compassion control of mind devotion and faith karma theory love meditation life and positive thoughts attitude and gratitude and karma theory It is believed that God is love and love is God and the soul is the essence of the Lord God in his Shabd Word and Divine Light is within all human beings Soul can only merge into God when it becomes pure and free from karmas and bondage of birth and death again and again However to achieve peace of mind love and happiness one should develop his human nature by living in the present moment and have positive attitude positive thinking and be a good human Our New Human Consciousness Terry Sands,2011-05 Every few thousand years our human culture experiences a massive evolutionary transformation In the next few years our consciousness will change very rapidly and move us beyond anything we can presently imagine This change of consciousness is happening naturally to each of us now and it will affect every aspect of how we think how we live and how we love We are a culture in search of its spirit and this change of consciousness is evolutionarily next for humankind on this planet When the awareness opens one may search many avenues and attractions for truth and enlightenment and find the search lacking in result The next step may be the path of Self discovery But the direction on this path will not be given to us by a great teacher who comes down from the mountaintop with answers cast in stone but rather by lots of little great teachers who could be called pathfinders And to move into this new consciousness we will transform the mind and the way it works with new mental skills and mental technology Our success is inevitable The ease or difficulty with which we achieve this success is still in formation We will survive the transition physically The question is whether we will survive psychologically Psychological survival in this transition depends on only one thing Developing the ability and inner discipline to completely instantaneously unquestioningly and continuously adapt to change

reasonable size and price level has gradually forced the Commission Presidents to be more selective than before in drafting their Reports I have certainly stimulated them into that direction in order that Reports like these be valuable and lasting it seems imperative that the individual contributions have the character of a critical overall review where a fairly complete summary is given of the major developments and discoveries of the past three years and in which the broad developments and new trends be clearly outlined while at the same time essential problems for future research are identified With respect to the latter item I have suggested the Commission Presidents to add to their reports a brief section on scientific priorities for future research in the field of their Commissions In order to save space I have suggested to Commission Presidents that references to published papers are given on the basis of their number in the published issues of Astronomy and Astrophysics Abstracts For instance the indication 06 078 019 or AAA 06 078
