their scientific and technological breakthroughs but also for the new union of science and industry they represented Innovative ideas do not simply appear out of the blue and spread on their own merit Rather the laboratory s diffusion takes place in a cultural context that goes beyond corporate capital and technological change Using discourse analysis as a method to comprehensively capture the organizational field of the early American R D laboratories from 1870 to 1930 this book uncovers the collective meanings associated with the industrial laboratory Meanings such as what and where a laboratory is supposed to be who the scientist is and what it means to practice science provided cultural resources that made the transfer of the laboratory from academic science into an industrial setting possible by rendering such meanings understandable and operable to big business and organizational entrepreneurs fighting for hegemony in a rapidly evolving market It analyzes not only the corporations that established laboratories in the United States but also their contexts economic political and especially scientific showing how the industrial laboratory was transformed from an organizational novelty into an expected institution in less than two decades This book will be of interest to researchers academics historians and students in the fields of organizational change discourse studies the management of technology and innovation as well as business and management history *The Industrial History of Free Nations* William Torrens McCullagh Torrens,1846 [A Short History of American Industrial Policies](#) William R. the coverage by forms of work he proceeds chronologically breaking 500 years of history into five periods Encounter and Accommodation 1480 1550 The Colonial System 1550 1750 Cities and Towns 1750 1850 Export Economies 1850 1930 Work in Modern Latin America 1930 the Present Within each period McCreery discusses the chief economic political and social characteristics as they relate to work identifying both continuities and discontinuities from each preceding period Specific topics studied range from the encomienda the enslaving of Indians in Spanish America the introduction of Black African slaves labor in mining agricultural labor urban and domestic labor women and work peasant economies industrial labor to the maquilas and more
