Small Talk:

Small Talk Justine Coupland, 2014-06-11 This study presents a new perspective on small talk and its crucial role in everyday communication. The new approach presented here is supported by analyses of interactional data in specific settings: private and public face to face and telephone talk. They vary from gossip at the family dinner table and intimate keeping in touch phone conversations to interpersonally focused talk in institutional settings such as the government office and the university research seminar. Drawing on a range of methodological approaches including Discourse Analysis and Pragmatics, Interpersonal Communication and Conversation Analysis, the author elevates small talk to a new status as functionally multifaceted but central to social interaction as a whole.
