Sustainable Gardens Rob Cross, Roger Spencer, 2009-01-29 The third title in the CSIRO Gardening Guide series *Sustainable Gardens* by Roger Spencer and Rob Cross shows how horticulture can contribute towards a more sustainable future Written for home gardeners professional horticulturists landscapers and all those passionate about cultivated landscapes this book examines the steps we can take towards harmonising gardening activity with the cycles of nature Two outstanding botanists from the Royal Botanical Gardens in Melbourne Roger and Rob have produced a genuine gardening bible for our times They show how every gardener both professional and amateur can contribute positively to environmental stewardship Gardens may be consumers of resources but the negative effects of this consumption can be minimised and can be offset by some of the positive contributions gardens make Roger and Rob explain the connections between human activity resource depletion and environmental degradation They show how to conduct an audit of gardening practices materials and results so that every gardener can measure the impact he or she is having on nature They show how to minimise the impacts on nature of our consumption of water

materials and energy in the garden how to make gardens more environmentally friendly through design construction and maintenance phases the importance of biodiversity and how horticulture can help protect natural systems and the role that gardening can play in alleviating the environmental impacts of food production Checklists are provided so that gardeners can ensure they are taking the most sustainable path through each phase of gardening design construction maintenance The book ends with a guide round an existing garden that combines physical beauty with sustainability and discusses future trends for sustainable horticulture In an increasingly urbanised world parks and gardens are our main point of contact with nature If we can maximise the environmental benefits of our gardens public spaces and landscapes we will make a huge contribution to sustainable living This book is the first to show us how Eco and Low-Carbon New Towns in China Yang Fu,Xiaoling Zhang,2020-12-27 This book examines the sustainability transition theory in the context of urbanization in China tracing the development of eco and low carbon cities It examines how ideas on building eco cities and low carbon cities travel from nation to nation how they are adopted in the Chinese administrative context and what role inter scalar actors play in getting the ideas transferred translated and operationalized on the ground Offering an overarching theoretical framework that incorporates all urban sustainability experiments in China the book conducts a comprehensive analysis of the master plans of these new towns and summarizes the normative transition targets of sustainable urban experiments It explores how they differ from each other and how they influence transition dynamics in practice By examining four eco and low carbon new towns deemed representative of current major approaches to sustainability transition management in China the book provides a detailed depiction of generic transition management and explains the different transitional trajectories for each type of sustainable urban experiment It demonstrates how subnational level and city level transitions mediate the national transition Through a thorough inquiry into inter scalar dynamics institutional arrangements and techno social innovations in sustainable urban experiments the book links generalized transition rules and specific contexts to present a full view of the challenges failures and territorial problems of eco and low carbon new towns This book makes a novel contribution to the study of Chinese urbanization by revisiting issues and problems of contemporary urban China The reflection on these urban issues will provide implications to policymakers professionals and the common reader interested in the future sustainable urbanism in China *Gaia's Garden* Toby Hemenway,2009-05-19 *Gaia's Garden* will be recorded in history as a milestone for gardeners and landscapers An amazing achievement Paul Stamets The classic book about ecological gardening whatever size your garden with over 250 000 copies sold A great book Men's Journal *Gaia's Garden* has sparked the imagination of home gardeners the world over by introducing a simple message working with nature not against her results in more beautiful abundant and forgiving gardens Many people mistakenly think that ecological gardening which involves growing a wide range of edible and other useful plants can take place only on a large multiacre scale As Hemenway demonstrates it's fun and easy even for the beginner to create a backyard ecosystem by assembling communities of plants that can work

cooperatively and perform a variety of functions including Building and maintaining soil fertility and structure Catching and conserving water in the landscape Providing a rewilded and biodiverse habitat for beneficial insects birds and animals Growing an edible forest that yields seasonal fruits nuts and other foods This revised and updated edition also features a chapter on urban permaculture designed especially for people in cities and suburbs who have very limited growing space Whatever size yard or garden you have to work with you can apply basic permaculture principles to make it more diverse more natural more productive and more beautiful Best of all once it s established an ecological garden will reduce or eliminate most of the backbreaking work that s needed to maintain the typical lawn and garden
