Canadian Slavonic Papers, 1974 *Abolishing Death* Irene Masing-Delic, 1992-11-01 The idea of abolishing death was one of the most influential myth-making concepts expressed in Russian literature from 1900 to 1930 especially in the works of writers who attributed a life modeling function to art To them art was to create a life so aesthetically organized and perfect that

immortality would be an inevitable consequence This idea was mirrored in the thought of some who believed that the political revolution of 1917 would bring about a revolution in basic existential facts specifically the belief that communism and the accompanying advance of science would ultimately be able to bestow physical immortality and to resurrect the dead According to one variant for example the dead were to be resurrected by extrapolation from the traces of their labor left in the material world The author finds the seeds of this extraordinary concept in the erosion of traditional religion in late nineteenth century Russia Influenced by the new power of scientific inquiry humankind appropriated various divine attributes one after the other including omnipotence and omniscience but eventually even aiming toward the realization of individual physical immortality and thus aspiring to equality with God Writers as different as the decadent Fyodor Sologub the political Maxim Gorky and the gothic Nikolai Ogniov created works for making mortals into gods transforming the raw materials of current reality into legend The book first outlines the ideological context of the immortalization project notably the impact of the philosophers Fyodorov and Solovyov The remainder of the book consists of close readings of texts by Sologub Gorky Blok Ogniov and Zabolotsky Taken together the works yield the salvation program that tells people how to abolish death and live forever in an eternal self created cosmos gods of a legend that was made possible by creative artists imaginative scientists and inspired laborers *Books in Print* ,1981 **Arts & Humanities Citation Index** ,1980 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world s leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals The Australian Journal ,1867 BattleTech Legends: The Hunters Thomas S.
