Smaller Pets Shirley M. Knibb,1982 The Wildlife Fencing Guide : Amphibians, Reptiles & Small Mammals Steve Béga,Dean Swensson,2021-09-01 This document is designed to provide detailed guidance on material choice and installation methods for reptile amphibian and small mammal fencing It combines and builds upon information shared in existing best management practice guidelines from across the world and will be updated when new relevant information is published

Management of Amphibians, Reptiles, and Small Mammals in North America Robert C. Szaro,Kieth E. Severson,David R. Patton,1988 Historically the management of public lands from a multiple use perspective has led to a system that emphasizes those habitat components or faunal elements that primarily resulted in some sort of definable economic value While this often benefitted other species that were not even considered in the original prescriptions it also negatively impacted others We no longer can afford to take this simplistic view of ecosystem management We need to use a more holistic approach where ecological landscapes are considered as units and land management practices incorporate all elements into an integrated policy This includes examining the impacts of proposed land uses on amphibian reptile and small mammal populations

Reptile, Amphibian, and Small Mammal Species Associated with Natural Gas Development in the Monongahela National Forest, West Virginia, 2010

Burgeoning energy in the United States has led to increased natural gas exploration in the Appalachian Basin Despite increasing natural gas development in the region data about its impacts to wildlife are lacking Our objective was to assess past and ongoing natural gas development impacts on reptiles amphibians and small mammals in the Monongahela National Forest in West Virginia We sampled 40 gas well sites and compared amphibian reptile and small mammal captures among active producing plugged inactive and storage well types Total species richness and diversity were greater at storage gas well sites than at plugged wells Although natural gas development adversely impacts moisture sensitive woodland salamanders our results suggest that maintained gas well openings may benefit other herpetofauna and small mammal species that use early successional habitat within predominately forested central Appalachian landscapes
