This book brings together leading scholars on the politics of energy examining the natural resources and developing technologies that are essential to its production and the various public and private factors affecting its use along with the ecological consequences of both Section One examines the looming challenges posed by continuing dependence upon oil as a primary energy source including peak oil scenarios and the social and political consequences of resource extraction upon the developing world Section Two

considers proposals to dramatically increase nuclear power production as a means to reduce carbon emissions with both the risks and potential of this nuclear option carefully weighed. Although many tout renewable energy sources for their environmental benefits, Section Three calls attention to several potential problems with large scale renewable energy development and the dilemmas that they have caused for would be supporters of such efforts. Finally, Section Four weighs the prospects for developing sustainable energy systems on the ground, including conservation measures that reduce energy demand and system wide energy policy efforts. Together, these essays demonstrate the importance of sound energy policy along with the numerous obstacles to developing and implementing it. This book was originally published as a special issue of *Environmental Politics*. *The Politics of Energy* G. Bruce Doern, Glen Toner, 2019-06-26. Originally published in 1985. This in depth analysis of federal energy policy and politics in the oil and gas sector critically evaluates the National Energy Program, one of the most controversial and wide ranging policy initiatives in Canadian history, an important case study. Bridging Canadian politics and public policy, the book gives an historical overview of the development of energy policy since 1945, examining the shifts in the balance of power between public and private energy interests. It presents the NEP's positive and negative impacts on energy policy and the nature of political power. **The Politics of Energy Security** Johannes Kester, 2018-06-12. Energy security is known for its slippery nature and subsequent broad range of definitions. Instead of another attempt to grasp its essence, this book offers a critical reflection that problematizes the use of energy security itself. After a short historical and methodological analysis of the proliferation of energy security, *The Politics of Energy Security* unpacks three social practices that drive energy security. These include an analysis of the logics of security, a study of the relation between the materiality of sociotechnical energy systems and the knowledge people have over such systems, and a reflection on the power and politics behind energy security. Each of these are discussed and ultimately illustrated in the last chapter to show how energy security works, how it is shaped, and what role it plays within political processes. Based on a novel performative reading of energy security with its focus on ontological politics and an in depth look at the often implicitly accepted social practices that determine how people shape and are shaped by energy security, this book will be of great interest to students and scholars of energy security and policy, political theory, international relations, critical security studies, and environmental studies more broadly. Contested Powers John-Andrew McNeish, Axel Borchgrevink, Owen Logan, 2015-06-11. In the global North, the commoditization of creativity and knowledge under the banner of a creative economy is being posed as the post industrial answer to dependency on labour and natural resources. Not only does it promise a more stable and sustainable future, but an economy focused on intellectual property is more environmentally friendly, so it is suggested. *Contested Powers* argues that the fixes being offered by this model are bluffs. Development, as witnessed in Latin American energy politics and governance, remains hindered by a global division of labour and nature that puts the capacity for technological advancement in private hands. The authors call for a multi layered understanding of sovereignty, arguing that it holds the key to

undermining rigid accounts of the relationship between carbon and democracy energy and development and energy and political expression Furthermore a critical focus on energy politics is crucial to wider debates on development and sustainability Contested Powers is essential reading for those wondering how energy resources are converted into political power and why we still value the energy we take from our surroundings more than the means of its extraction The Politics of Energy Crises Juliet E. The Politics of Energy Dependency Margarita Mercedes Balmaceda, 2013-01-01 The Politics of Energy Dependency explores why these states were unable to move towards energy diversification Through extensive field research using previously untapped local language sources Margarita M Balmaceda reveals a complex picture of local elites dealing with the complications of energy dependency and in the process affecting the energy security of Europe as a whole **The Politics of Energy Research and Development** John Byrne, Daniel Rich, 2017-09-29 The Politics of Energy Research and Development examines and evaluates U S research and development policies to promote nuclear solar conservation and other technology options This volume is the third in the series Energy Policy Studies which explores fundamental long term social political and economic dimensions of energy technology resources and use Contributions represent a wide range of theoretical and policy perspectives including sociology economics political science urban and regional studies environmental analysis and history and philosophy of technology Contents Richard L Ottinger Introduction The Tragedy of U S Energy R Amor B Lovins The Origins of the Nuclear Power Fiasco Richard T Sylves Nuclear Exotica Peaceful Use of Nuclear Explosives Eugene Frankel Technology Politics and Ideology The Vicissitudes of Federal Solar Energy Policy 1974 1983 Maxine Savitz The Federal Role in Conservation Research and Development J David Roessner Commercialization Issues in Energy Technology Policy John Byrne and Daniel Rich In Search of the Abundant Energy Machine and Grant P Thompson Energy Policy in the Interim Waiting for the Next Shoe to Drop *The Politics of Energy and Memory between the Baltic States and Russia* Agnia Grigas, 2016-03-03 Since the 1990s Baltic Russian relations have been amongst the most contentious on the European continent Energy security concerns historical legacies and the status of Russian minorities have all proved key flash points Baltic Russian relations have been described as a litmus test of Russia s willingness to leave behind its imperialist ambitions simultaneously the policies of Tallinn Riga or Vilnius towards Russia can have a direct impact on EU Russian and NATO Russian relations The Baltic states share similar histories and resources and face the same geopolitical challenges All are dependent on Russia for energy yet as this fascinating study reveals they have pursued very different foreign policies towards their powerful neighbour In *The Politics of Energy and Memory between the Baltic States and Russia* Agnia Grigas provides an unprecedented analysis of contemporary Baltic Russian relations and identifies the causal factors

that drive the foreign policies of the Baltic states in such divergent routes Supported by case studies on the oil and gas sectors as well as the tug of history this book is an invaluable resource for scholars and policy makers The Politics of Energy Crises Juliet E. Carlisle, Jessica T. Feezell, Kristy E.H. Michaud, Eric R.A.N. Smith, 2016-09-09 Energy crises which amount to painful combinations of energy shortages and soaring prices have struck the United States several times in recent decades Each time they have resulted in political and economic shockwaves because when gasoline becomes more expensive the American public tends to react with anger and suspicion Energy crises instantly put related issues at the top of the nation's agenda sometimes with dramatic consequences for public policy What can we learn from recent history particularly as it may predict the role that volatile public opinion will play throughout the energy policy making process As The Politics of Energy Crises demonstrates one can discern patterns in politics and policymaking when looking at the cycles of energy crises in the United States As such it is the first systematic historical study of political conflict public opinion and organized interest group and presidential and congressional action on energy issues starting with the 1973 OPEC boycott and continuing through the present day By charting the commonalities in political battles during energy crises the authors make prognoses about what future energy crises will mean for United States policy **The New Politics of Energy Security in the**

European Union and Beyond Andrea Prontera, 2017-05-18 Combining theoretical reflections and empirical insights from paradigmatic case studies in the area of external energy governance pipeline politics Liquefied Natural Gas development and offshore petroleum policy and politics this ground breaking study demonstrates that a distinctive and new politics of energy security is definitively emerging in the European Union Innovative not only in regard to the case studies presented which include the Caspian region the Baltic Mediterranean countries Central Asia and EU Russia relations but also in regard to the analytical framework adopted an International Political Economy approach informed by an historical institutional perspective the book challenges the common view of the depoliticisation of energy security supported by the mainstream market approach and the power politics and zero sum game view supported by the geopolitical perspective This book places the study of EU energy politics in the broader evolving context of global energy markets and explores the complex interactions between EU and national political dynamics and between energy security and environmental concerns at the local level
