The Pragmatics Of Propositional Attitude Reports:

The Pragmatics of Propositional Attitude Reports Katarzyna Jaszczołt, 2021-10-01 This volume the fourth in the Current Research in Semantics Pragmatics Interface series is a collection of nine papers dealing with the topic of reporting on beliefs and other attitudes and in particular with the issue of the semantics pragmatics boundary dispute which is the core topic of the current research in the field Written by highly regarded philosophers of language and linguists working on theoretical semantics and pragmatics it brings together works in the mainstream tradition of logical form and the contextualism anticontextualism debate and the research on the role of intentions conventions goals plans and cultural stereotypes in attitude ascriptions The editor's introductory chapter gives a valuable overview of the work discussing the importance of all these aspects of propositional attitude research and stressing their compatibility and interdependence *Telling What She Thinks* Tomoo Ueda, 2015-09-25 Frege's puzzle concerning belief reports has been in the middle of the discussion on semantics and pragmatics of attitude reports The intuition behind the opacity does not seem to be consistent with the thesis of semantic innocence according to which the semantic value of proper names is nothing but their referent Main tasks of this book include providing truth conditional content of belief reports Especially the focus is on semantic values of proper names The key aim is to extend Crimmins's basic idea of semantic pretense and the introduction of pleonastic entities proposed by Schiffer They enable us to capture Frege's puzzle in the analysis without giving up semantic innocence To reach this conclusion two issues are established First based on linguistic evidence the frame of belief reports functions adverbially rather than relationally Second the belief ascriptions on which each belief report is made must be analyzed in terms of the measurement theoretic analogy **Attitude Reports** Thomas Grano, 2021-06-03 A critical survey of key issues in the analysis of propositional attitude reports a central topic in natural language semantics **The Pragmatics of Indirect Reports** Alessandro Capone, 2016-11-03 This monograph on indirect reports offers insights on the semantics pragmatics interface and a refinement of the notion of explicature The volume is written in an engaging style and guides the reader through the theoretical problems and their ramifications The thorniest problem in the study of indirect reports is their polyphonic nature and how the listener distinguishes between the reporter's voice and the original speaker's voice either by contextual clues or in the absence of such clues by resorting to pragmatic principles The introductory chapter discusses the main issues that will be addressed in the volume The next chapters focus on the various aspects of indirect reports covering both theory and practical applications **Pragmatic Markers and Propositional Attitude** Gisle Andersen, Thorstein Fretheim, 2000-07-15 In interactive discourse we not only express propositions but we also express different attitudes to them That is we communicate how our mind entertains those propositions that we express A speaker is able to express an attitude of belief desire hope doubt fear regret or pretence that a given proposition represents a true state of affairs This collection of papers explores the contribution of particles and other uninflected mood indicating function words to the expression of

propositional attitude in the broad sense Some languages employ this type of attitude marking device extensively even for the expression of basic moods and basic speech act categories other languages use such markers sparsely and always in interaction with syntactic form Both types of language are examined in this volume which includes studies of attitudinal markers in Amharic English Gascon Occitan German Greek Hausa Hungarian Japanese Norwegian and Swahili The theoretical emphasis is on issues such as interpretive vs descriptive use of utterances or utterance parts procedural semantics linguistic underdetermination of the proposition expressed and the speaker's communicated attitude to it higher level explicatures in the relevance theoretic sense the explicit implicit distinction as well as processes of grammaticalization and negotiation of propositional attitude in spoken interaction

The Cambridge Handbook of Pragmatics Keith Allan, Kasia M. Jaszczolt, 2012-01-12 Pragmatics is the study of human communication the choices speakers make to express their intended meaning and the kinds of inferences that hearers draw from an utterance in the context of its use This Handbook surveys pragmatics from different perspectives presenting the main theories in pragmatic research incorporating seminal research as well as cutting edge solutions It addresses questions of rational and empirical research methods what counts as an adequate and successful pragmatic theory and how to go about answering problems raised in pragmatic theory In the fast developing field of pragmatics this Handbook fills the gap in the market for a one stop resource to the wide scope of today's research and the intricacy of the many theoretical debates It is an authoritative guide for graduate students and researchers with its focus on the areas and theories that will mark progress in pragmatic research in the future

Numerous Meanings Bert Bultinck, 2021-10-25 Outlandish as it may seem to the uninitiated the meaning of English cardinal numbers has been the object of many heated and fascinating debates Notwithstanding the numerous important objections that have been formulated in the last three decades the neo Gricean scalar account is still the standard semantic description of numerals In this book Bultinck writes the history of this implicature driven approach and demonstrates that it suffers from methodological insecurity and postulates highly non conventional meanings of numerals as their literal meaning while it confuses the level of lexical semantics with that of utterances and cannot deal with a large number of counter examples Relying on the results of an extensive corpus based analysis an alternative account of the meaning of English cardinals and the ways in which their interpretation is influenced by other linguistic elements is presented As such this analysis constitutes a prism that offers today's linguist an iridescent history of one of the most fascinating if often misconstrued topics in contemporary meaning research the conversational implicatures

Shifting the Focus Daniel Wedgwood, 2021-10-01 How direct is the mapping between linguistic constructions and their interpretations Much less direct than we commonly assume according to Daniel Wedgwood Extending current ideas from frameworks like Relevance Theory and Dynamic Syntax Wedgwood upholds a radical position on modelling linguistic competence the idea of interfacing static syntactic and semantic representations must be abandoned in favour of models of the incremental construction of meaning during parsing which may involve significant pragmatic enrichment In illustration Wedgwood presents a detailed study of a key meeting point of grammar and pragmatics focus in particular its syntactic expression in Hungarian The result is a strikingly simple explanation of a complex set of syntactico semantic phenomena touching on information structure negation quantification and complex predication For its clear and bold theoretical argumentation and its novel analysis of some notorious data this book will be of interest to all linguists philosophers and computational linguists concerned with the relationships between syntax semantics pragmatics and information structure This book features a broad theoretical

perspective It offers a coherent overall picture of syntax semantics and pragmatics and how they inter relate It combines a bold new approach with the insights of existing theory thorough novel analysis of linguistic phenomena that historically occupy an important place in the literature as illustration of a carefully laid out theoretical position It extends and integrates research from a variety of linguistic domains and frameworks It also includes a comprehensive informal discussion as well as a formalised analysis

Default Semantics K. M. Jaszczolt, 2005-07-07 In this pioneering book Kasia Jaszczolt lays down the foundations of an original theory of meaning in discourse reveals the cognitive foundations of discourse interpretation and puts forward a new basis for the analysis of discourse processing She provides a step by step introduction to the theory and its application and explains new terms and formalisms as required Dr Jaszczolt unites the precision of truth conditional dynamic approaches with insights from neo Gricean pragmatics into the role of speaker s intentions in communication She shows that the compositionality of meaning may be understood as merger representations combining information from various sources including word meaning and sentence structure various kinds of default interpretations and conscious pragmatic inference Among the applications the author discusses are constructions that pose problems in semantic analysis such as referring expressions propositional attitude constructions presupposition modality numerals and sentential connectives She proposes solutions to cutting edge problems in the semantics pragmatics interface for example how many levels of meaning should be distinguished the status of under specification how much contextual information should be placed in the representation of the speaker s meaning whether there are default interpretations the stage of utterance interpretation at which pragmatic inference begins and whether compositionality is a necessary feature of the theory of meaning and if so how it is to be defined The book is for advanced students and researchers in semantics pragmatics computational linguistics and philosophy of language

Linguistic Bibliography for the Year 2000 / Bibliographie Linguistique de l'Année 2000 Sijmen Tol, Hella Olbertz, Mark Janse, 2004-12-10 Bibliographie Linguistique

Linguistic Bibliography is the annual bibliography of linguistics published by the Permanent International Committee of Linguists under the auspices of the International Council of Philosophy and Humanistic Studies of UNESCO. Bibliographie Linguistique is by far the most comprehensive bibliography in the field. It covers all branches of linguistics, both theoretical and descriptive, from all geographical areas, including less known and extinct languages, with particular attention to the many endangered languages of the world. Up-to-date information is guaranteed by the collaboration of some forty contributing specialists from all over the world. With over 20,000 titles arranged according to a detailed state-of-the-art classification, Bibliographie Linguistique remains the standard reference book for every scholar of language and linguistics.

Where Semantics meets Pragmatics Klaus von Stechow, Ken Turner, 2021-10-25 The Current Research in the Semantic Pragmatics Interface series has carved out a new and vibrant area of research. This volume offers the reader a state-of-the-art record of new and established research in this area. Von Stechow and Turner's careful selection of topics and contributors ensures that each chapter integrates semantic and pragmatic facts into a single theory that each finds an adequate division of theoretical labour and that each attempts to design and corroborate an elegant account of meaning and use that would be compatible with other aspects of human behaviour. Importantly, each paper in the volume focuses on linguistic detail, not merely abstract discussions of a theoretical nature. Thus, each paper makes extensive reference to the semantic and pragmatic facts of English and also other languages. This reference gives each of the proposed analyses a more adequate empirical edge and a sharper theoretical focus. This book is a must for all scholars and students interested in the new and vibrant discipline of semantics/pragmatics and to anyone who is fascinated by the prospect of working beyond the traditional disciplinary boundaries of linguistics and the philosophy of language. The chapters in this volume originate from a workshop at the Linguistic Society of America Summer Institute held at Michigan State University.

Phenomenology and Philosophy of Mind David Woodruff Smith, Amie L. Thomasson, 2005-10-06 Philosophical work on the mind flowed in two streams through the 20th century: phenomenology and analytic philosophy. The phenomenological tradition began with Brentano and was developed by such great European philosophers as Husserl, Heidegger, Sartre, and Merleau-Ponty. As the century advanced, Anglophone philosophers increasingly developed their own distinct styles and methods of studying the mind, and a gulf seemed to open up between the two traditions. This volume aims to bring them together again by demonstrating how work in phenomenology may lead to significant progress on problems central to current analytic research and how analytical philosophy of mind may shed light on phenomenological concerns. Leading figures from both traditions contribute specially written essays on such central topics as consciousness, intentionality, perception, action, self-knowledge, temporal awareness.

and mental content Phenomenology and Philosophy of Mind demonstrates that these different approaches to the mind should not stand in opposition to each other but can be mutually illuminating
