Hidden Hunger and the Transformation of Food Systems Hans Konrad Biesalski, 2020-10-06. Hidden hunger is not about providing enough calories; it is about a lack of micronutrients which has long consequences for the children who are mostly affected. This begins with physical and cognitive developmental disorders and continues with an increased risk of non-communicable diseases and the occurrence of obesity. The book compiles the contributions of the Fourth Congress on Hidden Hunger 2019 as original articles. The focus of the congress was the problem of malnutrition and overweight which can coexist and is termed a double burden. Part of the book deals with the causes of malnutrition and the challenge of achieving an agricultural system that is more focused on food quality. Another part discusses the causes and intervention approaches to tackling childhood obesity, especially in connection with malnutrition. All in all, this publication is a summary of important work by highly renowned authors on the topic of the congress.

Food Safety and Human Health Ram Lakhan Singh, Sukanta Mondal, 2019-07-30. Despite advances in hygiene, food treatment and food processing, diseases caused by foodborne pathogens continue to constitute a worldwide public health concern. Ensuring food safety to protect public health remains a significant challenge in both developing and developed nations. Food Safety and Human Health provides a framework to manage food safety risks and assure a safe food system. Political, economic and ecological changes have led to the re-emergence of many foodborne pathogens. The globalization of food markets, for example, has increased the challenge to manage the microbial risks. This reference will help to identify potential new approaches in the development of new microbiologically safe foods that will aid in preventing food borne illness outbreaks and provides the basic principles of food toxicology, food processing and food safety. Food Safety and Human Health is an essential resource to help students, researchers and industry professionals understand and address day to day problems regarding food contamination and safety. Encompasses the first pedagogic treatment of the entire range of toxic compounds found naturally in foods or introduced by industrial contamination. Identifies areas of vital concern to consumers such as toxicological implications of food and human health implications of food processing. Focuses on safety aspects of genetically modified foods and the range of processing techniques along with the important food safety laws.
