**Big Data Analytics Using Multiple Criteria Decision-Making Models** Ramakrishnan Ramanathan, Muthu Mathirajan, A. Ravi Ravindran, 2017-07-12 Multiple Criteria Decision Making MCDM is a subfield of Operations Research dealing with decision making problems A decision making problem is characterized by the need to choose one or a few among a number of alternatives The field of MCDM assumes special importance in this era of Big Data and Business Analytics In this volume the focus will be on modelling based tools for Business Analytics BA with exclusive focus on the sub field of MCDM within the domain of operations research The book will include an Introduction to Big Data and Business Analytics and challenges and opportunities for developing MCDM models in the era of Big Data **Monte Carlo** George Fishman, 2013-03-09 This book provides an introduction to the Monte Carlo method suitable for a one or two semester course for graduate and advanced undergraduate students in the mathematical and engineering sciences It also can serve as a reference for the professional analyst In the past my inability to provide students with a single source book on this topic for class and for later professional reference had left me repeatedly frustrated and eventually motivated me to write this book In addition to focused accounts of major topics the book has two unifying themes One concerns the effective use of information and the other concerns error control and reduction The book describes how to incorporate information about a problem into a sampling plan in a way that reduces the cost of estimating its solution to within a specified error bound Although exploiting special structures to reduce cost long has been a hallmark of the Monte Carlo method the propensity of users of the method to discard useful information because it does not fit traditional textbook models repeatedly has impressed me The present account aims at reducing the impediments to integrating this information Errors both statistical and computational abound in every Monte Carlo sampling experiment and a considerable methodology exists for controlling them
