The Politics Of The Solar Age Alternatives To Economics:

The Politics of the Solar Age Hazel Henderson,1981 **The Politics of the Solar Age** Hazel Henderson,1988 The Elgar Companion to Feminist Economics Janice Peterson,Margaret Lewis,2001-01-01 Comprehensive reference work introducing readers to the field of feminist economics It addresses key concepts as well as feminist economic critiques and reconstructions of major economic theories and policy debates **The Politics of Actually Existing Unsustainability** John Barry,2012-02-23 At the level of developing a progressive and critical theoretical understanding of unsustainability it argues for the importance of integrating vulnerability which has been largely neglected by both mainstream western political theory and analyses of the current global ecological crisis It suggests that valuable insights into the causes of and alternatives to unsustainability can be found in a critical embracing of human vulnerability and dependency as both constitutive and ineliminable aspects of what it means to be human Rather than seeing invulnerability as the appropriate response the book defends resilience and the ability to cope with rather than solve vulnerability as more productive

Futures Beyond Dystopia Richard Slaughter,2004 How can dystopian futures help provide the motivation to change the ways we operate day to day This book raises and tackles a number of important questions about the future and the lessons we can learn for the present **Bazaars, Conversations and Freedom** Rajni Bakshi,2017-09-08 Long before the financial meltdown and the red alert on climate change some far sighted innovators diagnosed the fatal flaws in an economic system driven by greed and fear Across the global North and South diverse people financial wizards economists business people and social activists have been challenging the free market orthodoxy They seek to recover the virtues of bazaars from the tyranny of a market model that emerged about two centuries ago This widely praised book is a chronicle of their achievements From Wall Street icon George Soros and VISA card designer Dee Hock we get an insider critique of the malaise Creators of community currencies and others like the father of microfinance Bangladesh s Muhammad Yunus explore how money can work differently The doctrine of self interest is re examined by looking more closely at Adam Smith through the eyes of Amartya Sen Mahatma Gandhi s concept of Trusteeship gathers strength as the socially responsible investing phenomenon challenges the power of capital Pioneers of the open source and free software movement thrive on cooperation to drive innovation The Dalai Lama and Ela Bhatt demonstrate that it is possible to compete compassionately and to nurture a more mindful market culture This sweeping narrative takes you from the ancient Greek agora Indian choupal and Native American gift culture on to present day Wall Street to illuminate ideas subversive and prudent about how the market can serve society rather than being its master In a world exhausted by dogma *Bazaars Conversations and Freedom* is an open quest for possible futures This fully updated and revised UK version of the 2009 Vodafone Crossword Book Award winner for non fiction is a rare and epic narrative about those who have been quietly forging solutions and demonstrating that a more compassionate market culture is both possible and desirable **Power and Policy in Quest of Law** Myres S.

McDougal, W.M. Reisman, 2024-09-02 Man and the Biosphere: Kenneth M. Stokes, 2016-09-16 This four part monograph traces the dialectical development of economic thought from the Physiocrats through Marx to the present It is a broad treatment of the history of intellectual thought that bridges economic and the social sciences on the one hand with natural science and biology in particular on the other The author is concerned with systems theory and treats the economy from the perspective of the biophysical thermodynamic dimensions of the economic processes He closes his analysis with a discussion of organizational theory that relates to the formation of institutions and the issues of freedom in a technically dominated society The book comes full circle in examining the moral and ethical concerns that first influenced the Physiocrats and other founding fathers of economic science **The Resurgence of the Real** Charlene Spretnak, 2012-09-10 In this insightful beautifully written work one of America's most important feminist ecological thinkers reflects on the roots of modernity in Renaissance humanism the Reformation the Scientific Revolution and the Enlightenment Spretnak argues that an ecological postmodern ethos is emerging in the 1990s the creative cosmos and the complex sense of place Both a sharp critique and a graceful performance of the art of the possible The Resurgence of the Real changes the way we think about living in the modern world **Culture and Civilization** Gabriel R. Ricci, 2018-02-06 This volume of Culture and Civilization focuses on cosmopolitanism the global polity and political ramifications of globalization The introduction by Gabriel R Ricci establishes context and provides an overview of the entire work Topics include the history of globalization climate change policy ecological consequences of development concepts of civilization human rights Eastern thought and economics global citizenship and travel writing Within this collection Carl J Strikwerda argues that the first era of globalization in modern times was marked by global migrations patterns Pablo Iannone's history of the Andean oil rush and its ecological consequences looks at the processes of development Brett Bowden argues that civilization entails both progress and war J Baird Callicott provides a philosophical analysis of a moral theory that accommodates spatial and temporal scales of climate change Sanjay Paul analyzes the United Nations Global Compact and Ed Chung discusses the role of economic theory in business schools Colin Butler reflects on E F Schumacher's Buddhist Economics while Taso Lagos relates parallel polis to the idea of global citizenship Tony Burns examines the ways in which Aristotle Hegel and Kant have been interpreted Finally Adam Stauffer explores Charles Warren Stoddard's work South Sea Idyls This volume of Culture and Civilization the first under Ricci's editorship follows the tradition of the previous four volumes developing critical ideas intended to produce a positive intellectual climate one that is prepared to confront challenges and alert us to the opportunities for people in all fields and of all faiths of the twenty first century **Money and Sustainability** Bernard Lietaer, 2012-05-30 A report from the Club of Rome EU Chapter to Finance Watch and the World Business Academy Foreword by Dennis Meadows co author of the 1972 Club of Rome report The Limits to Growth **The Future of Money** Mary Mellor, 2010-04-09 As the recent financial crisis has revealed the state is central to the stability of the money system while the chaotic privately owned banks

reap the benefits without shouldering the risks This book argues that money is a public resource that has been hijacked by capitalism Mary Mellor explores the history of money and modern banking showing how finance capital has captured bank created money to enhance speculative leveraged profits as well as destroying collective approaches to economic life Meanwhile most individuals and the public economy have been mired in debt To correct this obvious injustice Mellor proposes a public and democratic future for money Ways are put forward for structuring the money and banking system to provision societies on an equitable ecologically sustainable sufficiency basis This fascinating study of money should be read by all economics students looking for an original analysis of the economy during the current crisis **God the Economist** M. Douglas Meeks, God does not appear in the modern market For most economists this is as it should be It is in no way necessary according to modern economic theory to consider God when thinking about economy Indeed the absence of God in economic matters is viewed as necessary to the great advances in modern economy The difficulty with modern market economies however is that human livelihood is also left out of the theory and practice of the market economy I propose to bring the church's teaching about God the doctrine of the Trinity to bear on the masked connections between God and economy I will treat the Trinity as the way of understanding what the Bible calls the economy of God *THINKING BEYOND CAPITALISM* CYNTHIA HAMILTON, 2014-05-23 The book is divided in two The first section addresses the theoretical short coming that result from the predominance of capitalism We recognize that capitalism was initially accepted as progressive and incorporated elements of democracy however slavery the first contradiction of capitalism was the economic activity which produced the profits which were then invested in the industrial revolution Successful industry ultimately destroyed slavery captains of industry insisted that if they had to pay their workers other captains would have to do the same But the ground work was laid for racism which became the next contradiction of capitalism As the democratic revolutions of Europe and the U S promised liberty and justice for all slavery lived on Meanwhile capitalism continued to reach out and colonialism and imperialism became the form of domination it would coexist with Domination included abuse of the environment and natural resources The second part of the book is empirical After reviewing the conditions of African Americans the authors review several essential building blocks for rebuilding communities that can provide stability and prosperity for all **Explorations in Environmental Political Theory** Joel Jay Kassiola, 2015-03-04 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster *Revolution or Renaissance* D. Paul Schafer, 2008-04-29 In *Revolution or Renaissance* D Paul Schafer subjects two of the most powerful forces in the world economics and culture to a detailed and historically sensitive analysis He argues that the economic age has produced a great deal of wealth and unleashed tremendous productive power however it is not capable of coming to grips with the problems threatening human and non human life on this planet After tracing the evolution of the

economic age from the publication of Adam Smith's *The Wealth of Nations* in 1776 to the present he turns his attention to culture examining it both as a concept and as a reality What emerges is a portrait of the world system of the future where culture is the central focus of development According to Schafer making the transition from an economic age to a cultural age is imperative if global harmony environmental sustainability economic viability and human well being are to be achieved Published in English *Ecology, Community and Lifestyle* Arne Naess, Arne Naess, 1990-10-26 The basic thesis of the work is that environmental problems are only to be solved by people people who will be required to make value judgements in conflicts that go beyond narrowly conceived human concerns Thus people require not only an ethical system but a way of conceiving the world and themselves such that the intrinsic value of life and nature is obvious a system based on deep ecological principles The book encourages readers to identify their own series of such parameters their own ecosophies Ecology Community and Lifestyle will appeal to philosophers specialists working on environmental issues and the more general reader who is interested in learning some of the foundational ideas of the rapidly expanding field of environmental philosophy *The Living Economy* Paul Ekins, 2017-06-28 First Published in 1986 Economics is in trouble Its policy instruments are blunt its experts disagree and its theories are in disarray in the face of global economics disorder unprecedented levels of indebtedness endemic inflation high unemployment deepening world poverty and gross environmental degradation The Living Economy analyses conventional economic theory in the light of contemporary economic problems and finds its basic premises and assumptions flawed and its methodology suspect in several important respects The Living Economy covers a variety of topics from agricultural methods and policy to health and world trade reform Contributors come from a wide diversity of countries and continents including the USA Europe Africa and the Far East Each section is worth reading in its own right for itself and indeed by itself It is a book to be browsed through reflected upon and enjoyed at one's leisure Together the contributions form a rich tapestry of insights and inspirations They are in no way a simple repetition of Schumacher's thoughts Rather they form an authentic part of a wider intellectual tradition of which he was also a part albeit an early and important one **Money and Sustainability** Christian Arnsperger Bernard Lietaer, Sally Goerner Stefan Brunnhuber, 2012-05-30 In 1972 the first Report for the Club of Rome *The Limits to Growth* famously spelled out the unsustainable consequences of an economic system that demands infinite growth in a finite world Just as *The Limits to Growth* exposed the catastrophic flaws in our economic system this new Report from the Club of Rome exposes the systemic flaws in our money system and the wrong thinking that underpins it It describes the ongoing currency and banking crises we must expect if we continue with the current monopoly system and the vicious impact of these crises on our communities our society as a whole and our environment Our money system is outdated brittle and unfit for purpose It is responsible for the endless cycle of boom and bust it systematically widens the gap between rich and poor it creates unemployment and multiplies other extremely adverse social effects of any financial economic crisis it undermines

sustainability initiatives it disables vitally needed national and international action to limit multiple threats to the environment and the biosphere It is the single structural cause common to all financial and monetary instability Money and Sustainability The Missing Link Report from the Club of Rome proposes an alternative a monetary ecosystem with complementary currencies working alongside the conventional one This is more flexible resilient fair and sustainable Societies worked like this in the past So can we The book first explains these systemic problems in detail It s written in a way that s clearly accessible to the general public although it references at length a wide range of technical topics economics theory the history and institutions of banking the physics of complex flow networks the science of sustainability and population trends and climate change This gives a framework for understanding the present money system The authors then describe their proposal for an alternative money ecosystem which systematically addresses and resolves the problems created by the present system Finally this practical proposal is illustrated by nine case studies of different complementary currencies which are either running now in development or could be implemented at short notice in individual cities and regions around the world A Prosperous Way Down Howard T. Odum, Elisabeth C. Odum, 2011-05-18 A Prosperous Way Down the last book by Howard T and Elisabeth C Odum has shaped politics and planning as nations states and localities begin the search for ways to adapt to a future with vastly increased competition for energy It considers ways in which a future with less fossil fuel could be peaceful and prosperous Although history records the collapse of countless civilizations some societies and ecosystems have managed to descend in orderly stages reducing demands and selecting and saving what is most important The authors make recommendations for a more equitable and cooperative world society with specific suggestions based on their evaluations of trends in global population wealth distribution energy sources conservation urban development capitalism and international trade information technology and education Available for the first time in paperback this thoughtful provocative book forces us to confront assumptions about our world s future and provides both a steadying hand and a call to action with its pragmatic analysis of a global transition
