The Politics Of Human Nature:

The Politics of Human Nature Thomas Fleming, 1988-01-01 The effort to understand human nature in a political context is a daunting challenge that has been undertaken in a variety of ways and by a myriad of disciplines through the ages From Plato to Hobbes and Burke to Wallas and Oakeschott in our era efforts have been made to provide some organic framework for the political study of mankind What has added greatly to the complexity of the task is the increasing denial even rejection in the positivist and behaviorist traditions of the very notion of a human nature The work can be described as a series of interlocking propositions the proverbial view of human nature can be explained by evolutionary theory Biological differences between men and women are responsible for family community and group life Social evolution goes through stages which are recapitulated in the moral life of individuals A well defined federal system mirrors human development And finally for Fleming most problems in social and political life stem from violations of this federalist system Fleming's volume takes up a variety of issues sex and gender differences democracy and dictatorship individual and familial patterns of association He does so in the context of showing how forms of legitimate authority such as families communities and nations establish such authority by appeals to human nature and that these appeals while presumably resting on empirical evidence also confirm the existence of normative structures Fleming's work is an effort of synthesis that is sure to arouse discussion and debate It represents a serious addition to a literature retrieved from the historical dustbins to which it has been repeatedly consigned

belief that the perfect political system can be achieved and in the anti utopian conviction that an ideal state is neither possible nor desirable and would simply lead to a repressive state This book examines two well known utopias and two anti utopias to draw out their conceptions of human nature and show that these conceptions are directly related to their views on politics It shows that utopians emphasize that human nature is knowable predictable and therefore open to manipulation and or suppression Anti utopians on the other hand make the claim that human nature is not entirely knowable or predictable While they worry about the power of the state to manipulate human nature they also make the case that the natural recalcitrance and unpredictability of human beings would lead inevitably to a search for freedom and individuality and therefore to a clash between the state and the individual in the supposedly ideal state Ultimately therefore these anti utopians suggest a new conception of human beings as people who value the power to choose their own ends and are unable to entirely suppress their desire for freedom These two conceptions of human nature lead to two dramatically different conceptions of politics Utopians see the possibility of manipulating human nature to create an ideal political system which synthesizes all political values and issues while anti utopians reject both the possibility and desirability of an ideal political system and make the case for providing freedom of choice for all people *Human Nature in Politics* Graham Wallas, 1921

Non-Human Nature in World Politics Joana Castro Pereira, André Saramago, 2020-08-26 This book explores the interconnections between world politics and non human nature to overcome the anthropocentric boundaries that characterize the field of international relations By gathering contributions from various perspectives ranging from post humanism and ecological modernization to new materialism and post colonialism it conceptualizes the embeddedness of world politics in non human nature and proposes a reorientation of political practice to better address the challenges posed by climate change and the deterioration of the Earth s ecosystems The book is divided into two main parts the first of which addresses new ways of theoretically conceiving the relationship between non human nature and world politics In turn the second presents empirical investigations into specific case studies including studies on state actors and international organizations and bodies Given its scope and the new perspectives it shares this edited volume represents a uniquely valuable contribution to the field
