The Politics Of Industrial Closure:

The Politics of Industrial Closure Tony Dickson, David Judge, 1987-01-01 **Politics of Industrial Closure T. Dickson, D. Judge, 1987-10-09** *The Politics of Industrial Relations* Michael Moran, 1977-06-17 **Fighting Deindustrialisation** Andy Clark, 2022-09-15 In *Fighting Deindustrialisation* Andy Clark outlines and examines one of the most significant and under researched periods in modern Scottish labour history Over a fourteen month period in 1981 and 1982 as Scotland suffered the effects of the accelerated deindustrialisation of its economy three workforces refused to accept the loss of their jobs The predominantly women assembly workers at Lee Jeans Greenock Lovable Bra Cumbernauld and Plessey Capacitors Bathgate were informed that their multinational employers had taken the decisions to close their plants At each site a battle was fought against capital movement corporate greed and unfair job loss The workers occupied their factories and refused to vacate until their demands were met and closure avoided At all sites this objective was achieved none of the factories completely closed following the women's occupations In this book these occupations are analysed together for the first time through a range of analytical frameworks from oral history memory studies industrial relations scholarship and deindustrialisation studies In his extensive examination Clark argues that the actions of 1981-82 should be considered as one of the most significant periods in Scotland's history of deindustrialisation However the public memory of 1981-82 is precarious *Fighting Deindustrialisation* begins the process of incorporating women's militant resistance within academic and popular understandings of working class activism in later 20th century Scotland **The Politics of Industrial Collaboration during World War II** Talbot C. Imlay, Martin Horn, 2014-04-17 Important new study of wartime industrial collaboration focussing on Ford Motor Company's French affiliate during the Second World War *The Life and Death of Industrial Languedoc, 1700-1920* Christopher H. Johnson, 1995-05-04 In this seminal book Christopher Johnson writes a full scale study of the rise and decline of industrialization in the Bas Languedoc region of France Working within a broad 200 year frame Johnson examines the process of how and why a successful industrial region transformed itself to agriculture Johnson is primarily interested in deindustrialization which sets him apart from previous historians who have studied regions only in terms of the growth toward industrialization *The Politics of Industrial Agriculture* Tracey Clunies-Ross, Nicholas Hildyard, 2013-11-05 In the last forty years agriculture in the industrialised countries has undergone a revolution That has dramatically increased yields but it has also led to extensive rural depopulation widespread degradation of the environment contamination of food with agrochemicals and bacteria more routine maltreatment of farm animals and the undermining of Third World economies and livelihoods through unfair trading systems Confronted by mounting evidence of environmental harm and social impacts mainstream agronomists and policy makers have debatedly recognized the need for change Sustainable agriculture has become the buzz phrase But that can mean different things to different people We have to ask sustainable agriculture for whom Whose interests are benefiting And whose are suffering At issue is the question

of power of who controls the land and what it produces Most of the changes currently under discussion will actually strengthen the status quo and the underlying causes of the damage The result will be greater intensification of farming environmental destruction and inequality There are no simple off the shelf alternatives to industrial agriculture There are however groups throughout the world who have contributed to this report and who are working together on a new approach An agriculture that in Wendell Berry s words depletes neither soil nor people Originally published in 1992 **The Politics of Industrial Relations** Kerstin Hamann,2012-02-20 As unions in most other industrialized democracies continue to decline unions in Spain have been able to regain and maintain strength despite unfavorable institutional political and economic conditions The Politics of Industrial Relations provides a comprehensive analysis of Spanish unions from the Franco dictatorship until the present It builds on industrial relations comparative politics and political economy literature to investigate the trajectory of Spanish unions The book analyzes unions as political actors that is their interaction and involvement with governments political parties and nationwide policy making processes to explain why Spanish unions appear in some ways as atypical in West European comparison The development of Spanish unions and industrial relations is framed in a historical institutionalist approach while also taking into account globalization and Europeanization processes Using the case of the Spanish transition to democracy the book demonstrates that the historical sequencing of institutional reforms in the political and industrial relations arenas holds significant and long lasting consequences for the nature of unions and labor relations The book concludes that by understanding unions as political actors the history of Spanish unionism and industrial relations institutions is more easily accommodated than looking at unions as industrial actors alone Comprehensive in its theoretical scope and empirical depth The Politics of Industrial Relations presents Spain as an anomaly and thus as a test case for a multitude of theories developed in the political economy and industrial relations literatures

Thatcherism in the 21st Century Antony Mullen,Stephen Farrall,David Jeffery,2020-07-24 This collection examines the social and cultural legacy of Thatcherism in the 21st century Drawing upon perspectives from a range of disciplines it considers how Thatcherism manifests itself today and how we can assess its long term impact The book is divided into four sections which offer different ways of conceptualising and addressing questions of legacy the ideological impact of Thatcherism on the Conservative Party and on the country the long term impact of Thatcherism across different parts of the UK how Thatcherism has altered social attitudes to everything from welfare spending to Europe and how popular historical accounts of Thatcherism have become embedded in different parts of contemporary British culture The essays in this volume draw upon newly available archival materials oral histories social attitudes surveys and parliamentary debates to provide a well rounded perspective on Thatcherism today Strikes around the world Sjaak Velden,Heiner Dribbusch,Kurt VanDaele,2025-10-01 Are strikes going out of fashion or are they an inevitable feature of working life This is a longstanding debate The much proclaimed withering away of the strike in the 1950s was quickly overturned by the resurgence of class

conflict in the late 1960s and 1970s The period since then has been characterized as one of labor quiescence Commentators again predict the strike s demise at least in the former heartlands of capitalism Patterns of employment are constantly changing and strike activity reflects this The secular decline of manufacturing in mature industrialized economies is of major importance here though the global relocation of manufacturing may lead to some relocation of strikes Simultaneously we see the growth of disputes in the service sector the tertiarization of strikes This is evident particularly in public services including health care social care and education and is accompanied by a feminization of strikes given the prevalence of women working there This unique study draws on the experience of fifteen countries around the world South Africa Argentina Canada Mexico United States Korea Australia New Zealand Belgium Denmark France Germany the Netherlands Sweden and the United Kingdom Covering the high and low points of strike activity over the period 1968 2005 the study shows continuing evidence of the durability adaptability and necessity of the strike

The Shadow of the Mine Ray Hudson, Huw Beynon, 2021-06-29 The Shadow of the Mine tells the story of King Coal in its heyday the heroics and betrayals of the Miners Strike and what happened to mining communities after the last pits closed No one personified the age of industry more than the miners Coal was central to the British economy powering its factories and railways It carried political weight too In the eighties the miners risked everything in a year long strike against Thatcher s shutdowns Their defeat doomed a way of life The lingering sense of abandonment in former mining communities would be difficult to overstate Yet recent electoral politics has revolved around the coalfield constituencies in Labour s Red Wall Huw Beynon and Ray Hudson draw on decades of research to chronicle these momentous changes through the words of the people who lived through them This edition includes a new postscript on why Thatcher s war on the miners wasn t good for green politics Excellent NEW STATESMAN Brilliant TIMES LITERARY SUPPLEMENT Enlightening GUARDIAN

We shall not be moved Brian Marren, 2016-05-01 The city of Liverpool had frequently been prone to industrial unrest for most of its recent history but it was the dawn of Thatcher and the sanctioning of neoliberal economic strategies which made Liverpool a nucleus of resistance against the encroaching tide of right wing politics and sweeping de industrialisation This critique explores six case studies which will illustrate how elements of a highly politicised local working class fought against the rapid rise in forced redundancies and industrial closures Some of their responses included strikes factory occupations the organisation and politicisation of the unemployed

consent to radical left wing municipal politics as well as tacit endorsement a period of violent civil unrest This critique concludes that in the range intensity and use of innovative tactics deployed during these conflicts Liverpool was distinctive

The Politics of Labor in a Global Age Christopher Candland, Rudra Sil, 2001-09-20 The Politics of Labor in a Global Age is one of the first works to analyse and compare recent shifts in patterns of industrial relations across late industrializing and post socialist economies The volume features original and timely essays on labor relations at national local and workplace levels as economic and political actors cope with the similar challenges associated with economic adjustment measures and the impact of globalization The authors reveal that while globalization has threatened the position of organized labor and prompted business and state elites to accommodate greater labor market flexibility the legacies of past institutions remain evident in distinctive trends in labor politics within and across late industrializing and post socialist settings The comparisons suggest that globalization is best understood not

as a source of convergence but as a set of common pressures that are mediated by specific historical inheritances that spur varied responses on the part of industrial relations actors and that facilitate quite diverse institutional outcomes
