The Origins Of Old Germanic Studies In The Low Countries:

Origins of Old Germanic Studies in the Low Countries Kees Dekker, 1999-01-12 This volume deals with the study of Old Germanic languages in the Low Countries in the seventeenth century The work of the philologist and lawyer Jan van Vliet 1622 1666 has been taken as a starting point for a discussion of the intellectual background and philological methodology of seventeenth century investigations into the earliest recorded forms of the Germanic languages Van Vliet s activities provide an extraordinary example of the earliest attempts to approach Old Germanic languages from a comparative point of view The cosmopolitan tradition of philological studies in the Dutch Republic as well as Van Vliet s great admiration of Francis Junius 1590 1677 the founding father of Germanic philology formed the basis for his ideas about vernacular languages His work allows us a unique insight in the pioneering seventeenth century studies in Germanic philology *The Origins of Old Germanic Studies in the Low Countries* Cornelis Dekker, 1999 This volume deals with the comparative study of Old Germanic languages in the Low Countries in the middle of the seventeenth century with special attention to the work of the philologist and lawyer Jan van Vliet 1622 1666 **Texts in Multiple Versions** Luigi Giuliani, Herman Brinkman, Geert Lernout, Marita Mathijsen, 2006 Texts in multiple versions constitute the core problem of textual scholarship For texts from antiquity and the medieval period the many versions may be the result of manuscript transmission requiring editors and readers to discriminate between levels of authority in variant readings produced along the chain of copying For texts of all periods and particularly for more modern authors there may also be multiple authorial versions These are of particular importance for genetic criticism as they offer a window on the author s thinking through the developing work The different contexts in which multiple versions may occur different languages different genres different cultures ranging in this collection from ancient Greek texts to novels by Cervantes and Aub dramatic texts from Portugal and Germany poetry from The Netherlands and Lithuania scientific texts from the 19th century provide further layers of complexity The histories of countries are reflected in the histories of editing In Europe this can be seen particularly in the great period of nation building of the 19th century Essays in this volume survey editorial activity in The Netherlands Belgium and Germany in the nineteenth century concluding that nation building and scholarly editing are twinned As a nation searches for its own identity textual scholarship is pressed into service to find and edit the texts on which to establish that identity The two strands of this volume multiple versions of texts editions and national histories testify to the centrality of textual editing to many fields of research There is material here for literary scholars historians and for readers interested in texts from Ancient Greece to modernist classics

Niles, 2015-07-29 The Idea of Anglo Saxon England 1066 1901 presents the first systematic review of the ways in which Anglo Saxon studies have evolved from their beginnings to the twentieth century Tells the story of how the idea of Anglo Saxon England evolved from the Anglo Saxons themselves to the Victorians serving as a myth of origins for the English people their language and some of their most cherished institutions Combines original research with established scholarship to reveal how current conceptions of English identity might be very different if it were not for the discovery and invention of the Anglo Saxon past Reveals how documents dating from the Anglo Saxon era have greatly influenced modern attitudes toward nationhood race religious practice and constitutional liberties Includes more than fifty images of manuscripts early printed books paintings sculptures and major historians of the era
