manufacturers come under intensifying assault as a rogue industry for knowingly and callously plying their hazardous wares while insisting that the health charges against them remain unproven and are universally understood so smokers indulge at their own risk Among the eye opening disclosures here outrageous pseudo scientific claims made for cigarettes throughout the 30s and 40s and the story of how the tobacco industry and the National Cancer Institute spent millions to develop a safer cigarette that was never brought to market Dealing with an emotional subject that has generated more heat than light this book is a dispassionate tour de force that examines the nature of the companies culpability the complicity of society as a whole and the shaky moral ground claimed by smokers who are now demanding recompense
