about how companies work with sustainability This view of the actors as doing sustainability through care practice in a corporate setting paves the way for a caring analysis exploring the different versions of sustainability as different matters of care The enactment of sustainability is studied through participant observation interviews and document studies The most frequently enacted versions of sustainability are sustainability as saving resources sustainability through standards labels sustainability as caring for people and sustainability as a conscious choice The study shows how some versions of sustainability in one setting can clash such as when the employees at HygieneTech have to decide between caring for saving resources or caring for labelled products Even so in other settings versions of sustainability can be added together and thus enable the employees to care for sustainability both as a marketing device and as a conscious choice Furthermore the thesis shows that sustainability is sometimes made absent in relation to other matters of care such as cleanliness and economy while in other settings economy and sustainability can be added together Finally the thesis shows how sustainability while enacted in several versions still can cohere though professional tinkering

Department of Defense Appropriations United States. Congress. Senate. Committee on Appropriations. Subcommittee on Department of Defense,2007 Love and Health Jerry L. Ainsworth,2006 Love and Health is a classic account of good triumphing over evil of being given a lemon and making lemonade It is an intimate sharing of a success story that started with anger and ended in love Indeed it is the tale of a personal defeat that developed into a

program of love so timely and unique that for one bright shining moment it profoundly changed a university and a hospital and the people who worked there Dr Jerry Ainsworth was an administrator at his university when he became embroiled in a conflict with his administration The battle became so intense and hostile that he was relieved of his administrative post and assigned a menial punitive position This dismissal angered him to such a degree that he started a movement to oust the president or if not to get rid of him at least to embarrass him or weaken him politically After months of seething with anger he developed a life threatening medical condition that doctors told him was a direct result of anger and could soon cause his death Astonished he delved into existing research literature to determine if anger could actually kill Not only did he learn that it could he was equally surprised to discover evidence confirming the healing effects of love and of similar positive emotions Dr Ainsworth immediately incorporated these findings into his own life alleviating all symptoms of anger and pioneering the development of an undergraduate college course on love and health Although colleagues were initially apprehensive apathetic and even pessimistic toward such an idea student reactions were exactly the opposite His classes were so successful that he started a graduate course along similar lines
