of Patagonia The crew marooned for months and facing starvation built the flimsy craft and sailed for more than a hundred days traversing 2 500 miles of storm wracked seas They were greeted as heroes Then six months later another even more decrepit craft landed on the coast of Chile This boat contained just three castaways and they had a very different story to tell The thirty sailors who landed in Brazil were not heroes they were mutineers The first group responded with counter charges of their own of a tyrannical and murderous captain and his henchmen While stranded on the island the crew had fallen into anarchy with warring factions fighting for dominion over the barren wilderness As accusations of treachery and murder flew the Admiralty convened a court martial to determine who was telling the truth The stakes were life and death for whomever the court found guilty could hang *Iberian Visions of the Pacific Ocean, 1507-1899* R. Buschmann, 2014-10-28 In this work Buschmann incorporates neglected Spanish visions into the European perceptions of the emerging Pacific world The book argues that Spanish diplomats and intellectuals attempted to create an intellectual link between the Americas and the Pacific Ocean *The British Empire* Jeremy Black, 2016-03-09 What was the course and consequence of the British Empire The rights and wrongs strengths and weaknesses of empire are a major topic in global history and deservedly so Focusing on the most prominent and wide ranging empire in world history the British empire Jeremy Black provides not only a history of that empire but also a perspective from which to consider the issues of its strengths and weaknesses and rights and wrongs In

short this is history both of the past and of the present day discussion of the past that recognises that discussion over historical empires is in part a reflection of the consideration of contemporary states In this book Professor Black weaves together an overview of the British Empire across the centuries with a considered commentary on both the public historiography of empire and the politically charged character of much discussion of it There is a coverage here of social as well as political and economic dimensions of empire and both the British perspective and that of the colonies is considered The chronological dimension is set by the need to consider not only imperial expansion by the British state but also the history of Britain within an imperial context As such this is a story of empires within the British Isles Europe and later world wide The book addresses global decline decolonisation and the complex nature of post colonialism and different imperial activity in modern and contemporary history Taking a revisionist approach there is no automatic assumption that imperialism empire and colonialism were bad things Instead there is a dispassionate and evidence based evaluation of the British empire as a form of government an economic system and a method of engagement with the world one with both faults and benefits for the metropole and the colony

The British Seaborne Empire Jeremy Black, Professor Jeremy Black, 2004-01-01

Britain's seaborne tradition is used to throw light on the British themselves the people with whom they came into contact and the British perception of empire The oceans and their shores rather than the mysterious interiors of continents certainly dominated the English perception of the transoceanic world in the sixteenth seventeenth and eighteenth centuries climaxing in the fascination with the Pacific in the age of Captain Cook and continuing into the nineteenth century with Franklin in the Arctic and Ross in the Antarctic The oceans offered much more than fascination In England from the late sixteenth century maritime conflict and imperial strength were seen as important to national morale and reputation and without it there would have been no empire or at least not in the form it actually took

BOOK JACKET *Man for All Oceans* Stan

Grayson, 2017-05-16 In June 1898 three years and two months after departing Boston in his aged oyster sloop Spray Captain Joshua Slocum made landfall in New England and became the first person ever to sail alone around the world The voyage capped a lifetime of adventure for the indomitable Slocum who had advanced from seaman to captain during the challenging final years of commercial sail surviving hurricanes mutinies shipwreck and the death at sea of his beloved first wife Virginia Sailing Alone Around the World Slocum's book about his circumnavigation is a seafaring classic unmatched for adventure and literary verve and has never been out of print since its publication in 1900 Yet despite several biographies over the decades Slocum the man has remained unknowable to his legions of admirers the facts of his life and career as elusive as a ship on a fogbound sea Here is the real story of Slocum's Nova Scotia childhood his seafaring career and how he became an American citizen Grayson gives ample evidence of Slocum's uncanny genius as a navigator while also noting the occasional role that good luck played in his voyages including his odyssey from Brazil to the United States in the self designed and built 35 foot Liberdade And Grayson brings a sailor's perspective to Slocum's solo circumnavigation and mysterious disappearance

at sea A fascinating appendix compares Sailing Alone Around the World with Thoreau's Walden and shows that Slocum's simple lifestyle and self sufficiency prefigured today's emphases on the environment and living responsibly Previously unpublished photographs bring Slocum's world to life and detailed maps trace the adventures of a sailor who knew the world like the back of his hand This biography reads like an adventure narrative and will serve as the standard work on Joshua Slocum for years to come

The Age of Resilience Jeremy Rifkin, 2022-11-01 A sweeping new interpretation of the history of civilization and a transformative vision of how our species will thrive on an unpredictable Earth The viruses keep coming the climate is warming and the Earth is rewilding Our human family has no playbook to address the mayhem unfolding around us If there is a change to reckon with argues the renowned economic and social theorist Jeremy Rifkin it's that we are beginning to realize that the human race never had dominion over the Earth and that nature is far more formidable than we thought while our species seems much smaller and less significant in the bigger picture of life on Earth undermining our long cherished worldview The Age of Progress once considered sacrosanct is on a deathwatch while a powerful new narrative the Age of Resilience is ascending In The Age of Resilience Rifkin takes us on a new journey beginning with how we reconceptualize time and navigate space During the Age of Progress efficiency was the gold standard for organizing time locking our species into the quest to optimize the expropriation commodification and consumption of the Earth's bounty at ever greater speeds and in ever shrinking time intervals with the objective of increasing the opulence of human society but at the expense of the depletion of nature Space observes Rifkin became synonymous with passive natural resources while a principal role of government and the economy was to manage nature as property This long adhered to temporal spatial orientation writes Rifkin has taken humanity to the commanding heights as the dominant species on Earth and to the ruin of the natural world In the emerging era says Rifkin efficiency is giving way to adaptivity as the all encompassing temporal value while space is perceived as animated self organizing and fluid A younger generation in turn is pivoting from growth to flourishing finance capital to ecological capital productivity to regenerativity Gross Domestic Product to Quality of Life Indicators hyper consumption to eco stewardship globalization to glocalization geopolitics to biosphere politics nation state sovereignty to bioregional governance and representative democracy to citizen assemblies and distributed peerocracy Future generations suggests Rifkin will likely experience existence less as objects and structures and more as patterns and processes and come to understand that each of us is literally an ecosystem made up of the microorganisms and elements that comprise the hydrosphere lithosphere atmosphere and biosphere The autonomous self of the Age of Progress is giving way to the ecological self of the Age of Resilience The now worn scientific method that underwrote the Age of Progress is also falling by the wayside making room for a new approach to science called Complex Adaptive Systems modeling Likewise detached reason is losing cachet while empathy and biophilia become the norm At a moment when the human family is deeply despairing of the future Rifkin gives us a window into a promising new world and a radically different future that can bring

us back into nature's fold giving life a second chance to flourish on Earth

The IMLI Treatise On Global Ocean Governance

David Joseph Attard, David M Ong, Dino Kritsiotis, 2018-07-04 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance. However, it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Convention's burdensome amendment provisions, complementary mechanisms dealing with such aspects of global ocean governance including maritime transport, fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations. This approach is inherently fragmented and unable to achieve sustainable global ocean governance. In light of the Sustainable Development Goals (SDGs), particularly Goal 14, the IMLI Treatise proposes a new paradigm on the basis of an integrated and cross-sectoral approach in order to realise a more effective and sustainable governance regime for the oceans. This volume focuses on the role of UN as the central intergovernmental organization responsible for global ocean governance. It examines the ocean governance challenges and how the present legal policy and institutional frameworks of the UN have addressed these challenges. It identifies the strengths and weaknesses of UN legal structures and offers tangible proposals to realize the ambition of a global ocean governance system.

The Evil Necessity Denver Alexander Brunsman, 2013 A fundamental component of Britain's early success: naval impressment not only kept the Royal Navy afloat, it helped to make an empire. In total numbers, impressed seamen were second only to enslaved Africans as the largest group of forced laborers in the eighteenth century. In *The Evil Necessity*, Denver Brunsman describes in vivid detail the experience of impressment for Atlantic seafarers and their families. Brunsman reveals how forced service robbed approximately 250,000 mariners of their livelihoods and not infrequently their lives, while also devastating Atlantic seaport communities and the loved ones who were left behind. Press gangs, consisting of a navy officer backed by sailors and occasionally local toughs, often used violence or the threat of violence to supply the skilled manpower necessary to establish and maintain British naval supremacy. Moreover, impressments helped to unite Britain and its Atlantic coastal territories in a common system of maritime defense unmatched by any other European empire. Drawing on ships' logs, merchants' papers, personal letters and diaries, as well as engravings, political texts and sea ballads, Brunsman shows how ultimately the controversy over impressment contributed to the American Revolution and served as a leading cause of the War of 1812. Early American Histories Winner of the Walker Cowen Memorial Prize for an Outstanding Work of Scholarship in Eighteenth Century Studies.

The British Presence in Macau, 1635-1793

Rogério Miguel Puga, 2013-05-01 For more than four centuries, Macau was the centre of Portuguese trade and culture on the South China Coast. Until the founding of Hong Kong and the opening of other ports in the 1840s, it was also the main gateway to China for independent British merchants and their only place of permanent residence. Drawing extensively on Portuguese as well as British sources, *The British Presence in Macau* traces Anglo-Portuguese relations in South China from the first arrival of

English trading ships in the 1630s to the establishment of factories at Canton the beginnings of the opium trade and the Macartney Embassy of 1793 The British and Portuguese longstanding allies in the West pursued more complex relations in the East as trading interests clashed under a Chinese imperial system and as the British increasingly asserted their power as a community in search of a colony *The World's Oceans* Rainer F. Buschmann, Lance Nolde, 2025-01-23 Discover the science cultural history and environmental importance of our planet's oceans The second edition of this award winning encyclopedia has been updated throughout and includes more than 20 additional entries and highlights timely concerns including overfishing and microplastics while also providing expanded coverage of the role oceans play in modern society from cruise ships to the America's Cup competition Part I of the book features a collection of 10 thematic essays covering the five oceans of the world and broad areas of study such as the shipping industry and the changing nature of ocean boundaries Part II includes more than 115 encyclopedia entries exploring topics ranging from the Bermuda Triangle to maritime law from tsunamis to ocean acidification Sidebars throughout offer fascinating facts that complement the main text The oceans of the world are the lifeblood of our planet They act as a climate regulator absorbing heat and influencing weather patterns The oceans teem with a vast and mostly unexplored diversity of life providing us with food and medicine Historically oceans have been the highways of exploration and trade connecting continents and fostering cultural exchange From ancient Polynesian voyagers to modern shipping lanes societies have relied on the oceans for transportation and resources Yet despite their vastness and importance the world's oceans face numerous threats including the effects of climate change pollution and exploitation of their bounty Cincinnati Price-current, 1912 Torch and Colonial Book Circular, 1888 Poems of American History Burton Egbert Stevenson, 1908 The Review of Popular Astronomy, 1929 Journal of a Cruise Made to the Pacific Ocean David Porter, 1822 **The Prize of All the Oceans** Glyndwr Williams, 2001 The power of the sea and man's fragility as he confronts it are terrifyingly portrayed in this rousing historic round the world treasure hunt In 1740 in the first year of war with Spain Commodore George Anson set sail with a squadron of six British warships His secret mission prowling the world's longest richest most far flung ocean trade route was to seize the legendary Spanish galleon on her yearly voyage from Acapulco to Manila laden with Peruvian silver the prize of all the oceans It was to be a four year litany of hardship disaster mutiny and finally heroism Historian Glyn Williams's *The Prize of All the Oceans* shapes Anson's dramatic voyage into a powerful narrative threaded with incisive analysis and commentary At its center is a colorful portrait of a commander who hauled ropes alongside his men tended their sicknesses and watched them die by the hundreds but never wavered in his resolve to capture the prize that would bring him untold wealth and return home triumphant Glyn Williams tells the full story for the first time in a book that will rivet history buffs and armchair survivalists alike Back cover

Oceans Guy Jacques, Paul Tréguer, Herlé Mercier, 2021-03-05 Since the HMS Challenger expedition of 1872-1876 our vision of the ocean has changed completely We now understand that it plays a key role in biodiversity climate regulation and

mineral and biological resources and as such the ocean is a major service provider for humanity Oceans draws on data from new oceanographic and satellite tools acquired through international interdisciplinary programs It describes the processes that control how the ocean functions on different spatial and temporal scales After considering the evolution of concepts in physical chemical and biological oceanography the book outlines the future of a warmer acidified less oxygenated ocean It shows how a view of the ocean at different scales changes how we understand it Finally the book presents the challenges facing the ocean in terms of the exploitation of biological and mineral resources in the context of sustainable development and the regulation of climate change *Rhymes from a Sailor's Journal* Charles Austin Mendell Taber,1873

Unveiling the Energy of Verbal Beauty: An Emotional Sojourn through **The Prize Of All The Oceans**

In some sort of inundated with screens and the cacophony of fast communication, the profound power and emotional resonance of verbal artistry frequently fade in to obscurity, eclipsed by the continuous onslaught of noise and distractions. Yet, located within the musical pages of **The Prize Of All The Oceans**, a fascinating function of literary beauty that pulses with raw feelings, lies an wonderful journey waiting to be embarked upon. Written by a virtuoso wordsmith, this enchanting opus manuals viewers on a mental odyssey, delicately exposing the latent potential and profound influence embedded within the elaborate internet of language. Within the heart-wrenching expanse of the evocative examination, we can embark upon an introspective exploration of the book is key styles, dissect its interesting publishing model, and immerse ourselves in the indelible effect it leaves upon the depths of readers souls.
