Prof. Firdevs SAĞLAM,2022-03-01 Art has become an essential part of human life because of its aesthetic structure its presence in communication its ability to stimulate emotions and thoughts The reason the art is included in education is to spread the art related gains across society The aim is to develop individuals who can adapt to the rapidly evolving and changing world especially with art training that helps to develop the creative characteristics The art education includes theoretical parts such as aesthetic art history cultural heritage as well as activities involving two dimensional or three dimensional applications This study named Art Education and Three Dimensions contains art art education the concept of three dimension and information and experiences about applications based on this concept In this context the place of three dimensions in art education was studied with reference to difference aspects The reason for addressing the concept of three dimensions is that this concept is the basis of existence in human life and that most of the sensing process is completed around it The inclusion of three dimensions within the scope of art education provides gains in different directions for the individual These gains are considered physical cognitive and sensory In this study the relevant field literature was reviewed and blended with the author s knowledge and experience of the field I owe a debt to my dear family who did not withhold their support during the creation of this book **4th Dimensional Living in a 3 Dimensional World** Yong-gi Cho,2006 Many of Dr Cho s books talk about life in the fourth dimension a realm that is more real than the physical world in which we live He points out that the world we know was fashioned in the invisible fourth dimensions the spiritual realm and the things we see are only temporary whereas spiritual things are eternal In light of this he wants each of us to gain entrance to the fourth dimension the place where the God of might and miracles lives and moves The Fourth Dimension Craig

On Human Temporality Michael Eldred, 2024-04-01 Eldred offers a remedy to the consequences of ancient Greek misconceptions of time that are also entrenched in today's mathematized physics Here time is spatialized as the one dimensionally linear arrow of time for the sake of predicting and controlling movement But such spatialized time distorts the phenomenon of time itself An alternative hermeneutic phenomenological path begins with a pre spatial concept of time that is genuinely three dimensional This paves the way for recasting who we are as humans in belonging first of all to the free openness of 3D temporality This belonging enables temporally 3D vision of the psyche that empowers us to see movement at all and reconcile its inherent contradictoriness We are then also able to conceive ourselves no longer merely as internally cogitating self conscious subjects but as engaged existentially in temporally 3D interplay mutually estimating and esteeming who we are This unpredictable interplay is constrained however by being played out in the sociating medium of thingified value the accumulative movement of thingified value having gained the upper hand in dictating our life movements as well as our interplay with the earth
