*Stanley Fish on Philosophy, Politics and Law* Michael Robertson, 2014-08-07 Fish's writings on philosophy politics and law comprise numerous books and articles produced over many decades This book connects those dots in order to reveal the overall structure of his argument and to demonstrate how his work in politics and law flows logically from his philosophical

stands on the nature of the self epistemology and the role of theory Michael Robertson considers Fish's political critiques of liberalism critical theory postmodernism and pragmatism before turning to his observations on political substance and political practice The detailed analysis of Fish's jurisprudence explores his relationships to legal positivism legal formalism legal realism and critical legal studies as well as his debate with Ronald Dworkin Gaps and inconsistencies in Fish's arguments are fully explored and the author provides a description of Fish's own positive account of law and deals with the charge that Fish is an indeterminacy theorist who undermines the rule of law *The Political Lives of Information* Janaki Srinivasan, 2022-10-04 How the definition production and leveraging of information are shaped by caste class and gender and the implications for development Information says Janaki Srinivasan has fundamentally reshaped development discourse and practice In this study she examines the history of the idea of information and its political implications for poverty alleviation She presents three cases in India the circulation of price information in a fish market in Kerala government information in information kiosks operated by a nonprofit in Puducherry and a political campaign demanding a right to information in Rajasthan to explore three uses of information to support goals of social change Countering claims that information is naturally and universally empowering Srinivasan shows how the definition production and leveraging of information are shaped by caste class and gender Srinivasan draws on archival and ethnographic research to challenge the idea of information as objective and factual Using the concept of an information order she examines how the meaning and value of information reflect the social relations in which it is embedded She asks why casting information as a tool of development and solution to poverty appeals to actors across the political spectrum She also shows how the power to label some things information and others not is at least as significant as the capacity to subsequently produce access and leverage information The more faith we place in what information can do she cautions the less attention we pay to its political lives and to the role of specific social structures individual agency and material form in the defining production and use of that information

understanding of the political aspects of governing European aquaculture including how it both is structured by and is structuring politics It is aimed at advanced students researchers and professionals in aquaculture and fisheries as well as those with a broader interest in sustainability politics and sustainability governing practices **Isong Urua Adiakod: the Untold Story and the Politics of Bakassi Handover** Prince Kofi Itiat,2012 This is a story of people sent out of their ancestral land as refugees So the cover design will show women carrying their babies on the backs typical of African women with loads on their heads Men carrying their loads on their heads The background has to be a beach a river bank as they arrive from Bakassi At the bank of the river are mangrove trees In the river more people are paddling their boats heading to the same river bank **Encyclopedia of Politics of the American West** Steven L. The Politics of Sustainability in the Arctic Ulrik Pram Gad, Jeppe Strandsbjerg, 2018-10-04 The Politics of Sustainability in the Arctic argues that sustainability is a political concept because it defines and shapes competing visions of the future In current Arctic affairs prominent stakeholders agree that development needs to be sustainable but there is no agreement over what it is that needs to be sustained In original conservationist discourse the environment was the sole referent object of sustainability however as sustainability discourses have expanded the concept has been linked to an increasing number of referent objects such as society economy culture and identity This book sets out a theoretical framework for understanding and analysing sustainability as a political concept and provides a comprehensive empirical investigation of Arctic sustainability discourses Presenting a range of case studies from Greenland Norway Canada Russia Iceland and Alaska the chapters in this volume analyse the concept of sustainability and how actors are employing and contesting this concept in specific regions within the Arctic In doing so the book demonstrates how sustainability is being given new meanings in the postcolonial Arctic and what the political implications are for postcoloniality nature and development more broadly Beyond those interested in the Arctic this book will also be of great value to students and scholars of sustainability sustainable development and identity and environmental politics
