Innovation David Masumba, 2019-04-02. Leadership for Innovation takes a look at organizations' desire to make innovation every employee's responsibility and teaches organizational leaders to create an innovative climate. Studies have revealed that although organizations desire to make innovation every employee's responsibility, the major challenge is how to create a climate where every employee across functional units is involved in advancing innovation. Employee-driven innovation does not happen naturally or by relying on traditional management tools and approaches. Organizational leaders must possess the necessary innovation skills to develop and implement crosscutting innovation support systems and practices. With over 10 years of experience focusing on designing workforce innovation support systems, David Masumba shares strategies and policies that help companies create a climate of innovation.
