The Great Slump Goronwy Rees,1970 *The Depression Dilemmas of Rural Iowa, 1929-1933* Lisa L.

Ossian,2012-01-01 To many rural Iowans the stock market crash on New York s Wall Street in October 1929 seemed an event far removed from their lives even though the effects of the crash became all too real throughout the state From 1929 to 1933 the enthusiastic faith that most Iowans had in Iowan President Herbert Hoover was transformed into bitter disappointment with the federal government As a result Iowans directly questioned their leadership at the state county and community levels with a renewed spirit to salvage family farms demonstrating the uniqueness of Iowa s rural life Beginning with an overview of the state during 1929 Lisa L Ossian describes Iowa s particular rural dilemmas evoking through anecdotes and examples the economic nutritional familial cultural industrial criminal legal and political challenges that engaged the people of the state The following chapters analyze life during the early Depression new prescriptions for children s health creative housekeeping to stretch resources the use of farm playlets to communicate new information creatively and memorably the demise of the soft coal mining industry increased violence within the landscape and the movement to end Prohibition The challenges faced in the early Great Depression years between 1929 and 1933 encouraged resourcefulness rather than passivity creativity rather than resignation and community rather than hopelessness Of particular interest is the role of women within the rural landscape as much of the increased daily work fell to farm women during this time While the women addressed this work simply as making do Ossian shows that their resourcefulness entailed complex planning essential for families emotional and physical health Ossian s epilogue takes readers into the Iowa of today dominated by industrial agriculture and asks the reader to consider if this model that stemmed from Depression era innovation is sustainable Her rich rural history not only helps readers understand the particular forces at work that shaped the social and physical landscape of the past but also traces how these landscapes have continued in various forms for almost eighty years into this century **The Dark Valley**

Piers Brendon,2002-01-08 The 1930s were perhaps the seminal decade in twentieth century history a dark time of global depression that displaced millions paralyzed the liberal democracies gave rise to totalitarian regimes and ultimately led to the Second World War In this sweeping history Piers Brendon brings the tragic dismal days of the 1930s to life From Stalinist pogroms to New Deal programs Brendon re creates the full scope of a slow international descent towards war Offering perfect sketches of the players riveting descriptions of major events and crises and telling details from everyday life he offers both a grand rousing narrative and an intimate portrait of an era that make sense out of the fascinating complicated and profoundly influential years of the 1930s **The Great Depression Revisited** H. van der Wee,2012-12-06 For a quarter of a century the industrial Western world has been living in the euphoria of continuous improvements in welfare based on economic programming increasing integration and terms of trade which favor industrial countries and discriminate against agricultural regions It is true that recessions have periodically recurred during these years time and again however

government intervention succeeded in reducing them to mere inventory cycles In contrast with the twenties and thirties when economic policy in the West focused on fighting unemployment and stimulating investment the postwar period has been characterized by a permanent concern to curb inflationary pressure which was partly due to full employment The present welfare economy has given rise to a propensity to consume such that public policy has often been constrained to limit consumption and stimulate saving In this new framework it has perhaps been forgotten that today's welfare owes much to the lessons from the past The bitter world crisis experience of the thirties in particular has exerted a fruitful and decisive influence upon the search for means to prevent eliminate or soften the cyclical fluctuations which the process of economic growth involves Forty years after the outbreak of the greatest economic crisis ever it seems useful to draw up the balance sheet of the lessons learned from it There exists a large literature about the depression of the thirties

The European Economy Since 1914 Derek Howard Aldcroft, Steven Morewood, 2013 *The European Economy Since 1914* provides an invaluable guide to the major economic changes in both Western and Eastern Europe during the twentieth century *The Crash and Its Aftermath* Barrie A. Wigmore, 1985-12-23 *The Crash and Its Aftermath* is an excellent work of reference on the Great Contraction It will be useful both to people with only a passing curiosity about the Crash and to those for whom the Great Depression is a major scholarly concern Business History From now on any serious student of the Depression will be obliged to consult this work for a sense of securities price movements investor attitudes and relevant contemporary sources Journal of Economic History This is the first book to focus on the broader structural changes which took place in the financial industry over the full period of decline from the Stock Market Crash in 1929 to the end of President Franklin D Roosevelt's One Hundred Days in 1933 The basis for many of Wigmore's comments is an analysis of 142 leading companies whose stocks constituted approximately 77 percent of the market value of all New York Stock Exchange stocks Wigmore also examines the various bond markets and relates the money market to the bond market monetary policy business conditions and the problems of the banking system Treating each year from 1929 to 1933 separately Wigmore shows the interrelation between the stock bond and money markets and events in politics the economy international trade and finance and monetary policy The Statistical Appendix of 41 tables consolidates financial statistics which have hitherto been widely dispersed permitting in depth study *Class Struggle and the New Deal* Rhonda F. Levine, 1988 In this reassessment of New Deal policymaking Rhonda Levine argues that the major constraints upon and catalysts for FDR's policies were rooted in class conflict Countering neo Marxist and state centred theories which focus on administrative and bureaucratic structures she contends that too little attention has been paid to the effect of class struggle **The European Economy 1914-2000** Derek Aldcroft, 2002-01-10 As in earlier editions of this work Professor Aldcroft presents a succinct and lucid account of the development and problems of the European economy throughout the twentieth century The text divides into several clearly defined sub periods the aftermath of the First World War and reconstruction in the 1920s the

depression and recovery of the 1930s the impact of the Second World War and the new division of Europe the postwar boom of the 1950s and 1960s the growth slowdown of the 1970s and the pervasive problems of inflation and unemployment This new edition incorporates extensive revisions including wide range coverage of the impact of economics union and the demise of the centrally planned economies revised bibliographies and topics for discussion The European Economy 1914 2000 provides an invaluable guide to the major economic changes in both Western and Eastern Europe during the twentieth century The European Economy 1914-1990 Derek Aldcroft, George Penelis, 1993-05-27 This new edition of The European Economy 1914 1980 has been up dated and revised to take account of the decade 1980 90 and as such covers some of the most dramatic and profound economic events of the twentieth century The European Economy 1914 1990 includes two additional chapters one dealing with the Western European economies and in particular *Major Recessions: Britain and the World 1920-1995* Christopher Dow, 1999-01-07 In the twentieth century there have been five major recessions two in the interwar period and three more starting 1973 1979 and 1989 This book focuses on events in the UK but sets them in their international context and makes frequent comparisons with other countries Major recessions happened at a similar time in all major countries and the lessons are general Three main conclusions are reached 1 major recessions reflect abrupt fallings off in demand not supply 2 these are due to identifiable demand shocks and by swings in consumer and business confidence which amplify the direct effects of demand shock 3 major recessions are not predictable In the final chapter Christopher Dow puts forward an insider s view on how to avoid future severe recessions action must be taken to control booms which if uncontrolled will lead to a period of bust and once a major recession has begun fiscal and monetary policy must be adjusted to mitigate the downturn Often unpopular with economists this is the line which many governments and central banks take Major Recessions will help them to have more success
