Your own attitude is your brightest guiding star Some of success is doing what you like to do But more of it is doing the things you don t like to do but must It is too easy to make an excuse and not do it and fail John Roberts As this book goes to press early in 2010 I am 75 and into my fifth year with incurable metastatic prostate cancer which had already spread to the bones before cancer was diagnosed and the prostate removed The statistical prognosis for the current treatments of choice is that one half of these patients will die within three years 75% within five This usually happens after the standard treatments and chemotherapy fail and must be discontinued due to harmful side effects or weakening effectiveness resumed cancer growth and the failure of bones or key organs I am still feeling fine no pain living a normal life and I have completed eight months of chemotherapy with a 63% drop in my PSA prostate cancer blood test without major side affects or rising PSA I have fought this cancer and its personal consequences in more than a hundred ways as described here Above all a lifetime of

fitness and my current excellent physical and mental condition supplemented by great medical care and everything else I can learn or think of is partially responsible for my success in living beyond the average life span for my particular fatal disease. We cannot know which weapon or how much each one contributes to the extension of life so we must use them all. The doctors all say that cancer survival is very unpredictable and I figured that many of the positive outcomes must depend on how comprehensively and how hard the individual fights. So I immediately started this book and organized my fight. I was extremely unfortunate: most prostate cancer either is so slow growing or eliminated by removal that survivors live for many years. In my case it had already spread or metastasized to the bones prior to the operation and that cancer is inoperable and incurable. But some people in that condition die very early while others like me live much longer. This is highly unpredictable in individual cases due to variation in patient condition, treatment effectiveness, and other unknowns. More than half of all people newly diagnosed with cancer will be cured or given extended remission. They will die of something else. Of the other half, a large number have treatable cancer and they still have many years to live. The remainder, probably including me, have learned that they have incurable cancer that has grown too strong or spread and taken root in such places that it cannot be killed or removed and death is likely in the next few months or years. Nevertheless, normally incurable cancer and conventional predictability sometimes fail and others may prolong life by fighting with strong mental and physical effort. As the disease progresses and is treated and science advances sometimes in great leaps, we are rarely sure of which group we are in. That uncertainty, that hope and the dreadful power of cancer call for great strength of character and effort in both patients and those around them. This book is about that. The animal instinct to survive is in humans alone expanded in our unique cortex to something much greater: the intelligent understanding of self-awareness and an intense desire to prolong the experience, growth, and emotion of life. The human spirit beyond the mere motivation of existence is largely responsible for all that our species has conquered and achieved. It is an essential quality to be trained, treasured, and put to use, and one of the finest ways is to survive, continue, and improve our exceptional life through our collective and individual intellect. In the last century, medical science, the visibility of living in distant years, and the recognition that we are and can be responsible for increasing our own longevity have added.

Ambiguous Antidotes Hilaire Kallendorf, 2017-10-31. Chastity and lust, charity and greed, humility and pride are but some of the virtues and vices that have been in tension since Prudentius' *Psychomachia* written in the fifth century. While there has been widespread agreement within a given culture about what exactly constitutes a virtue or a vice, are these categories so consistent after all? In *Ambiguous Antidotes*, Hilaire Kallendorf explores the receptions of Virtues in the realm of moral philosophy and the artistic production it influenced during the Spanish Golden Age. Using the Derridian notion of *pharmakon*, a powerful substance that can serve as poison and cure, Kallendorf's original and pioneering insight into five key Virtues—justice, fortitude, chastity, charity, and prudence—reveals an intriguing but messy relationship. Rather than being seen as

unambiguously good antidotes the Virtues are instead contested spaces where competing sets of values jostled for primacy and hegemony Employing an arsenal of tools drawn from literary theory and cultural studies Ambiguous Antidotes confirms that you can in fact have too much of a good thing *Policing a Safe, Just and Tolerant Society* Robert Adlam, Peter Villiers, 2004-07-01 A ground breaking work with international contributions including from the USA Edwin J Delattre Boston University William C Heffernan John Jay College New York John Kleining ditto Alasdair MacIntyre formerly Notre Dame Indiana Robert Panzerella John Jay Robert R Sullivan John Jay that looks at policing in the modern era with all its threats to ordinary life *Personality, Identity, and Character* Darcia Narváez, Daniel K. Lapsley, 2009-06-29 This edited volume features cutting edge work in moral psychology by pre eminent scholars in moral self identity moral character and moral personality *Twentieth-Century French Philosophy* Alan D. Schrift, 2009-02-04 This unique book addresses trends such as vitalism neo Kantianism existentialism Marxism and feminism and provides concise biographies of the influential philosophers who shaped these movements including entries on over ninety thinkers Offers discussion and cross referencing of ideas and figures Provides Appendix on the distinctive nature of French academic culture *Spiritual Education in a Divided World* Cathy Ota, Mark Chater, 2007-03-15 In the era of globalization debate has turned to the vital need for a thorough understanding of its impact on the spirituality and health of the youth of today *Spiritual Education in a Divided World* recognises the urgent need for effective research in this area This exceptional volume takes an interdisciplinary approach to tackle the key question ***Reading Humility in Early Modern England*** Jennifer Clement, 2016-03-03 While humility is not especially valued in modern Western culture Jennifer Clement argues here it is central to sixteenth and seventeenth century understandings of Christian faith and behavior and is vital to early modern concepts of the self As this study shows early modern literary engagements with humility link it to self knowledge through the practice of right reading and make humility foundational to any proper understanding of human agency Yet humility has received little critical interest and has often been misunderstood as a false virtue that engenders only self abjection This study offers an overview of various ways in which humility is discussed deployed or resisted in early modern texts ranging from the explicitly religious and autobiographical prose of Katherine Parr and John Donne to the more politically motivated prose of Queen Elizabeth I and the seventeenth century reformer and radical Thomas Tryon As part of the wider turn to religion in early modern studies this study seeks to complicate our understanding of a mainstream early modern virtue and to problematize a mode of critical analysis that assumes agency is always defined by resistance
