sharply eroded *Development and Growth in the Mexican Economy* Juan Carlos Moreno-Brid, Jaime Ros, 2009-04-23 This book provides an overview of Mexico's economic development since Independence identifying its binding constraints in different periods and the ways in which they have been tried to be removed by economic policies It gives special attention to developments since 1940 and presents a re-evaluation critical of the dominant trend in the economic literature of Mexico's development policies during the State-led industrialization period from 1940 to 1982 and during the more recent market reform process The University System and Economic Development in Mexico Since 1929 David Lorey, 1993-11-01 For decades Mexican leaders and scholars as well as outside observers have spoken of a Mexican university system in crisis expressing concern over student political activism and violence declining quality of instruction and facilities crowded campuses and lack of employment for graduates When the government harshly suppressed a student movement in 1968 world attention focused on the turmoil that was endemic in university life During the severe economic slump of the 1980s the fundamental weaknesses of the Mexican economy its inefficiency and inability to compete in the world were often attributed to failings of the university system Using original quantitative data on the graduates of all Mexican universities in a dozen major professional fields since 1929 the author explores the nature of this purported crisis by examining a series of questions about the Mexican university system How have the changing policy priorities of the Mexican government affected the university's education of professionals How have the Mexican economy's needs for professionals shaped the functioning of the university system Has Mexico trained enough professionals Have they been trained in the right fields Has the university been able to respond to demands for upward mobility through higher education The author's detailed analysis reveals a paradox to the extent that Mexican universities may not be producing the kinds of expertise needed for competing in the new global marketplace that educational quality has declined gradually over time and that the university has not contributed much to social mobility one may indeed speak of a crisis Yet because the university system has reached its present form in response to demands placed on it by government the economy and society responding pragmatically to circumstances beyond its control the author concludes that the crisis is not fundamentally a university crisis but rather one that lies in Mexican economy and society at large Mexican Politics in Transition Judith Gentleman, 2019-03-13 Initiated in the mid 1970s Mexico's program of political reform was designed to provide a new opportunity for political competition In this book contributors examine the significance political mobilization has had and the extent to which the reform has served as a vehicle for defusing discontent in the wake of Mexico's failed oil-based development *The Politics of Mexican Financial Policy* Nancy Neiman, 1994 *Political Intelligence and the Creation of Modern Mexico, 1938-1954* Aaron W. Navarro, 2010 Analyzes the impact of the opposition candidacies in the Mexican presidential elections of 1940 1946 and 1952 on the internal discipline and electoral dominance of the ruling Partido de la Revoluci on Mexicana PRM and its successor the Partido Revolucionario Institucional PRI Provided by publisher The Political Economy of Peru 1956-78 E.
