A unique feature of *Learning Diversity in the Chinese Classroom* is its Chinese context for meeting the educational requirements of children with special needs. At a time when many of the currently available texts in the area have a general perspective Asian teachers and students have long felt the need for a text that specifically recognizes the local context. *Learning Diversity in the Chinese Classroom* notes that international trends including those in many Southeast Asian countries are moving toward inclusive education and special needs and includes chapters on giftedness counseling and behavior management. Section 1 of the book describes the context of inclusive education in Asia. Summaries of the special features of the classroom in the region the conceptions of inclusion and cultural diversity from the perspective of the Asian classroom and how these are different to the Western classroom are provided. Section 2 focuses on various approaches to meeting the educational and socio emotional needs of children in the inclusive classroom. The first part is concerned with theoretical underpinnings of the type of need and the second part describes examples of how a teacher can cater for this type of diversity according to subject including mathematics Chinese English
