The Oxford Handbook of the Word John R. Taylor, 2015-06-25 This handbook addresses words in all their multifarious aspects and brings together scholars from every relevant discipline to do so The many subjects covered include word frequencies sounds and sound symbolism the structure of words taboo words lexical borrowing words in dictionaries and thesauri word origins and change place and personal names nicknames taxonomies word acquisition and bilingualism words in the mind word disorders and word games puns and puzzles Words are the most basic of all linguistic units the aspect of language of which everyone is likely to be most conscious A new word that makes it into the OED is prime news when baby says its first word its parents reckon it has started to speak knowing a language is often taken to mean knowing its words and languages are seen to be related by the similarities between their words Up to the twentieth century linguistic description was mainly an account of words and all the current subdivisions of linguistics have something to say about them A notable feature of human languages is the sheer vastness of their word inventories and scholars and writers have sometimes deliberately increased the richness of their languages by coining or importing new items into their word hoards The book presents scholarship and research in a manner that meets the interests of students and professionals and satisfies the curiosity of the educated reader

Rhyme over Reason Réka Benczes, 2019-01-31 We are fascinated by what words sound like This fascination also drives us to search for meaning in sound thereby contradicting the principle of the arbitrariness of the linguistic sign Phonesthemes onomatopoeia or rhyming compounds all share the property of carrying meaning by virtue of what they sound like simply because language users establish an association between form and meaning By drawing on a wide array of examples ranging from conventionalized words and expressions to brand names and slogans this book offers a comprehensive account of the role that sound symbolism and rhyme alliteration plays in English and by doing so advocates a more relaxed view of the category morpheme that is able to incorporate less regular word formation processes

The Sound Shape of Language Roman Jakobson, Linda R. Waugh, 2002 Reading this volume transported me back to Harvard and MIT lecture halls of the 1960s where weekly Roman Jakobson would spellbind his audience this reviewer included developing his vision of language through impassioned exposition deft and devastating allusions to critical literature anecdotes with the force of parables metaphors of mythic imagery and above all else overriding verbal artistry

truly in his own phrase In the poetry of grammar The Sound Shape of Language his collaboration with Linda R Waugh a scholar who has devoted considerable attention to an exposition and elaboration of Jakobsonian views fortunately has preserved in print the authoritative lectorial voice Michael Silverstein in Journal of Communication Korean Language in Culture and Society Ho-min Sohn,2005-12-31 Intended as a companion to the popular KLEAR Textbooks in Korean Language series and designed and edited by a leading Korean linguist this is the first volume of its kind to treat specifically the critical role of language in Korean culture and society An introductory chapter provides the framework of the volume defining language culture and society and their interrelatedness and presenting an overview of the Korean language vis vis its culture and society from evolutionary and dynamic perspectives Early on contributors examine the invention and use of the Korean alphabet South Korea s standard language vs North Korea s cultured language and Korean in contact with Chinese and Japanese Several topics representative of Korean socio cultural vocabulary sound symbolic words proverbs calendar related terms kinship terms slang expressions are discussed followed by a consideration of Korean honorifics and other related issues Two chapters on Korean media one on advertisements and the other a comparative analysis of television ads in Korea Japan and the U S follow Finally contributors look at salient features of the language narrative structure and dialectal variation All chapters are accompanied by a set of student questions and a useful bibliography A beginning level of proficiency in Korean is sufficient to digest the Korean examples with facility making this volume accessible to a wide range of students Contributors Andrew S Byon Sungdai Cho Young A Cho Young mee Y Cho Miho Choo Shin Ja J Hwang Ross King Haejin Elizabeth Koh Jeyseon Lee Douglas Ling Duk Soo Park Yong Yae Park S Robert Ramsey Carol Schulz Ho min Sohn Susan Strauss Hye Sook Wang Jaehoon Yeon **A grammar of Mandan** Ryan Kasak,2024-12-10 Mandan is a Siouan language of North Dakota near the geographic center of North America There are no longer any first language speakers after the last fluent speaker passed away in 2016 This grammar has been built from archival recordings of Mandan speakers from the 1960s through 2010 plus field work by the author undertaken between 2014 and 2016 The data from these various sources allowed for an in depth description of the key aspects of the grammar of Mandan with special attention to the language s complex verbal and nominal morphology This book also includes an overview of Mandan narrative structure culminating with an interlinear gloss of a traditional Mandan narrative and its free translation into English This grammar is written to be used by as general an audience as possible including Mandan community members scholars who wish to research Siouan languages linguistic typologists historical linguists and other individuals who aim to conduct research on an indigenous language of North America **Sound Symbolism** David Reid (M.A.),1967 Synaesthetic (sound) symbolism in non-synaesthetic brains Nicole Eismann,2016-03-31 Seminar paper from the year 2014 in the subject English Language and Literature Studies Linguistics grade 2.0 University of Bonn Institut f r Anglistik Amerikanistik und Keltologie course Language and Cognition language English abstract As far as possible within its limitations this paper is going to answer the

question whether non synaesthetic people are able to connect the sense of taste the auditive the visual and the tactile sense with each other While most of the synaesthesia studies focus on visual stimuli like colours or graphemes this paper is mainly concerned with the auditive sense represented by phonemes However since the visual sense is one of the most important senses for humans and for the sake of comparability visual stimuli in form of colours and different shapes are also included in the questionnaire In order to give the reader a proper overview of the topic a short literature review which gives information about the literature that is the base of the paper can be found in chapter 2 Subsequently in chapter 3 one finds a description of the methodology on which the research based on the evaluation of data taken from a questionnaire The presentation of the results of this research follows in chapter 4 as well as a detailed discussion of these results which can be found in chapter 5 right in front of the conclusion in chapter 6 Everyone is aware of the fact that the sense of taste is strongly connected with the sense of smell People who are due to special circumstances not able to smell properly often lose their appetite because they cannot really taste the food But what about the other senses Is tasting also connected with the visual or the auditive sense or are there in general connections between other senses than smell and taste People in a special neurological condition called synaesthesia are able to draw these connections Ramachandran and Hubbard describe synaesthesia as a condition in which an otherwise normal person experiences sensations in one modality when a second modality is stimulated Ramachandran Hubbard 2001 4 This can become obvious in many different most abstract ways like the matching of graphemes letters or numbers with special colours colours with sounds or even with tactile conditions But experiments in the past for example by Wolfgang Köhler have shown that not only synaesthetic persons but everyone can be able to draw a couple of sensual connections inside the brain But is this the case for any connection between randomly chosen senses or only for special ones
