The Greek Heritage In Victorian Britain:

The Greek Heritage in Victorian Britain Frank M. Turner, 1984-01-01 An important new study that seeks to establish what Victorian writers said about Greek culture and how their interpretations both molded and reflected the attitudes and values of the Victorian age Turner's readable intelligent thorough witty and magisterial book discovers and narrates a fundamental strain in British intellectual life from the late eighteenth century until the beginning of World War I It is THE book on its subject Turner's study has changed changed utterly the Victorian landscape Richard Tobias Victorian Poetry **The Greek conquest of Britain** Bernard MacGregor Walker Knox, Britain's Imperial Muse C. Hagerman, 2013-04-16 Britain's Imperial Muse explores the classics contribution to British imperialism and to the experience of empire in India through the long 19th century It reveals the classics role as a foundational source for positive conceptions of empire and a rhetorical arsenal used by commentators to justify conquest and domination especially of India **The Science of Religion in Britain, 1860-1915** Marjorie Wheeler-Barclay, 2010-10-21 Marjorie Wheeler Barclay argues that although the existence and significance of the science of religion has been barely visible to modern scholars of the Victorian period it was a subject of lively and extensive debate among nineteenth century readers and audiences She shows how an earlier generation of scholars in Victorian Britain attempted to arrive at a dispassionate understanding of the psychological and social meanings of religious beliefs and practices a topic not without contemporary resonance in a time when so many people feel both empowered and threatened by religious passion and provides the kind of history she feels has been neglected Wheeler Barclay examines the lives and work of six scholars Friedrich Max Müller Edward B Tylor Andrew Lang William Robertson Smith James G Frazer and Jane Ellen Harrison She illuminates their attempts to create a scholarly non apologetic study of religion and religions that drew upon several different disciplines including anthropology sociology the classics and Oriental studies and relied upon contributions from those outside as well as within the universities This intellectual enterprise variously known as comparative religion the history of religions or the science of religion was primarily focused on non Christian religions Yet in Wheeler Barclay's study of the history of this field within the broad contexts of Victorian cultural intellectual social and political history she traces the links between the emergence of the science of religion to debates about Christianity and to the history of British imperialism the latter of which made possible the collection of so much of the ethnographic data on which the scholars relied and which legitimized exploration and conquest Far from promoting an anti religious or materialistic agenda the science of religion opened up cultural space for an exploration of religion that was not constricted by the terms of contemporary conflicts over Darwin and the Bible and that made it possible to think in new and more flexible ways about the very definition of religion Fertility, Class and Gender in Britain, 1860-1940 Simon Szreter, 2002-07-25 This book offers an original interpretation of the history of falling fertilities in Britain between 1860 and 1940 It integrates the approaches of the social sciences and of demographic feminist and labour history with intellectual

social and political history It exposes the conceptual and statistical inadequacies of the orthodox picture of a national unitary class differential fertility decline and presents an entirely new analysis of the famous 1911 fertility census of England and Wales Surprising and important findings emerge concerning the principal methods of birth control births were spaced from early on in marriage and sexual abstinence by married couples was a far more significant practice than previously imagined The author presents a new general approach to the study of fertility change raising central issues concerning the relationship between history and social science *Empires Without Imperialism* Jeanne Morefield, 2014 Nationalism and Classicism A. Leoussi, 1998-07-08 This is a comparative study of the national significance of the classical revival which marked English and French art during the second half of the nineteenth century It argues that the main focus of artists interest in classical Greece was the body of the Greek athlete It explains this interest first by artists contact with the art of Pheidias and Polycletus which portrayed it and second by the claim made by physical anthropologists that the classical body typified the race of the European nations **Classics in 19th and 20th Century Cambridge** Christopher Stray, 2020-08-30 Eight essays in which Classicists examine the history of their own subject as taught and practised at Cambridge University in the nineteenth and twentieth centuries when the foundations were laid for the modern contours of the subject **The Victorians and Ancient Rome** Norman Vance, 1997-04-21 THE VICTORIANS ANCIENT ROME Norman Vance has written the first full length study of the impact on Victorian Britain of the history and literature of ancient Rome His comprehensive account shows how not only scholars and poets but also engineers soldiers scientists and politicians gained inspiration from the writing theory and practice of their Roman predecessors The Roman theme is traced in nineteenth century painting and music as well as literature and political discussion There are chapters on the imaginative influence throughout the nineteenth century of five major Roman poets framed by other chapters on Rome and European revolutions nineteenth century versions of Roman history fictions of Rome imperialism and decadence Attention is also paid to the influence of developments in archaeology both at Rome and Pompeii and at Romano British sites Professor Vance provides a fascinating account of the sense of connection Victorian Britain felt with the Roman experience a connection made the more complex because Britain had once been a Roman colony and because Christianity took hold and spread under the Roman Empire *Globalizing Roman Culture* Richard Hingley, 2005-02-08 Richard Hingley here asks the questions What is Romanization Was Rome the first global culture Romanization has been represented as a simple progression from barbarism to civilization Roman forms in architecture coinage language and literature came to dominate the world from Britain to Syria Hingley argues for a more complex and nuanced view in which Roman models provided the means for provincial elites to articulate their own concerns Inhabitants of the Roman provinces were able to develop identities they never knew they had until Rome gave them the language to express them Hingley draws together the threads of diverse and separate study in one sophisticated theoretical framework that spans the whole Roman Empire Students of Rome and those with an interest in classical cultural studies will
