Atlantic and Pacific coasts to about 10 days. It became the West's most direct means of east-west communication before the transcontinental telegraph was established October 24, 1861, and was vital for tying the new U.S. state of California with the rest of the United States. Despite a heavy subsidy, the Pony Express was not a financial success and went bankrupt in 18 months when faster telegraph service was established. Nevertheless, it demonstrated that a unified transcontinental system of communications could be established and operated year-round. When replaced by the telegraph, the Pony Express quickly became romanticized and became part of the lore of the American West. Its reliance on the ability and endurance of individual young, hardy riders and fast horses was seen as evidence of rugged American individualism of the frontier times.

The Story of the Pony Express Glenn D. Bradley, 2016-07-12. The Pony Express was the first rapid transit and the first fast mail line across the continent from the Missouri River to the Pacific Coast. It was a system by means of which messages were carried swiftly on horseback across the plains and deserts and over the mountains of the far West. It brought the Atlantic coast and the Pacific slope ten days nearer to each other. It had a brief existence of only sixteen months and was supplanted by the transcontinental telegraph. Yet it was of the greatest importance in binding the East and West together at a time when overland travel was slow and cumbersome and when a great national crisis made the rapid communication of news between these sections an imperative necessity.

The Pony Express A. I. Lake, 1990. Describes the history of the Pony Express and the daring riders who risked their lives to deliver the mail.

The Story of the Pony Express Glenn Danford Bradley, 2020-12-24. The Pony Express was a mail service delivering messages, newspapers, and mail using relays of horse-mounted riders that operated from April 3, 1860, to October 26, 1861, between Missouri and California in the United States of America. The Pony Express was the first rapid transit and the first fast mail line across the North American continent from the Missouri River to the Pacific Coast. It was a system by means of which messages were carried swiftly on horseback across the plains and deserts and over the mountains of the far West. It brought the Atlantic coast and the rapidly developing state of California ten days nearer to each other. The Pony Express had only a brief existence from April 1860 to October 1861 when it was supplanted by the transcontinental telegraph. Yet it was of the greatest importance in binding the East and West together at a time when overland travel was slow and cumbersome and when a great national crisis made the rapid communication of news between these sections an imperative necessity. The Pony Express marked the highest development in overland travel prior to the coming of the Pacific railroad, which it preceded by nine years. In fact, it proved the feasibility of a transcontinental road and

demonstrated that such a line could be built and operated continuously the year around a feat that had always been regarded as impossible The operation of the Pony Express was a supreme achievement of physical endurance on the part of man and his ever faithful companion the horse The history of this organization should be a lasting monument to the physical sacrifice of man and beast in an effort to accomplish something worthwhile Its history should be an enduring tribute to American courage and American organizing genius **The Pony Express Rider** Harry Castlemon,1898 **The Story of the Pony Express** Glenn Danford Bradley,2019-09-03 The Pony Express was the first rapid transit and the first fast mail line across the North American continent from the Missouri River to the Pacific Coast It was a system by means of which messages were carried swiftly on horseback across the plains and deserts and over the mountains of the far West It brought the Atlantic coast and the rapidly developing state of California ten days nearer to each other The Pony Express had only a brief existence from April 1860 to October 1861 when it was supplanted by the trans continental telegraph Yet it was of the greatest importance in binding the East and West together at a time when overland travel was slow and cumbersome and when a great national crisis made the rapid communication of news between these sections an imperative necessity The Pony Express marked the highest development in overland travel prior to the coming of the Pacific railroad which it preceded by nine years In fact it proved the feasibility of a transcontinental road and demonstrated that such a line could be built and operated continuously the year around a feat that had always been regarded as impossible The operation of the Pony Express was a supreme achievement of physical endurance on the part of man and his ever faithful companion the horse The history of this organization should be a lasting monument to the physical sacrifice of man and beast in an effort to accomplish something worthwhile Its history should be an enduring tribute to American courage and American organizing genius
