## **The Politics Of Global Borderlines:**

The Politics of the Global Himadeep Muppidi, 2004 Though presented often as an objective process globalization is frequently analyzed from subjective perspectives that are closed to their own historical and geographical specificity Refusing the false choice between objectivity and subjectivity Himadeep Muppidi considers the production of the global as an intersubjective process involving the interplay of meanings identities and practices from historically different locations Muppidi illustrates how the politics of globalization are played out in two multicultural democracies India and the United States particularly rich examples given the increasing interactions between them in the areas of global economy and security Although they differ in their approaches to worldwide regulation of weapons of mass destruction India and the United States cooperate in opposing terrorism Treating globalization as an intersubjective process reveals the different political possibilities e g colonial coercion postcolonial ambivalence and postcolonial co option that are opened by global relays of meanings identities and power Muppidi concludes by exploring a variety of spaces and strategies for resisting the colonization of the global

**Border Politics in a Global Era** Kathleen Staudt, 2017-06-16 Initially research in border studies relied mainly on generalizations from cases in the US Mexico borderlands before subsequently burgeoning in Europe Border Politics in a Global Era seeks to expand the study further to include the post colonial South in response to the major challenge of interdisciplinary border studies to explore borderlands in many contexts with and across a variety of states including the so called developing post colonial states Culled from decades of firsthand observations of borders from around the world and written with a critical and gender lens the text is framed with attention to history geography and the power of films and travelogues to represent people as others Professor Kathleen Staudt advances border concepts categories and theories to focus on trade migration and security highlighting the importance of states their length of time since independence and border bureaucrats discretionary practices Drawing on her Border Inequalities Database for a global perspective Staudt calls for reducing inequalities and building institutions in the common grounds of borderlands The book features maps and other visuals with lists of links at the close of most chapters Broadly comparative in nature Border Politics in a Global Era will appeal not only to students of border studies it will also stimulate attention in comparative politics international studies and political geography

**Border Politics** Cengiz Günay, Nina Witjes, 2016-12-09 In the light of mass migration the rise of nationalism and the resurgence of global terrorism this timely volume brings the debate on border protection security and control to the centre stage of international relations research Rather than analysing borders as mere lines of territorial demarcation in a geopolitical sense it sheds new light on their changing role in defining and negotiating identity authority security and social and economic differences Bringing together innovative and interdisciplinary perspectives the book examines the nexus of authority society technology and culture while also providing in depth analyses of current international conflicts Regional case studies comprise the Ukraine crisis Nagorno Karabakh the emergence of new

territorial entities such as ISIS and maritime disputes in the South China Sea as well as the contestation and re construction of borders in the context of transnational movements Bringing together theoretical empirical and conceptual contributions by international scholars this Yearbook of the Austrian Institute for International Affairs offers novel perspectives on hotly debated issues in contemporary politics and will be of interest to researchers graduate students and political decision makers alike

**The Politics of International Migration Management** M. Geiger,A. Pécoud,2010-10-13 Throughout the world governments and intergovernmental organizations such as the International Organization for Migration are developing new approaches aimed at renewing migration policy making This book now in paperback critically analyzes the actors discourses and practices of migration management

The Politics of Decolonial Investigations Walter D. Mignolo,2021-07-09 In The Politics of Decolonial Investigations Walter D Mignolo provides a sweeping examination of how coloniality has operated around the world in its myriad forms from the sixteenth century to the twenty first Decolonial border thinking allows Mignolo to outline how the combination of the self fashioned narratives of Western civilization and the hegemony of Eurocentric thought served to eradicate all knowledges in non European languages and praxes of living and being Mignolo also traces the geopolitical origins of racialized and gendered classifications modernity globalization and cosmopolitanism placing them all within the framework of coloniality Drawing on the work of theorists and decolonial practitioners from the Global South and the Global East Mignolo shows how coloniality has provoked the emergence of decolonial politics initiated by delinking from all forms of Western knowledge and subjectivities The urgent task Mignolo stresses is the epistemic reconstitution of categories of thought and praxes of living destituted in the very process of building Western civilization and the idea of modernity The overcoming of the long lasting hegemony of the West and its distorted legacies is already underway in all areas of human existence Mignolo underscores the relevance of the politics of decolonial investigations in and outside the academy to liberate ourselves from canonized knowledge ways of knowing and praxes of living

The Politics of South American Boundaries Carlos Parodi,2002-04-30 Parodi shows that boundary disputes have and continue to play a major role in creating tensions in South America Of the 25 international territorial boundaries that exist in South America eight were marked with major wars eight with lesser wars and five with some level of violence As recently as 1995 the armies of Ecuador and Peru were at war to define a boundary In 1982 Argentina went to war inspired by the call to restore a piece of its mutilated national territory Venezuela and Guyana Guyana and Suriname and Suriname and French Guiana have not completed boundary demarcation agreements Bolivia s insistence on its right for sovereign access to the Pacific Ocean is a source of tension with Chile and Peru Colombia and Venezuela have unresolved boundary issues in the Gulf of Venezuela Clearly boundary disputes have and continue to play a major role in creating larger conflicts within South America Territorial boundaries are marks on the ground but as Parodi shows their staying power or stability depends on their grip on consciousness By examining the boundary theory of South American states and its implementation he also explains how the

symbolic system of South American boundaries is used to instill national identity mobilize people to war and control population and territory This text will be of particular interest to scholars students and researchers involved with Latin American politics diplomacy and international relations      *Psychoanalysis and the Future of Global Politics* Robert Samuels,2023-08-31 This book offers a unique approach by using psychoanalytic theory to explain how we can resolve the most important issues facing the world today and in the future One of my main arguments is that we need to move beyond national politics in order to provide global solutions to global problems However there is a misplaced fear concerning global governance and much of this phobia is derived from a misunderstanding of history and human psychology Not only do we have to learn to give up our idealized investment in nations and nationalism but we also have to move beyond seeing the world from the perspective of a victim fantasy Since we often repress real signs of global progress we experience the global present and the future in negative ways To reverse this perspective we need to first understand the incredible progress humans have made in the last two hundred years but we also should not ignore the real threats we face      *The Politics of International Environmental Management* A. Underdal,2012-12-06 Many of the major environmental challenges facing governments and societies today are collective problems calling for joint solutions However even when effective solutions can be found only through joint efforts international cooperation is often hard to establish and maintain This makes it all the more important to understand the conditions for success and the causes of failure This book examines some of the political mechanisms at work in the formation and operation of international environmental regimes What are the major factors that shape the national positions that governments bring to the negotiating table How do the international institutions and negotiation processes through which these preferences and positions are adjusted and aggregated affect outcomes What are the main mechanisms determining whether or not international environmental agreements are successfully implemented at the domestic level *The Politics of International Environmental Management* is published in cooperation with the European Science Foundation      *The Politics of Dialogue* Ranabir Samaddar,2017-07-05 Offering a detailed analysis of post colonial South Asia *The Politics of Dialogue* discusses the creation and impact of borders and the pervasive tension between the new nations Neither all out war nor complete peace this fragile condition makes political leaders and strategists feel claustrophobic a war produces an end result but peace allows the rulers to carry out their policies for governing along their preferred path of development The book shows how cartographic communal and political lines are not only dividing countries but that they are being replicated within countries creating new visible and invisible internal frontiers It argues that in a situation where geopolitics constrains democracy the political class becomes incapable of coping with the tension between the inside outside eg democracy appears as an internal problem and geopolitics appears as a problem related to the outside      *The Politics of Gender* Yoke-Lian Lee,2010-10-18 This new title in the Politics of series addresses the major theme of the politics of gender Chapters on a variety of issues contributed by experts in the field of gender include Human Trafficking and

EU Law Gender in International Relations the Gender Politics of Philosophy Political Theory the Construction of Masculinity in Hollywood Movies the Politics of Law and the Politics of Mainstreaming Gender in the Peace and Security Agenda of the African Union An A Z glossary offers supplementary information on key terms with entries including abortion Commission on the Status of Women ecofeminism equal access human rights migration population control and sex tourism      **Border Policing and Security Technologies** Sanja Milivojevic,2019-03-27 This book is a unique and original examination of borders and bordering practices in the Western Balkans prior to during and after the migrant crisis of the 2010s Based on extensive mixed method exploratory research in Serbia Croatia FYR Macedonia and Kosovo the book charts technological and human interventions deployed in this region that simultaneously enable and hinder the mobility projects of border crossers Within the rich historical context of the Balkan Wars and subsequent displacement of many people from the region and beyond this book discusses the types and locations of borders as well as their development transformation and impact on people on the move These border crossers fall into three distinct categories people from the Middle East Africa and Asia transiting the region citizens of the Western Balkans seeking asylum and access to labour markets in the EU and women border crossers This book also maps border struggles that follow these processes analyses the creation of labour reserves in the region and examines the role that technology in particular smartphones and social media play in regulating mobility and creating social change This volume also explores the role of the EU in and the impact of the aforementioned processes on nation states of the Western Balkans their European future and mobility in the region Whilst the book focusses on a particular region in Southeast Europe its findings can be easily applied to other social contexts and settings It will be particularly useful to academics and postgraduate students studying social sciences such as criminology sociology legal studies law international relations political science and gender studies It will also be useful for legal practitioners NGO activists and government officials      *Borders, Boundaries, Frontiers* Thomas M. Wilson,2023-11-30 International borders are among the most significant political inventions of modern times The borders between national states are not just important to the peoples and governments who face each other across the borderline any international border can become a regional hotspot of global concern But aside from the significant role borders play in national and international affairs borders are also places and spaces where people live work raise families and build businesses Written for students across disciplines *Borders Boundaries Frontiers* introduces readers to the study of borders and border cultures Thomas M Wilson examines both historical foundations and current developments in the field with an emphasis on anthropological contributions Ultimately *Borders Boundaries Frontiers* encourages students to explore the role anthropology plays in the understanding of contemporary borders      *The Politics of Regional Identity* Michelle Pace,2005-09-20 Focusing on the politics of representation and constructions of identity the author analyses the impact of European regionalism on the Mediterranean      *The Politics of Good Neighbourhood* Béla Filep,2016-10-04 Analyzing neighbourly relations in

multicultural societies this book develops a concept of good neighbourhood and argues that cultural capital in various forms is the determining variable in building good neighbourly relations This work breaks new ground by offering a conceptual integration of different mutually interdependent forms of capital intercultural capital cross cultural social capital and multicultural capital These forms of capital are linked to different educational and cultural policies of the state as well as to civil society involvement at different levels of implementation Grounded in extensive fieldwork the book not only provides critical insights into neighbourly relations in culturally diverse border regions of East Central Europe but the concept developed through a rich theoretical base can be usefully adapted and widely applied to other contexts Scholars and graduate level students in geography international relations political science social anthropology and sociology as well as policy practitioners with an interest in the negotiation of coexistence minority issues and social and political cohesion in multicultural societies will find this an illuminating read

Humanitarian Space and International Politics Hikaru Yamashita, 2017-07-05 The creation of safe areas poses a number of difficult challenges to the spatial and normative organization of contemporary international politics As a result academics practitioners and NGOs alike will find the case studies in this informative book essential reading Hikaru Yamashita firstly looks at the case of northern Iraq after the first Iraqi war where safe areas represented a major departure from the conventional notion The different understandings of the Srebrenica safe areas especially with regard to the role of security are also assessed to ascertain how they eventually destroyed this humanitarian space A much needed account of the extent to which humanitarian space intended as shelter in response to Rwandan genocide consequently destabilized the area and provided cover for the genocideurs is additionally provided This well researched book through the prism of safe areas allows a measured assessment to be made of the place of human rights and humanitarianism in the contemporary world

**Architecture on the Borderline** Anoma Pieris, 2019-06-25 Architecture on the Borderline interrogates space and territory in a turbulent present where nation state borders are porous to a few but impermeable to many It asks how these uneven and conflicted social realities are embodied in the physical and material conditions imagined produced or experienced through architecture and urbanism Drawing on historical global examples this rich collection of essays illustrates how empires nations and cities expand their frontiers and contest boundaries but equally how borderline identities of people and places influence or expose these processes Empirical chapters covering Central Asia the Asia Pacific region the American continent Europe and the Middle East offer multiple critical insights into the ways in which our spatial imagination is contingent on border thinking on the ways of being and navigating frontiers boundaries and margins the three themes used to organise their content The underlying premise of the book is that sensitisation to border conditions can alter our understanding of the static physical spaces that service political or cultural ideologies and that the view from the periphery opens up new ways of understanding sovereignty In exploring these various spaces and their transformative subjectivities this book also reveals the unrelenting precarity of contesting and

living on the margins and related spaces and discourses that are neglected or suppressed      **Looking Beyond Borderlines** Lee Rodney, 2016-12-19 American territorial borders have undergone significant and unparalleled changes in the last decade. They serve as a powerful and emotionally charged locus for American national identity that correlates with the historical idea of the frontier. But the concept of the frontier so central to American identity throughout modern history has all but disappeared in contemporary representation while the border has served to uncomfortably fill the void left in the spatial imagination of American culture. This book focuses on the shifting relationship between borders and frontiers in North America specifically the ways in which they have been imaged and imagined since their formation in the 19th century and how tropes of visibility are central to their production and meaning. Rodney links ongoing discussions in political geography and visual culture in new ways to demonstrate how contemporary American borders exhibit security as a display strategy that is resisted and undermined through a variety of cultural practices.      *The International Organization for Migration in North Africa* Inken Bartels, 2021-12-29 This book examines the International Organization for Migration's (IOM) practices of international migration management and studies current transformations of migration governance and the role of international organizations outside Europe. While so-called migration crises in North Africa in 2005 and 2011 made the instability of the increasingly militarized border regime visible, they also created space for new actors and instruments to emerge under the label of international migration management promising softer forms to control migration outside Europe. Who are these actors and how do they think and practice migration control without the use of physical force and obvious repression? This book develops an innovative theoretical framework that mobilizes Bourdieu's Theory of Practice to critically investigate the work of the IOM in Morocco and Tunisia between 2005 and 2015. Analyzing its information campaigns, voluntary return programs and anti-trafficking politics, the book shows how this organization teaches potential migrants and North African actors to understand migration as their own problem and its management as their own responsibility. This book advances our understanding of the complex and ambivalent practices of controlling migration through information protection and repatriation and the implications of ubiquitous but underresearched institutions such as the IOM in this contested field. It will appeal to postgraduate researchers and academics in International Relations Theory, Border and Migration Studies, International Political Sociology, international organizations and contemporary politics in North Africa.      **Toward a New Art of Border Crossing** Ananta Kumar Giri, Arnab Roy Chowdhury, David Blake Willis, 2024-11-05 Boundaries, borders and margins are related concepts and realities and each of these can be conceptualized and organized in closed or open ways with degrees of closure or openness. The logics of stasis and closure as well as cults of exclusivist and exclusionary sovereignty are reflected and embodied in the closed xenophobic conceptualization and organization of boundaries, borders and margins. But an open conceptualization of the borderlands where mixing and hybridity take place at a rapid even dizzying pace gives rise to Creolization at the threshold of sovereignties which can also be imagined. At present, our border zones are

spaces of anxiety ridden security arrangements violence and death The existing politics of boundary maintenance is wedded to a cult of sovereignty at various levels which produces bare lives bodies and lands We need the new art of border crossing to be defined by the notion of camaraderie and shared sovereignties and non sovereignties Border zones can also be zones of meetings communication transcendence and festive celebration of the limits of our identities Thus we need a new art and politics of boundary transmutation transformation and transcendence in the broadest possible sense that entails the production of spatial scalar somatic cognitive affective and spiritual transitions From Geopolitics to Global Politics Jacques Lévy, 2001 Addressing the weakening of the nation state and the globalizing tendencies of the 21st century this compilation of writings looks at international wars boundaries cultural conflict and world economy in a bid to address the changing relationship between politics and geography
